Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas - Also Maryland, New Jersey and Delaware

VOL. 22 No. 25 | Lancaster Farming, Saturday, May 7, 1977 | $4.00 Per Year

Keepers of Mother's Day

Ag weather service stalled

By DIETER KRIEG

LANCASTER - That special weather forecasting service for farmers, which was to begin this Spring, isn't likely to be implemented until several months from now or even later.

The delay seems to be a combination of costs and a lack of sponsors.

Congressman (then candidate) Robert Walker of Lancaster revealed the unique weather service in a joint announcement with Noah Wenger, who has since been elected to the General Assembly in Harrisburg. Lancaster County was chosen for the initiation of the farm weather service because of its top ranking in agriculture among non-irrigated counties. The Garden Spot ranks third in agricultural production among all U.S. counties. That's a whopping $335 million worth of goods during 1975.

Interest in providing more detailed weather information for farmers is becoming more widespread. USDA Secretary Robert Bergland is noted for his backing of more advanced weather reports for farmers. An idea being entertained by some is the stationing of an Extension meteorologist at each of the nation's land-grant colleges.

According to Hugh Koffman, aide to Congressman Walker in Washington, D.C., funding for the weather service project is the primary stumbling block. An Atlanta firm, PASTEL, is to market the weather service

Big poultry events on tap

HARRISBURG - The Pennsylvania Poultry Federation has recently revamped its Annual Poultry Conference and the change is going to have wide appeal for Pennsylvania poultrymen, say PPF leaders. The conference is scheduled for June 23, 1977, at the Host Farm in Lancaster.Three separate conferences will be held under the same roof and industrymen can attend a Broiler Congerence, and Egg Conference, or a Turkey Conference for the entire day. In addition, a separate Hatchery Seminar will be conducted in the morning for hatcherymen. Individuals with more than a single commodity interest will have a difficult time deciding which sessions to attend from the great variety of topics and speakers. Speakers come from all over the United States including California, Georgia, North Carolina, Ohio, Virginia, Delaware, and New Jersey. Topics have variety (production, processing, and marketing); controversy (the recent industry expansion in Pennsylvania and a new approach to forced molting); and immediacy (price outlook for feed, broilers, eggs , and turkeys as well as a look into the future for the broiler and turkey industry).The Pennsylvania Poultry Federation reports that the program is presently at the printers, but the master

Farm story being told on TV

By DIETER KRIEG

LANCASTER – The farm and the farmer – his work, problems, goals and opinions – are the subject of a new television program which had its debut here last month over WGAL-TV, Channel 8.

Conceived by Lancaster County Extension Director, Max Smith, the half-hour show is designed to bridge the gap between consumers and farmers. WGAL-TV is carrying the show as a public affairs presentation on alternate Saturday evenings, at 7 p.m. Two shows were aired last month; two more are on tap for transmission this month.

The next broadcast of "Out on the Farm" is scheduled for May 14, when Smith will present an educational segment on beef and hog production. Two Lancaster County farmers – David E. Buckwalter of Lititz R3 and Mark F. Nestleroth of Manheim R5 – will discuss their respective beef and hog operations with Smith for the benefit of thousands of viewers who may be tuned in. Preparations for that show were being made this past Thursday when video-tape crews from WGAL-TV visited the featured farms with the county agent. Earlier, scripts and production were reviewed to assure proper organization of various segments and topics.

Smith, who has served Lancaster County agriculture for 40 years, told Lancaster Farming in a recent interview that the object of the program is "to present the farm operation of each participant ... discuss his product and give some idea of problems related to that particular commodity. In general, we would be interested in getting

Lancaster Grain Prices

Thursday, May 5

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Thursday, May 5, are as follows:

	Bid+	Offered+
Ear Corn	59.50	67.50
Shelled Corn	2.56	2.75
Barley	2.42½	2.56
Oats		
Local	1.64½	1.84½
Western	2.15½	2.30
Wheat	2.89	3.10
Soybeans	9.45	——
Soybean Meal		333.50

+Bid is the price the dealer will buy from the farmer delivered to the mill. Sell is the price the dealer will sell for at his mill.

PACMA-FACTS Spent Fowl

The following market is supplied by PACMA-FACTS, a direct marketing organization affiliated with the Pennsylvania Farmers' Association. Participating poultrymen are members of PACMA, which employs a fowl marketing agent - The Farmers' Agricultural Cooperative Trading Society (FACT) - to sell members' fowl. PACMA works directly with the PFA poultrymen in the program.

Too few sales to establish a market.

Farm point prices prevailing for fowl to be marketed by members during the week of May 2, are 9½ - 10, mostly 10.

Philadelphia Eggs

Wednesday, May 4, 1977

Prices unchanged to lower on mediums, balance unchanged. Cartoning demand fair but unable to fully clear ample offerrings which increasingly move to breakers. Undertone unsettled but steadier.

Prices to retailers: Sale to volume buyers, consumer grades white eggs in cartons, delivered: Store Door

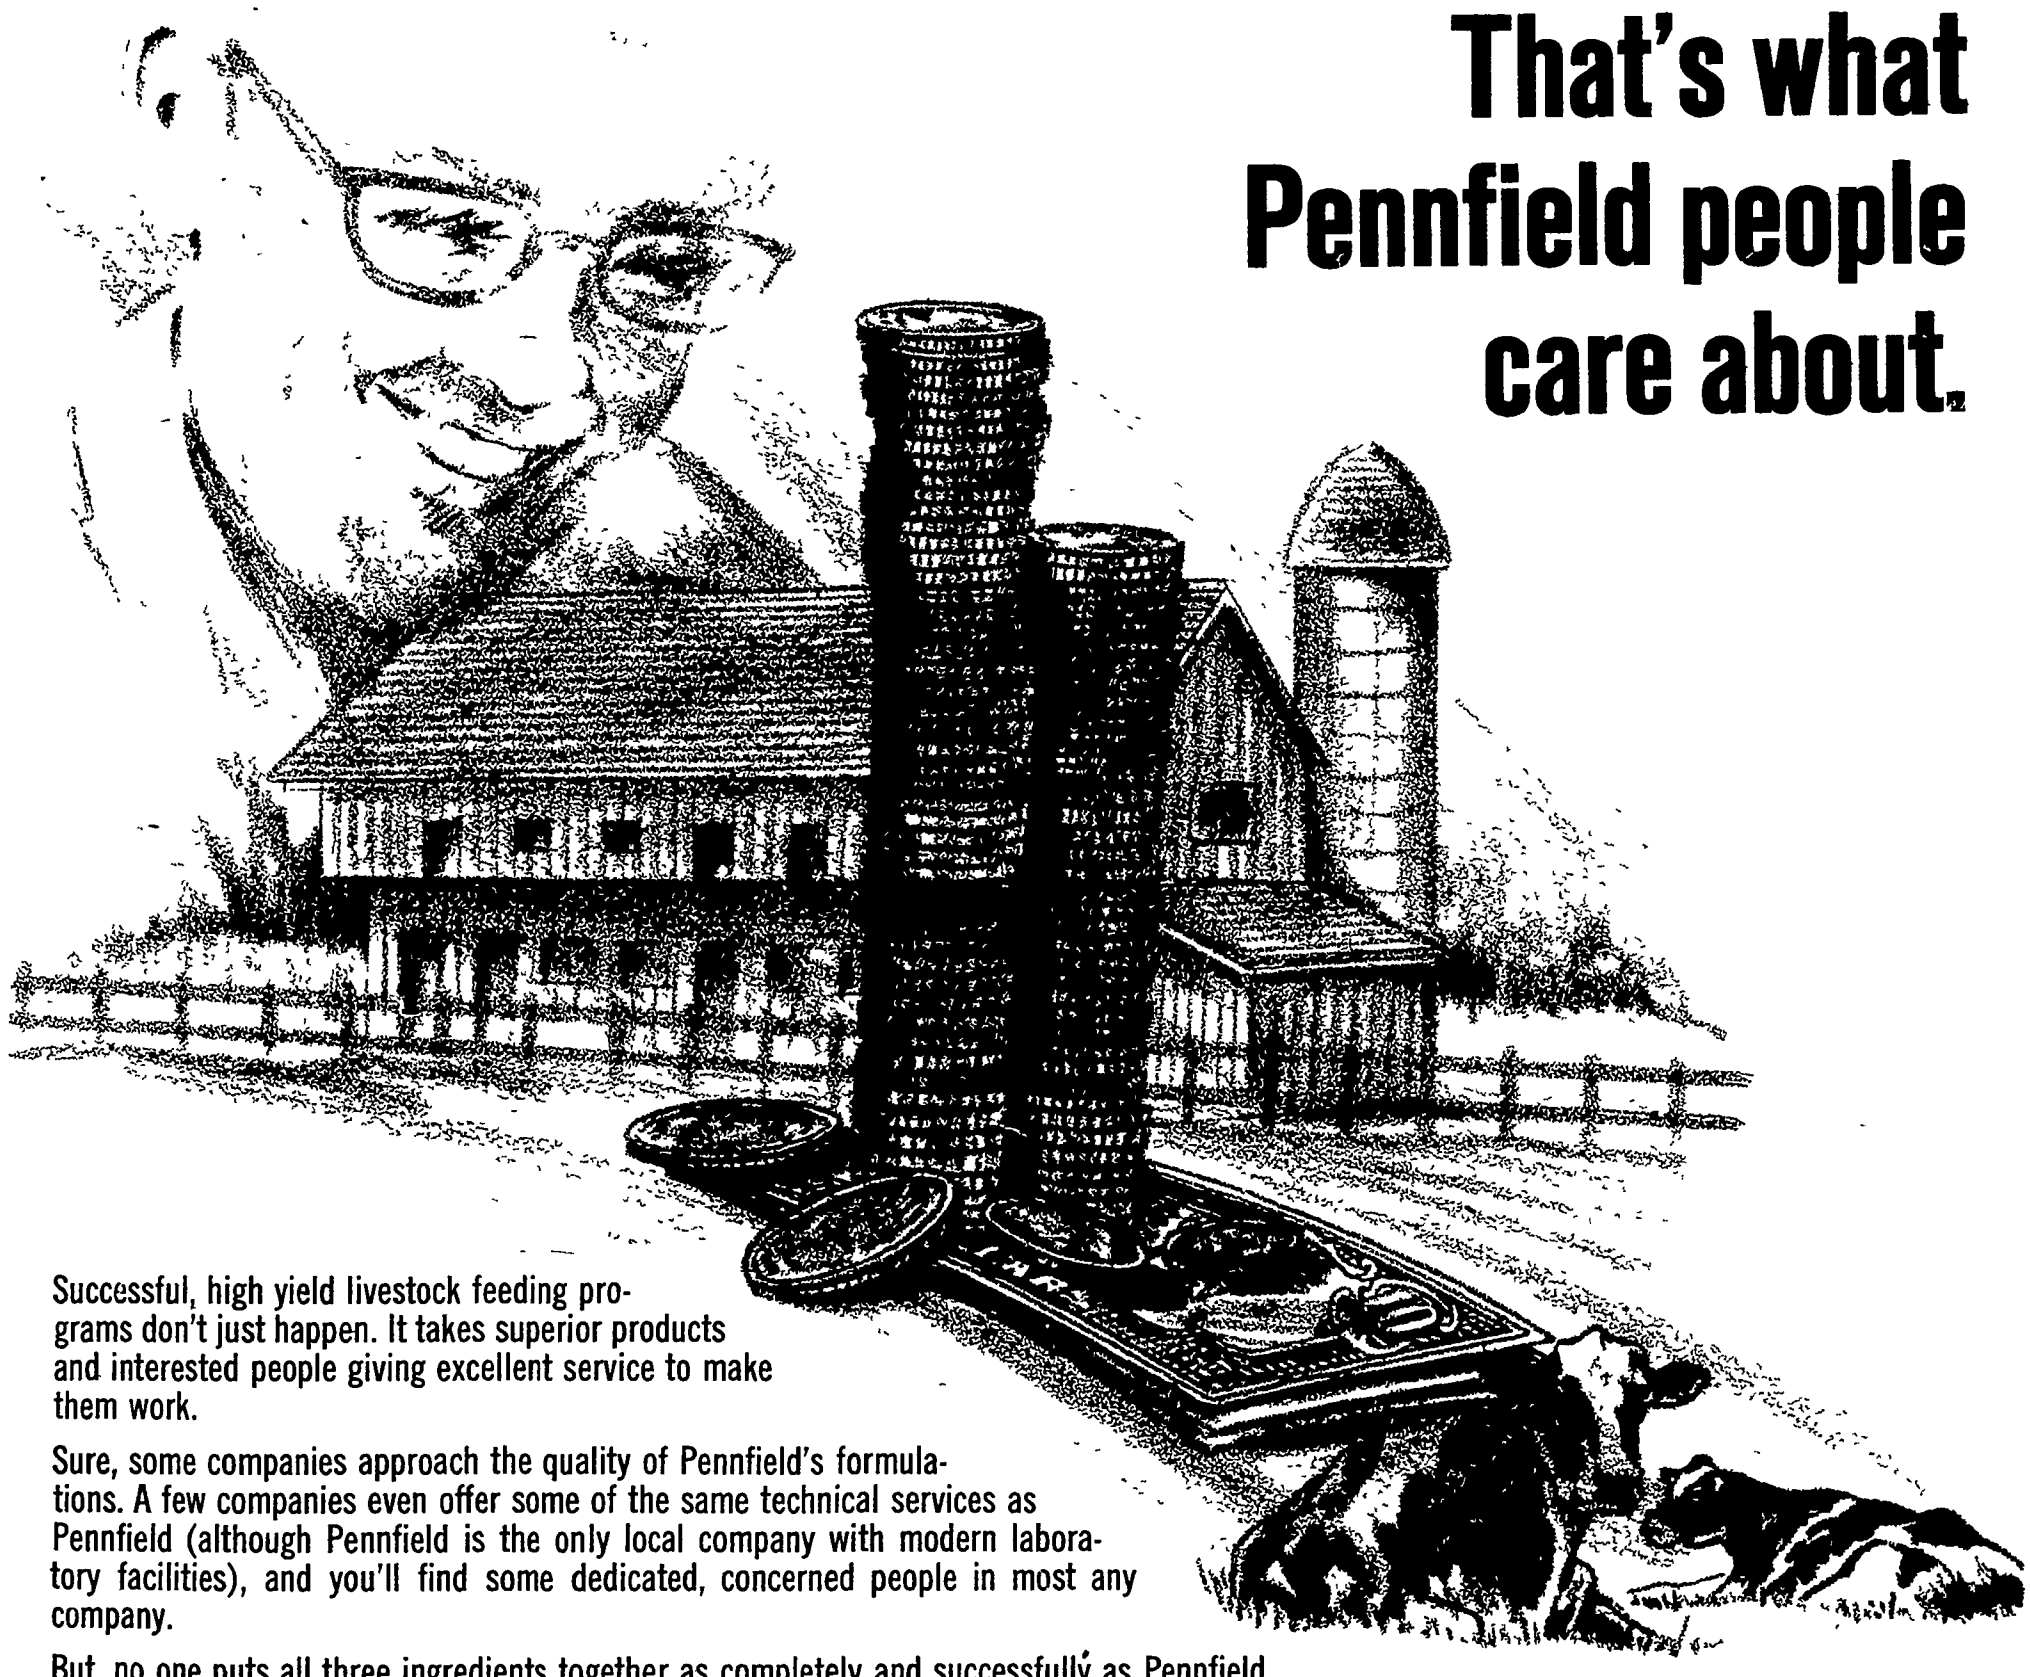
Your LIVESTOCK PRODUCTIVITY, your PROFITABILITY.



That's what Pennfield people care about.

Successful, high yield livestock feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete livestock feeding and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy!

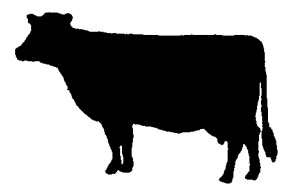
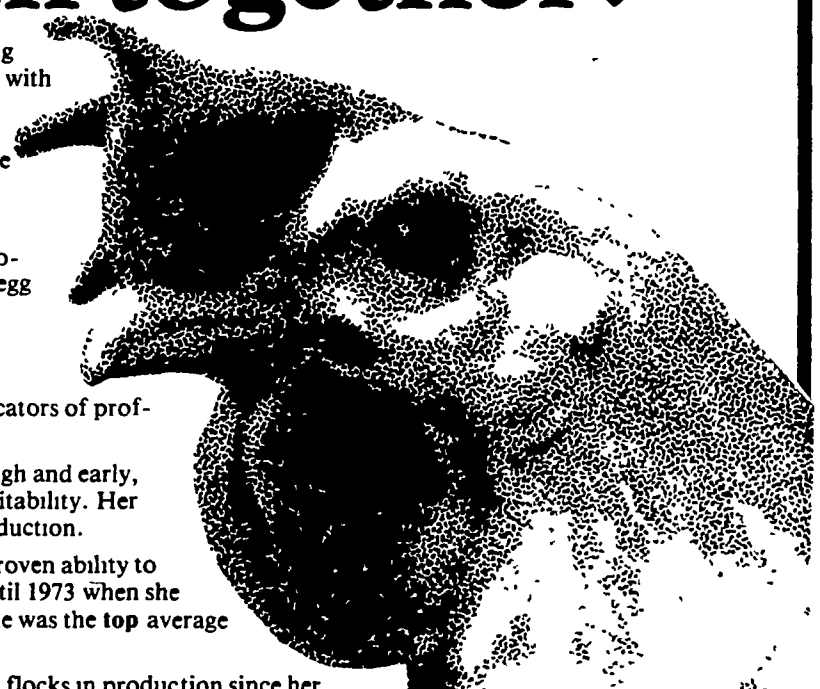
SHEEP AUCTION 10: Choice spring lambs 75-101 lbs. 61.50-63.50.



Put it all together!



The Babcock B-300V is rapidly reestablishing herself as the world's top layer. Egg producers with flocks well into production are reporting performance they haven't seen for years . . . from **any** layer. In many cases, in fact, they are reporting their best performance **ever.**

But in this business, **potential** is only half the game. Babcock backs its bird with the most professional, experienced distribution team in the egg industry.

Consider these features:

PRODUCT

The B-300V rates "excellent" in **all** key indicators of profitable performance:

*EGG PRODUCTION -- The B-300V peaks high and early, for quick recovery of **your** costs, and early profitability. Her persistency after peak translates to **top** egg production.

*FEED CONVERSION -- The B-300V has a proven ability to efficiently convert feed to eggs. From 1966, until 1973 when she was withdrawn from Random Sample Tests, she was the **top** average feed converter in the industry.

*LIVABILITY -- Field results from **all** B-300V flocks in production since her reintroduction in late '76 indicate she may have far-and-away the **best** livability in the business.

*EGGSHELL QUALITY -- Eggshell strength is one of the greatest assets of the 1977 B-300V. Between 1972 and 1976, shell strength of eggs produced by B-300V's has improved by a measured **15%** in early lay (36 weeks) and **30.8%** in late lay (68 weeks).

*RESISTANCE TO STRESS -- We call it "manageability". The B-300V is a calm, adaptable bird. She resists environmental stresses and recovers rapidly from management problems.

SERVICE

The Babcock distribution team has developed service programs to provide each individual grower or egg producer with the optimum product for his specific operation:

*DELIVERY -- Careful, on-time and courteous.

*QUALITY PRODUCTS -- Birds are hatched and/or grown with Babcock technical assistance. Uniform, **healthy** chicks and started pullets are vaccinated for **your** area challenges, and are correctly and fully-developed for their age.

*SERVICE -- Experienced, professional service is available before, during and after delivery.

*FLEXIBILITY -- Babcock distributors are equipped to supply the needs of **your** operation, **whatever** the size of your order. Cage **or** floor grown started pullets are available, depending on the needs of **your** program.

Talk to a professional about your next replacement flock. The businessmen behind the businessman's bird have a performance package tailored to **your** chick or started pullet program.

Quality and service. Put it all together with Babcock!

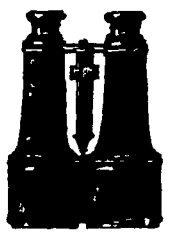
THE OLD FARMER'S ALMANAC

MAY 9-15, 1977

Hail, joyous hours of birds and flowers.

Cultivate your flower beds now Rockefeller Foundation established May 14, 1913 Last quarter of the moon May 9 Berlin Blockade ended May 13, 1949 Average length of days for the week, 14 hours, 30 minutes US Department of Agriculture founded May 15, 1862 *It's easy to be prudent when nothing tempts you to stray*



Ask the Old Farmer: In 1840 my grandfather was a baker and he advertised pilot bread — among other items Can you enlighten me? E B, Peru, Indiana

Pilot bread, or biscuit, or hardtack, was a very durable variety of cracker, and was carried on ships especially to be served when stormy weather made it difficult to cook It stays as solid as concrete for a long time A variety of the same is still sold by many grocers

Home Hints To restore whiteness to discolored handkerchiefs, immerse them in cold water in which you've dissolved a pinch of cream of tartar

OLD FARMER'S WEATHER FORECASTS

New England: Rain, northeaster to start, followed by more rain all week

Greater New York-New Jersey: Moderate rain then clear, hot temperatures by Tuesday, weekend brings cooling and showers

Middle Atlantic Coastal: Rain to start, then clear and hot through midweek, week's end brings rain, warm

Piedmont & Southeast Coastal: Very warm with rain in northeast to start, Tuesday brings showers south and west through Saturday, Sunday fair, showers west

A bouquet for Mother

By DIETER KRIEG

It took my mother 55 years to become a grandmother, but she was a grand mother long before that.

She started out as a mother just prior to the end of World War II. The scene was war-torn Germany and Russian troops were pouring into the area en masse. They took whatever they could get their hands on and frightened the women and children especially.

Cradling her infant in her arms, my mother went into hiding in the fields of our farm. Discovery would have meant harrassment and possibly death by bayonet or bullet.

Post-war Germany wasn't easy on mothers, either, even though the world was finally at peace in that region. Shortages of food, housing, medicine and clothing were very real. Some items, such as chocolates and oranges were totally unavailable. The country was partitioned into four sectors, with our state being occupied by the Soviets. That made matters worse yet as it cut us off from American aid. But worst of all was the agony which followed due to my father's imprisonment by the ruling communists. Openly denouncing the system, he drew a 15 year jail term from the totalitarian regime. Mom was left to take care of herself and four young children.

Life for Mom must have improved significantly when Dad was released from jail just 13 months after having been taken away. And I'm sure it improved still more when the family crossed into West Berlin one dark and drizzly night. That adventure alone involved risking death. Imagine the joy of the successful escape. But Mom still had many years to go during her unusual career as a wife and mother.

The escape from East Germany led to 2½ years of life in West German refugee camps, which were generously supported by America. Nevertheless, housekeeping there occasionally involved sharing a single room with several families. Luxury was having one room for yourself -- even if it was a family of six, as we were at that time.

Homeless, and the owners of nothing other than our lives and what was provided at the refugee camp, we could still consider ourselves fortunate for having escaped from a system which continues to enslave millions. Mom endured all.

Arriving in the United States, my mother did her grocery shopping by walking to a bus station more than a half mile away, and often carrying the shopping bags on the return trip. Meals were always planned with pennies in mind, but no one was ever shortchanged of good, wholesome nourishment. The same held true for clothing. We always had something to wear. Nothing was ever allowed to go to waste. What's more, Mom never ran out of love, patience, kindness, understanding and caring, even when others in the family ran short with their feelings. There were seven of us now, with the youngest being just a year old when we arrived in the United States.

Mom's outstanding qualities as a mother continued to shine when we moved to a farm in late 1959 and she became the foster mother of every calf that was born. Over the years she has raised thousands of them. Her devotion and patience has never run low -- whether it be for the family, calves and cows, or the hundreds of plants she cares for.

Her life has always been one of service to others and all living things around her. A bird fallen from its nest, for example, has often found a home with Mom. No plant in her garden and flower beds was ever endangered by weeds. No calf she has raised ever received less than 100 per cent of her devoted attention.

My mother's dedication and faith shine through the occasional dark clouds of life, and the entire family has benefitted greatly because of it.

NOW IS THE TIME...

Max Smith
County Agr. Agent
Telephone 394-6851

TO BEWARE OF HERBICIDE DRIFT

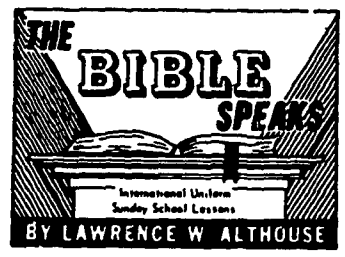
Many acres of corn ground, and no doubt some other areas will be sprayed with chemical weed killers in the coming weeks. Custom sprayers and farmer operators should keep in mind the danger of the wind blowing some of these fine particles to nearby gardens, properties and easily-killed crops. This often happens in the rural areas with graden plants. If spraying can be done when there is no wind, or the wind going away from the properties and gardens, there will be less complaints. The ester forms of 2, 4-D are more likely to give off more vapors that the amine forms; this is especially true in very hot weather. Respect for the property of others should be kept in mind at all times.

TO KEEP PROTECTIVE EQUIPMENT IN PLACE

Field work will be going at full speed as soon as the weather clears; this means that farm machinery will be used to get the job done. All of us get in a hurry at times when this happens we may fail to respect the safety guards that have been provided with our farm machinery. All chain and gear shields should be put back in place. The PTO guards on tractors are often removed and not replaced. This shaft travels at rapid speeds and can tear off clothing and break bones in a few seconds. We urge all machinery operators to take time to keep guards and shields in place. A few minutes to be safe may prevent life-time injury.

TO PURCHASE OUTSTANDING SIRES

In the livestock industry spring and early summer is the time when many breeders are replacing their herd sires or studs. We urge farmers to take the time to look for the very best performance-tested sires in order to improve their herds or flocks. A cheap sire might be able to reproduce his kind, but may not do much for improving the group. Good sires are seldom cheap and do not come at a "bargain", but in the long run they may be the most profitable investment. Keep in mind that the herd sire is half of the new-born animals; his influence on the future herd or flock should be the determining factor. Many sires are now available that will produce fast-growing and meat-type market animals; those that still throw small, and fat-producing carcasses will not be of much value in the long run. Try to buy the best sires available and you will stay in the profit column longer.



OF FAITH AND WORKS

Lesson for May 8, 1977

Background Scripture:
James 1:19 through 2:26
Devotional Reading:
Psalms 40:1-8

Protestant Reformer Martin Luther called the Epistle of James "a right strawy epistle" and openly regretted the fact that this letter had never been included in the canon of the New Testament. Others have had a similar reaction. The reason for this unhappiness with James is to be found in the presumed conflict between Paul's teachings about "salvation through faith" and James apparent emphasis upon "works" instead of "faith."

The conflict seems obvious:

Paul: "For we hold that a man is justified by faith apart from works of law" (Romans 3:28).

James: "You see that a man is justified by works and not by faith alone" (James 2:24).

Show me your faith

But the conflict is more apparent than real. The two scripture passages quoted quite out of context are not mutually contradictory. In fact, when we examine them more closely, we find that they are simply approaching the same truth from two different perspectives.

The problem is in the meaning of the word "faith."

For example, James asks us:

"If a brother or sister is ill-clad and in lack of daily food, and one of you says to them, 'Go in peace, be warmed and filled,' without giving them the things needed for the body, what does it profit'" (2:15).

What James is really saying here is that that kind of "faith" is not faith at all. The faith that is expressed only in cheerful words instead of helpful actions is not the faith that Paul speaks of in Romans. It is mere belief and there is a big difference between belief and faith. "Show me your faith apart from your works," challenges James (1:18).

The completion of faith

Two illustrations are used by the apostle. First, the example of Abraham offering his son Isaac upon the altar. It was not enough for Abraham to believe this what he was to do, but for him to be willing to act upon that belief. Because he was ready to follow his belief with action, James says, "You see that faith was active along with his works, and faith was completed by works..." (2:22).

The second illustration seems strange to us, but it is well suited for his point. Rahab was spared destruction, not just because she believed the messengers were from God, but because she acted upon that belief and "sent them out another way" (2:25). Thus, as with Abraham, it was not a matter of belief or works, but belief and works. These two together comprise faith.

Livestock market

Omaha Cattle

May 5, 1977

Weekly Cattle—Compared with the previous weeks close-through midweek, prices on slaughter steers were 50-75 cents lower, but closing trade firm on small supply; heifers were mostly 50 cents lower, instance 75 cents off at midweek. Cows were firm to 50 cents higher and bulls firm.

Four day reciepts 20,900 as compared 19,400 previous week and 15,300 a year ago. For the first time in some eight weeks, prices on slaughter steer and heifers were measurable lower than at the end of the previous trading period. The downturn was enforced on a liberal midweek run in reflection of increased slaughter and downward pressure on carcass beef at the wholesale level. However, demand was generally good throughout the period. Most interests came into the week in need of cattle and were quite aggressive for numbers on Monday and Tuesday. Marketings were moderately expanded over the previous week, but were ideally distributed over the trading period. The overall finish was again attractive with a liberal percentage choice steers and heifers included steers made up approximately 53 and heifers 31. Cows contributed 8 and feeders 7.

STEERS: At high time Tuesday, three loads choice and prime 1125-1224 lbs. predominantly 3 44.00. At midweek, load choice and prime 3 1101 lbs. 43.50, several loads same grade 3-4 1125-1294 lbs. 43.00-43.25. Load prime 5 1098 lbs. 37.00. Choice 2-4 975-1300 lbs. 42.00-43.35, load 3-4 1450 lbs. 40.00. Mixed good and choice 2-3 950-1250 lbs. 41.00-42.00. Good 2-3 38.00-40.50. Standard and good 2-3 35.50-37.00.

Average of LS-214, detailed quotations for choice 900-1100 lb. steers this week 42.82: choice 1100-1300 lbs. 42.70. Average weight steers first three days 1143 lbs. as compared 1142 lbs. previous week. Average weight heifers first three days 987 lbs. as compared 968 lbs. previous week.

HEIFERS: Several loads choice and prime 3-4 967-1041 lbs. 42.75-43.25 on Tuesday. At close, two loads choice and prime 3-4 1057-1170 lbs. 42.25. Choice 2-4 900-1075 lbs. 40.50-42.00, part loads 3 42.25-42.50, few 42.75. Mixed good and choice 2-3 850-1000 lbs. 38.75-40.00. Good 2-3 35.00-38.00. Small lots of standard and good 2-3 33.00-34.50.

COWS: Utility and commercial 2-4 26.00-28.00, few 28.25-28.50. Canner and cutter 23.00-26.50.

BULLS: 1-2 1400-2200 lbs. 34.00-38.50, individual 1 39.00-40.00

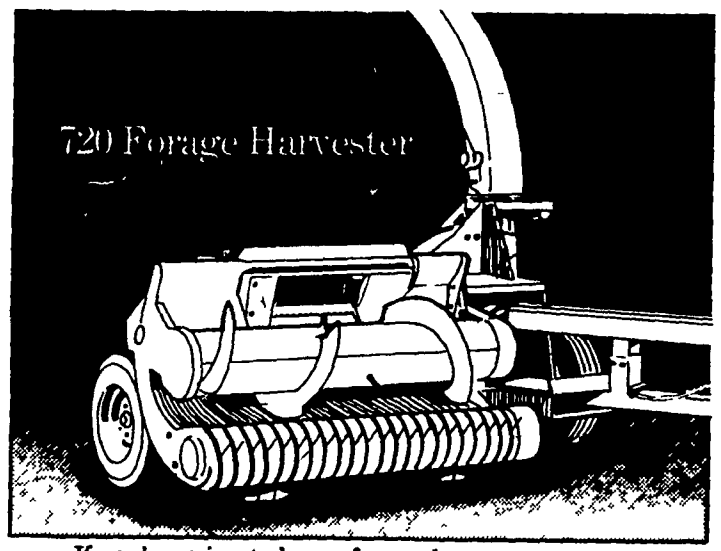
HERE'S YOUR RIGHT CONNECTION FOR THE CHANCE TO SAVE $100 ON AN IH® FORAGE HARVESTER.



If you're going to buy a forage harvester, you can get paid just for having one demonstrated on your farm.

Field-test and buy a new IH 720 or 830 forage harvester, and International Harvester will pay you $100.00. But, if you field-test the new IH machine and buy a new model of another make, then IH will pay you $50.00. (Purchase must be made before July 29, 1977.) Plus you get waiver of finance 'til fall.

This year, it really pays to compare. Why not call today?

Ag weather service stalled

[Continued from Page 1]

for the government. Spokesmen at PASTEL say they haven't been able to find sponsors for the service. Bell of Pennsylvania confirmed the lack of business backing in an interview with **Lancaster Farming** yesterday.

The weather service, when implemented, will depend heavily on telephone lines. According to a spokesman at PASTEL, callers will have access to their respective weather reports by calling a local number. Taped messages will be given. Information is compiled by the U.S. Weather Bureau and distributed by PASTEL.

Congressman Walker, spokesmen at PASTEL, the telephone companies, and USDA all seem to be enthusiastic and eager about the possibilities of the specialized weather service. They have been unable to sell the program to businesses, however. Figures on the costs of such a program were not available at press time.

Some rough estimates given by PASTEL, however, indicate that the costs could range from several hundred to several thousand dollars per month, depending on the size of the communities involved.

PASTEL also indicated that similar weather programs are already in existence in other portions of the country. The difference is that those are not primarily geared to the farmer. Rather, they're aimed at broader audiences, a concept which sponsors in Lancaster County would like to envision if they pour money into it.

According to a USDA weather specialist, there's a lot of weather information his Department could provide if an economical system of dissemination is devised. There are plans within the U.S. Department of Agriculture to build information systems to aid in long-term and day-to-day agricultural planning. Secretary Bergland is largely credited for stimulating such programs.

According to USDA, the weather has a "definite impact on farmers' decisions, even to the point of whether or not he buys a certain parcel of property." Weather has become so important in agricultural production since 1972 that farm prices are no longer influenced by just local weather, but by global conditions, USDA affirms.

USDA further contends that greater cooperation is needed between them and other agencies in order to realize their goal of providing more weather information for farmers.

SPECIAL DURING MAY

PURINA FLY CONTROL

BLITZ

1. Excellent residual fly control.
2. One of the safest residual sprays for use around young animals.
3. Approved for use in dairy barns, milk rooms and pig houses.
4. Can be sprayed on the ceiling over caged birds.
5. Approved for poultry, meat and food processing plants.

1. Approved for use in dairy barns, pig parlors, calf barns, poultry houses and other farm buildings.
2. Effective residual control of flies where sanitation is good.

1. Quick knockdown and kill of flies.
2. Maximum stable fly control.
3. Type of formulation recommended by some college extension departments.
4. Effective against insects which are resistant to other insecticides.

1. Contains an insecticide that has never been used in fly bait formulations. Better kill because of no fly immunity.
2. No competitive fly bait formulations contain methomyl.
3. Tested against a leading competitor, Purina Fly Patrol was equal to or superior in performance.
4. Has been proven highly effective against flies resisting baits containing D.D.V.P. (Vapona).
5. Economical — Use only ¼ lb. per 1000 sq. ft.

ALL NEW PURINA FLY LARVACIDE PREMIX

—ACTIVE INGREDIENT RABON*
*T M SHELL CHEMICAL CO

- Can be top fed or
- Mix with your grain ration
- Kills the horn, face, stable, and house fly maggots.
- More economical than blocks
- Can be fed to lactating dairy cows

PURINA FLY LARVACIDE BLOCK

— ACTIVE INGREDIENT RABON*
*T M SHELL CHEMICAL CO

- Kills the horn, face, stable and house fly maggots.
- Low consumption rate - 2.5 oz/hd/day.
- Can be fed to lactating dairy cows.

PURINA CHECK FLY AND WORMER BLOCK

1. Kills hornfly and face fly maggots.
2. Helps clean up pastures infested with worm and fly eggs.
3. Helps prevent foot rot and lumpy jaw.
4. Easy to use. Excellent for pasture feeding.
5. Palatable.
6. Can be used as a source of feed and salt. Contains necessary minerals, vitamins, grain and salt.

Carter suggests free food stamps

WASHINGTON, D.C. – President Jimmy Carter reportedly favors giving food stamps to eligible persons free of charge, an idea which is being backed by Agriculture Secretary Robert Bergland.

Supporters of the idea, including Carter and Bergland, claim that the proposed measure would tighten eligibility standards and reduce fraud. Bergland claims the Carter program would cost no more than the existing one, at first, but skeptics note that government spending on food stamps was ten times greater in fiscal year 1976 than it was in fiscal 1970.

Opponents of the free food stamps argue that the so-called "poorest of the poor" already are included in the food stamp program because persons with net incomes below $30 per month don't have to pay. They state flatly that the Carter proposal would turn the program into another giveaway project.

The Carter proposal on food stamps is just one segment of policies which are designed to overhaul the nation's welfare system. Last Monday Carter proposed a total overhaul of the U.S. welfare system.

Calling the system "worse than we thought," and that the present welfare programs should be scrapped entirely and a totally new system implemented, Carter promises to have legislative proposals to implement the new system by the first week in August. He will be consulting first with legislative leaders in each of the 50 states.

As with the food stamp program, the White House maintains that the proposed new system won't cost any more than the present one, which is now budgeted at $23.6 billion for fiscal 1978.

"If the new legislation can be adopted in early 1978, an additional three years will be required to implement the program" Carter said. His plan is to replace the present system with programs which will provide jobs for those who can work, cash for those who can't and income tax credits for the working poor..

The President also favors reducing local and state expenditures for welfare programs, but is stopping short of a complete federal take-over. The programs should be simpler and easier to administer," the President said at a news conference, "and there should be incentives to be honest and to eliminate fraud."

Under present programs, it actually pays some families to go on welfare, or for the husband to leave his family. In some cases, the differences in income can amount to more than $1000 per year.

Steppingstone Museum opens today

STREET, Md. - Steppingstone Museum in Harford County, Maryland, located at the corner of Rt. 136 and Macton Road, midway between Dublin and Whiteford, opens today for its eighth season.

Stepping stone Museum is a unique Harford County institution, the largest and most active museum in the county devoted to our country's past. It was founded by the late J. Edmund Bull "that we shall remember where we came from and that we shall be able to look intelligently into the future".

It is a non-profit organization dedicated to the preservation of rural arts and crafts of the nineteeneth and early twentieth century and is operated and staffed by volunteers, members of the Steppingstone Museum Association.

Five buildings house a collection of over 14,000 artifacts and depict how our forefathers lived and worked a hundred and more years ago. There are rooms arranged as a turn of the century rural home and shops which contain the tools of the old-time broomaker, joiner and wood turner, leathermaker, plumber, tinsmith, cooper, slater, spinner, weaver, and other crafts.

The architect's office and carpenter's tools are from the original collection of the founder, Mr. Bull. A scale model of a nineteenth century barn shows methods of construction and materials used.

One building has a doll collection and toys of years ago as well as displays of quilting, lace and other fancy-work of the housewife. There is a traditional blacksmith shop where periodic demonstrations are given.

Steppingstone Museum is open Saturday and Sunday, 1 to 5 p.m., May to mid-October, with members of the Association on hand to guide visitors through the various buildings and exhibits. Visitors to "Steppingstone" make a small donation to help defray operational costs of the museum.

My Thoughts

And welcome to them

By JOANNE SPAHR
Associate Editor

Some people have ceramic elephants, marble balls on pedestals, or even fancy lamp posts decked out in flowers to accent their well manicured lawns, but on the farm, we have grape arbors adorning the yard (which I sometimes mow, so at those times it's more scraggly than well manicured).

Personally, I like our choice of paraphenalia the best.

When I was a small child, all three of the rather large pole supports were dressed to the hilt with grape vines. And, every Fall they dangled the luscious, juicy purple grapes, which I used to squeeze between my thumb and forefinger to propel the gelled green, sweet interior into my mouth. There's nothing that can spoil an appetite better than sweet purple grapes just before dinner.

The time did come, however, when the stalks got just too old to keep producing the lavender scrumptious jewels, and the arbors slowly defoliated to show the heavy wire supports underneath. But, that didn't daunt my spirits any. Just like a child who finds her dream castle in a deserted, run down old "ghost house," I made the culinary misfortune into a rare find.

Although I never had all the gymnastic equipment like my town friends, I made up for it with the arbors, on which I learned to "skin the cat" and climb around. It was great - when it came to the parallel bars in gym class, I led the way.

Then came my downfall. Mother decided that she was going to have "something just for pretty" growing on the arbor, and planted a wisteria stalk. At first, it only kept me from climbing around on one end, but then it started to take over, and eventually pushed me right off the arbor. Fortunately, my interest in skinning the cat waned at the same time the wisteria got greedy for the whole structure so we were all happy.

And today, as I look at the peaceful, grapelike bunches of flowers, and smell their sweet calming scent, I'm more than glad that I had to give up the grape arbor to the wisteria. Each May, their beauty signals the coming of a lovely summer-something a ceramic elephant could never do.

Pre-emergence tank-mix controls grassy and broadleaf weeds without carryover
Banvel®+Lasso®*

a giant first step toward total weed control in field corn
Successful on millions of acres where corn is the major crop, the Banvel + Lasso herbicide combination can give you "near perfect" control of a wide spectrum of grassy and broadleaf weeds, when used according to label directions.
Banvel + Lasso herbicide is compatible with most fluid fertilizers. It needs no incorporation. There is no carryover.
Take a giant step toward total weed control. Call about the Banvel + Lasso combination. Remember, the "near perfect" herbicide is the one you build...starting with Banvel herbicide...from Velsicol.

*The combination is effective on all major soil types, except light sandy soils. Lasso is a registered trademark of Monsanto Company.
To achieve best results, be sure to read, understand and follow the label.

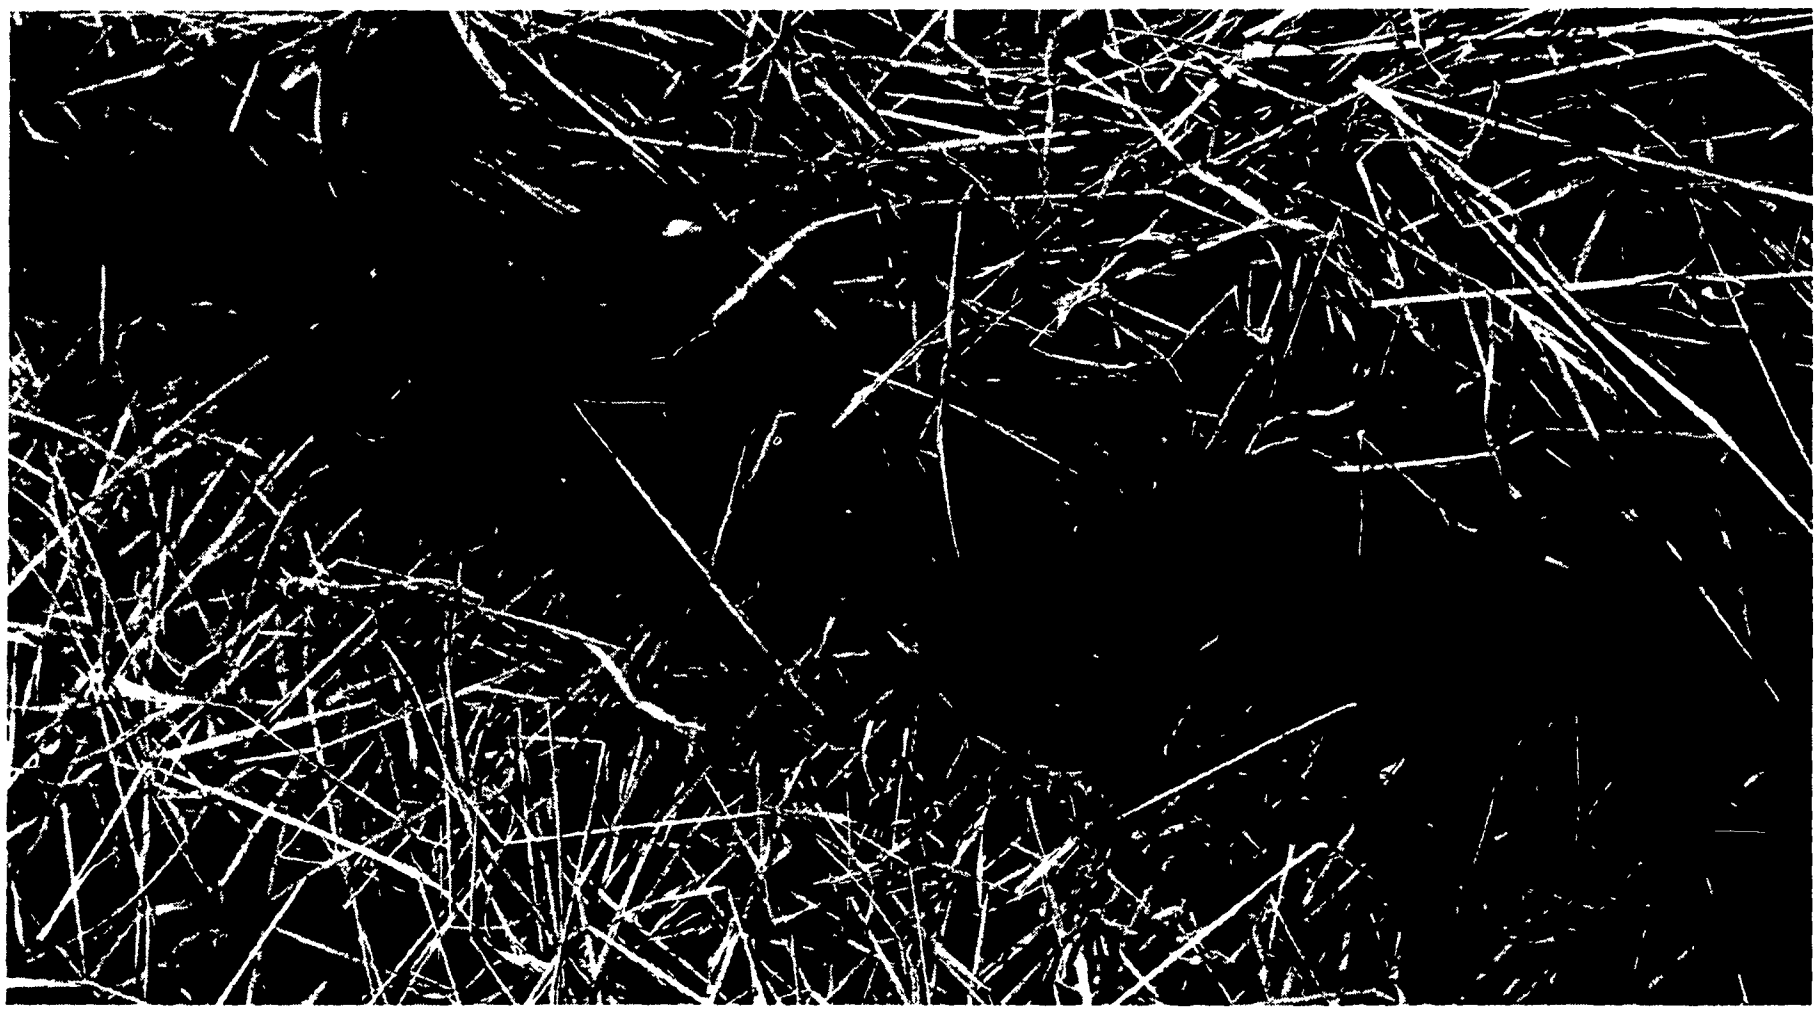
For post-emergence weed control in No-Till Corn

BANVEL® Herbicide

A Much-Needed "Success" Ingredient...



One of the major obstacles to successful No-Till corn production . . . tough, resistant, late-emerging broadleaf vegetation . . . can be overcome with Banvel herbicide.

Banvel® (dicamba) is a translocating herbicide. It is absorbed by broadleafs through roots, stems and leaves. It circulates throughout the plant, destroying growing tissue as it goes. Banvel is very effective against hard-to-kill perennial broadleafs as well as such weeds as Canada thistle (seedlings), morningglory, pigweed, lambsquarters, ragweed, annual clover. Tank-mixed with atrazine, Banvel takes care of horsenettle. Combined with 2,4-D it even knocks out the super-tough velvetleaf.

Banvel is not a contact, quick-knockdown herbicide. It may require several days to bring certain tough weeds down. But, because it kills from within, it does its job thoroughly.

Late-germinating broadleaf weeds and volunteer vegetation from previous cropping need not lower your corn yield. Use low-cost-per-acre Banvel herbicide to control them. At your ag chem dealer's.

Important: Before using any pesticide, read the label

Housewife wants fewer frills, and more food per dollar

By JERRY WEBB
University of Delaware

Consumers may not be very happy about food prices, but at least thev're not blaming farmers. That's the consensus of a survey just released by the Agricultural Council of America. The Council distributed questionnaires nationwide in 1976 to farmers and consumers as part of a national tour. Responses indicate a growing unhappiness with the food marketing system but not with the farmer.

Five out of seven consumers who answered the questionnaire said they were dissatisfied with prices they pay in the supermarkets. Six out of seven said they want more price competition in supermarkets and they also said they're not happy with the frills, packaging and conveniences added to so many supermarket items.

Most consumers prefer to blame the middleman and inflation in general rather than the farmer for rising food prices. They appealed for less variety, less packaging and preservatives, and better prices. In an effort to deal with a shrinking food budget, consumers said they are turning away from the high-priced, fancy-packaged convenience items in favor of the basics.

Responding to the survey, they said they want more direct buying. To them that meant going directly to the farmer for fresh, unadulterated foods with less service for less money.

Perhaps consumers haven't demonstrate this in their supermarket buying habits, but at least they're saying it when asked. They want less frills and more food for the dollar. As one consumer put it, "We don't need 50 kinds of cereal."

Supermarket management over the years has proven to be very sensitive to the buying habits of food shoppers. If there are 50 kinds of cereal on the shelf, it's because consumers have been willing to buy that many different kinds. In many instances, they have insisted on a wide variety. So it's really not fair to yell at the store manager because he stocks four or five thousand different grocery items. Experience and his sales volume have told him what consumers really want in spite of this most recent survey.

So if consumers do in fact want less frills, they're going to have to demonstrate it in their shopping carts. If they buy fewer convenience foods, more bulk items and simpler packaging, store management will qucikly get the message.

The Agricultural Council also talked to the consumers about farm exports, only a slim majority of consumers agreed with them. The survey found farmers in the awkward position of strongly favoring exports but being against the "subsidized imports" as they exist today. On the other hand, consumers who favored farm exports also favored farm imports.

That's a tough question to deal with in a survey, since it's so complicated and since it's hard to get at the real issue of subsidy. Many agricultural interests would argue that a lot of imported food items are subsidized while exported food items are in many instances penalized. They feel that's unfair. Others want a free market, what ever that is, and still others want to export farm goods but almost totally restrict any incoming farm produce.

The U.S. finds itself in an enviable position of being a multibillion dollar food exporter. We provide a large volume of basic food items for a growing world population. On the other hand, we tend to import those specialty items, including coffee, that just won't grow here.

Consumers find it difficult to see U.S. food sent to foreign nations at what they feel are bargain prices while their supermarket bills continue to go up. Perhaps they forget the foreign goods they buy and what this does to our balance of trade. We must sell something abroad if we're going to buy so much, and food seems to be about all we have for sale that foreign countries want.

Also, it must be remembered that we produce so much more of the basic food items such as soybeans and wheat than we can possibly use, so exporting is not a question, it's a requirement.

Milking contest for goats set

GLOUCESTER, N.J. -- The Garden State Dairy Goat Association of New Jersey has set June 5 for it's DHIA milking competition to be held at the Gloucester County 4-H fair grounds.

This is an opportunity for small herd or single goat owners to earn a star milker certification for their animals. The milking competition is open to all goat owners.

Animals must be at the fair grounds prior to the 7 p.m. pre-test milkout on June 4. For information and fees, please contact Anna M. Hartman, R1, Box 486 G, Stockton, N.J. 08559. Phone 609-397-0579.

The Garden State Dairy Goat Association meets monthly with programs designed to help the new goat owner as well as the more experienced. The next club meeting is May 15, 2 p.m. at the Somerset County 4-H building on Milltown Road, Bridgewater, N.J. All are welcome to attend.

IGA Supermarket, Dillsburg, Pa

P S The 2nd Month Show Greater Savings.

YOUR ANSWER IS "THE STEDI-WATT"

1 THE SEDIWATT STOPS SURGES
2 EQUIPMENT OPERATES MORE EFFICIENTLY.
3 LIGHT BULBS LAST LONGER.
4 VALUABLE ELECTRICAL EQUIPMENT IS PROTECTED.

STEDI-WATT HAS CONQUERED A SERIOUS PROBLEM ..."SURGING".

Practically every electrical service, whether it's your home, your farm, your business, etc., suffers from "voltage surges".

Surges are largely produced by your neighbors' electrical equipment cycling on and off. Your own equipment is also a major cause of surging, or when lightning strikes near power lines.

Surging causes most electrical appliances or devices to operate quite inefficiently.

This causes wasted kilowatt hours of electricity, as well as undesirable side effects!!!

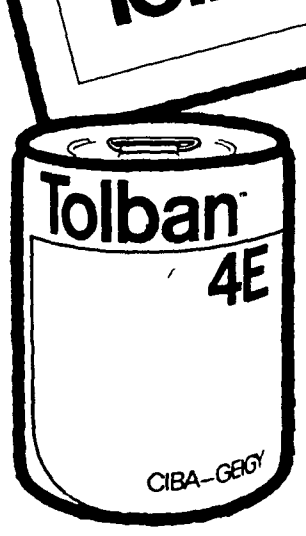
CONTROL WEEDS IN ALFALFA AND SOYBEANS

Introducing Tolban™



The preplant herbicide that won't hold back your beans.

A cold, wet spell soon after soybeans come up is enough stress for your crop to contend with. The last thing it needs is added pressure from a herbicide.

Tolban has excellent crop tolerance even when it's cold and wet. So your beans take the cold, wet weather better.

Tolban gives you consistent control of most annual grasses. And some broadleaf weeds.

See us about Tolban. Find out for yourself how it can help your beans start strong, and finish clean.

Peach grading switch proposed

WASHINGTON, D.C. - The U.S. Department of Agriculture has proposed a revision of its canned clingstone peach grade standards to update grading procedures and to eliminate alternate grade names for canned clingstone peaches.

The proposed new grading procedure, based on a statistically determined attributes standard, was suggested by the Canners League of California. The attributes concept calls for classifying quality defects according to severity, using the categories of minor, major, severe, and critical. The number of defects in individual samples may not exceed specified limits, in each of these categories, for each grade. The attributes concept would replace the current system of numerically scoring quality factors on a 100-point scale.

The proposal would provide for two separate inspection plans - one for fixed lot inspection after production, and another for on-line inspection during production. Both procedures would require the same quality levels for each grade.

USDA would retain the three grades, U.S. Grade A, U.S. Grade B, and U.S. Grade C for canned clingstone peaches. However, the descriptive terms Fancy, Choice, and Standard would be dropped as alternate quality grade terms, in line with the Food Safety and Quality Service (FSQS) policy to standardize grade terminology for all canned and frozen fruits and vegetables.

Minimum size requirements for peach halves and quarters would be eliminated, since size does not affect eating quality. In addition, maximum size variation requirements for Grade C whole peaches, halves, and quarters would be dropped from the standards. Size variation requirements would be retained for Grades A and B but they would be changed from a weight basis to a diameter basis.

The proposal was scheduled for publication in the April 28 Federal Register. Copies also are available from Food Safety and Quality Service, USDA, Washington, D.C. 20250.

Interested persons have until March 1, 1978 to comment on the proposal. Written comments should be sent in duplicate to the Hearing Clerk, Room 1077-S, USDA, Washington, D.C. 20250, where they will be available for public inspection.

Beware of 'farmers lung'

FLEMINGTON, N.J. - Joseph J. Soporowski, Jr., specialist in Environmental Sciences at Cooke College, points out that there is a lung disease that primarily affects farmers. A disease called "Farmers lung", comes from continuous breathing of the spores from moldy hay. Some are more susceptible than others. The disease is an allergic reaction. Some people develop it after long time exposure to dust from moldy hay.

The worker exposed to moldy hay for several months or years, depending on the individual susceptability may notice the following symptoms for to six hours after being exposed to hay mold spores; 1 - increased coughing and bringing up more mucous than usual. 2 - fever and sometimes chills. 3 - shortness of breath. 4 - Discomfort in the lungs and tightness or pains in the chest. This problem develops primarily from handling hay in an enclosed space without good ventilation. The first preventive of course is to avoid producing moldy hay, a second would be to handle it out in the open so that the dust is not inhaled. If you notice symptoms of this sort it would be well to consult your family physician, advises Hunterdon County Extension Agent William McIntyre.

Summer Day Camp in Reading
June 27 to August 5

Beginning this June, I will be conducting a summer day camp for six to nine year old children on my farm in Northern Lancaster County. Different from most day camps, this one will have an educational purpose as well as a recreational one. The children will be given the opportunity to continue their reading development over the summer months. I hope to use each child's natural desires to be out-of-doors and to be active as motivation for maintaining and enriching his reading skills.

Facilities are available for indoor activities on rainy days making it possible for the program to be continued Monday through Thursday regardless of the weather.

If you feel your child might enjoy and benefit from this type of experience, and you would like additional information, please write to the address below.

Camp Director, **Karen S. Fry**, Certified Reading Specialist

Lancaster County Extension Agent Max Smith, left, and farmer David Buckwalter, Lititz, discuss the costs of beef cattle feeding and marketing, while a movie camera from WGAL-TV zeroes in on their conversation. A half-hour program on beef and hog production will be aired next Saturday evening, 7 p.m. over the Lancaster television station.

Farm story

[Continued from Page 1]

opinions from these farmers in relation to the future of their industry and of problems they foresee in the future, and on the preservation of farmland. We want to give the farmer an opportunity to impress upon the consumer the value of food in our country today."

Since "Out on the Farm" is a program tied with the Cooperative Extension Service, it is not eligible for funding from sponsors. Consequently, the Lancaster television station is presenting the 30-minute shows as a public affairs issue. As far as is known, it is the first show of its type in the Capital Region of Pennsylvania and possibly the entire state. Smith has hopes and plans for more shows later this year or early 1977 once the current series is exhausted at the end of this month. "We want to feature farmers for the benefit of the consumer," the county agent affirmed.

Smith also points out that he would welcome questions from subscribers to Lancaster Farming in order to have even more complete input into upcoming shows. He may be reached by calling (717) 394-6851 or by writing to the Cooperative Extension Service, Farm and Home Center, 1383 Arcadia Road, Lancaster, Pa. 17604.

Having a program such as "Out of the Farm" broadcast over television is an idea Smith envisioned several years ago. "We need to stress the role of agriculture in our community ... show the problems and activities of farmers," he commented.

Another point Smith hopes to clarify through the show is that the increasing costs of food do not necessarily mean that the farmer is making a lot of money. "We want to explain the costs which are added on between the producer and the consumer," he emphasized.

Response to the program has been favorable so far, according to Smith. People from town have found the show to be interesting because it's telling them facts they don't normally have access to.

Task Force set up to study Blue Shield

HARRISBURG, Pa. - State Health secretary Leonard Bachman recently launched his program toward implementing the Department's task force on Pennsylvania Blue Shield regulation, and at its first meeting outlined the basic responsibilities of the group.

"Blue Shield is a non-profit corporation and enjoys special privileges and tax exemptions," Bachman said. "It is not just another health insurance carrier."

Because of it's unique status and its special privileges, Bachman said "it has a high degree of accountability to the public which it serves." Bachman said that he has created this task force of physicians and consumers to help define what the Department should be doing to improve quality of care for the 6.4 million Blue Shield subscribers.

Stephen Male, director, Division of Health Insurance Development, clarified to Lancaster Farming in a telephone interview that the department is not investigating Blue Shield for any other reason than to improve on present policy.

Up to this time, the Insurance Department had regulated Blue Shield, although the Department of Health had a statutory responsibility since 1939. The Insurance Department was more concerned with the fiscal aspects of the policy, whereas the Health Department will concern itself with the quality of the care given.

The new task force is composed of six physicians and six consumers, with consultant services available from experts in health care delivery and financing as well as Health Department staff.

Bachman charged the task force with the responsibility to:

-review Blue Shield's programs and practices, particularly quality assurance and utilization review and recommend ways in which they might be modified to improve the quality of care being rendered subscribers.

-review Health Department authorities under the "Blue Shield" Act and recommended how the Health Department should utilize them.

-recommend ways in which the Insurance Department and Health Department might better interact in joint regulation of Blue Shield.

-recommend legislative changes.

-review Blue Shield benefit programs and recommend ways in which the benefit structure might be used as an inducement for change in the health care delivery system.

Alternative to landfill found

UNIVERSITY PARK, Pa. - Solid wastes can be economically recovered and used as fuel and scrap, said Mark Luttner during an American Agricultural Economics Association meeting at Pennsylvania State University last year. Luttner is a U.S. Environmental Protection Agency economist.

Conducting a case study in Orrville, Ohio, Luttner and Fred Hitzhusen, resource economist at The Ohio State University, concluded that it was possible for Orrville, with a county population of 87,000, to economically modify an existing coal-burning boiler to burn refuse as an alternative to landfill dumping.

Resource recovery, until recently has been viewed as economically feasible only in large urban areas where there is high quantity waste generation. Now, it's being recognized that some smaller communities can practice resource recovery economically if their system includes the recovery of energy from refuse.

Small municipalities must have existing power plant facilities capable of burning processed refuse in the power-generation process. By burning refuse in an existing plant, the process uses an established system for producing and distributing electricity.

The desirability of a resource recovery system increases if a community's landfill area is limited, if coal prices are rising and if the area can generate 100 to 200 tons of refuse per day. A side benefit is reduction of the sulfur emission level by burning refuse with coal.

There is only one non-metropolitan application of a resource recovery system in the U.S., located in Ames, Iowa. But results from the Orrville study have prompted a further study of approximately 163 coal-burning boilers in 12 north central states, North and South Dakota, Nebraska, Kansas, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Michigan, Indiana, and Ohio, to determine the extent to which resource recovery systems may be put to use. The study conducted by Hitzhusen and funded by North Central Rural Development Center at Iowa State University, is to be completed by September, 1977.

Phosphate mine opened

NEW YORK, N.Y. - W. R. Grace & Co. has announced the start of production at its Hookers Prairie phosphate mine near Bradley, Fla. where it has a 50 million ton phosphate reserve. The mining operation will increase Grace's phosphate rock production by 8,000 tons per day, or 2.8 million tons annually, to a total of 5.1 million tons per year, to meet the increasing demand for fertilizer by the American farmer. Phosphate rock is an essential fertilizer ingredient.

Approximately one half of the phosphate from the Hookers Prairie Mine will be used by Grace's previously-announced $30 million phosphoric acid facility-a joint venture with U.S. Steel-producing 380,000 tons per year when it becomes fully operational next year.

To mine the 7,000 acre tract Grace installed a new dragline-the largest currently in use in Florida mining-capable of excavating 65 cubic yards of material in one scoop. As mining progresses, the mined out areas will be reclaimed and made available for residential developments, recreation areas, pasture and highway beautification. Over the years Grace has reclaimed more than 2,500 acres in Central Florida.

Grace's total primary and secondary reserves of phosphate rock in Florida are 300 million tons. The company estimates that these reserves will sustain production at current levels for about 50 years. Grace is also a major producer of nitrogen-based fertilizer materials with ammonia plants at Memphis, Tenn., Big Spring, Tex. and on the Caribbean island of Trinidad. Later this year the company will bring on-stream two additional 1,200 ton-per-day ammonia plants; one at Woodward, Okla. which is 50 per cent owned by Grace and the other in Trinidad, in which Grace has a 49 per cent interest.

Chicken is extraordinary animal

By WILLIAM G. McINTYRE
Senior County Agent
Hunterdon County, New Jersey

FLEMINGTON, N.J. - As a meat and egg producer, the chicken is an extraordinary animal. The modern bird produces an average of 230-240 eggs a year. Twenty five years ago it took seven pounds of feed to produce a dozen eggs. Today we only need four pounds.

In growing broilers, it takes only seven to eight weeks and about eight pounds of feed to bring the modern broiler to marketable size, about four pounds. It used to take almost twice that time and almost double the feed years ago.

Research and the application of new found knowledge in breeding, feeding, and management make this possible.

Thanks to research, the modern poultryman knows a lot more about balancing the feed requirements for egg and meat production. For example, the New York State researchers reported that hens layed significantly more eggs, if they're put on an unusually low calorie diet for some time before they are ready for egg production. The switch from the normal diet to a low energy diet at a given point during the rearing period results in 12-13 more eggs per hen.

Better nutrition, thanks to research is improving the shell strength. Another Cornell study found that diets containing less phosphorus than normally recommended improves the shell strength of eggs.

Who benefits from this kind of research? We all do. Forty years ago the broiler was the luxury item on the menu. Today, thanks to the tremendous strides made by the broiler industry and the researchers behind it, chicken is a relatively inexpensive source of protein in our diet.

Ham facts available

BOISE, Idaho - "Facts About Ham," a new consumer pamphlet from the Pork Industry Group of the National Live Stock and Meat Board, is being distributed.

"Facts About Ham" joins the Meat Board's "Facts About" series of publications which already cover pork, beef, lamb and various meat products.

"This folder gives consumers all the basic information on ham, including how to buy, store, cook and serve it," said Verlo Butz, vice president of the Meat Board's pork program.

"Included in the pamphlet is a brief history of ham, one of our oldest processed meats, and a description of the various ways ham can be purchased," he said.

PIG has sent promotional copies of "Facts About Ham" to newspaper food editors, retailers, food-service operators, meat packers and other industry groups.

A single, free copy of "Facts About Ham" may be obtained by sending a business-size, self-addressed, stamped envelope to: Pork Industry Group, 444 North Michigan Avenue, Chicago, Ill. 60611.

"Facts About Ham" also can be ordered in quantities. Prices are: up to 99 copies, 10 cents each; up to 1,000 copies, $5.90 per hundred; more than 1,000 copies, $35 per thousand.

Poultrymen asked to exercise caution

By JOHN HOFFMAN
Executive Director
Pennsylvania Poultry Federation

HARRISBURG, Pa. – The poultry and egg industry as well as all of the agricultural community should exercise caution in their effort to be heard on the matter of the publication of **Dietary Goals for the United States.** As executive director of the Pennsylvania Poultry Federation, I, of course, participated in the letter-writing campaign on behalf of our industry and made several personal calls to Senator Schweiker's Washington office, Senator Schweiker having served on Senator McGovern's Committee. I strongly approve of this effort, but I also recommend that we stay out of the general news media on this issue. There is a danger we could give this report notoriety. I'm aware of the government's claim about the popularity of this document, but the term popular with the Government Printing Office is a misnomer with regard to its per cent of the total population. You may well ask yourself when, as a private citizen, you last sent for a government publication on anything from the hundreds of thousands available! I can assure you that this document will not be read by millions of American consumers - not even thousands! It will, of course, be widely read by the professional communities such as physicians and nutritionists as well as those directly affected such as agriculture. But reference to a government publication is not likely to change the American lifestyle. However, since the document does give some kind of official credence to one point of view while ignoring a contrary point of view, agriculture must protest - but quietly! There are those who contend, right or wrong, that the egg industry put the words cholesterol and eggs together for the American public with all their clamoring. So far only the beef industry has been publicly associated with the **Dietary Goals for the United States.** Let's keep it that way. We must keep the ultimate impact in proper perspective so that we don't add to it. I often ask myself if the cholesterol controversy hurt the egg industry as much or more than a change of eating habits, why aren't there more empty cereal bowls sitting at tables in restaurants in the morning? All I ever see is dishes stained with egg yolk. So, let's get on with the battle with the Senate Select Committee on Nutrition and Human Needs, but let's not tell anybody we're doing it!

Maple syrup standards reviewed

WASHINGTON, D.C. - The U.S. Department of Agriculture has proposed to revise U.S. grade standards for maple syrup for reprocessing. USDA invites comments on the proposal until April 1, 1978.

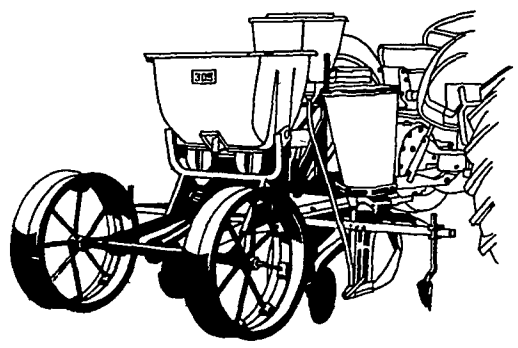
In an earlier proposal published in the Oct. 28, 1975 Federal Register, USDA had proposed to combine the two sets of grade standards. However, according to officials of USDA's Food Safety and Quality Service (FSQS), comments received on the first proposal indicated that there is no need for U.S. grade standards for syrup intended for further processing.

Under the proposal, USDA would retain only two grades, U.S. Grade A and U.S. Grade B, for maple syrup. The 1975 proposal provided for U.S. Grades A, B, C, and D to cover the range of quality, including color of the syrup. Maple syrup packers said current sales indicate that consumers prefer syrup in colors ranging from light to dark amber. The present proposal would provide for a U.S. Grade A product in a choice of light, medium, or dark amber. U.S. Grade B would include syrups darker than dark amber. USDA uses color guides to evaluate the shades of syrup.

To qualify as U.S. Grade A, the syrup would also be required to have a good characteristic maple flavor and be practically free from off flavors and odors as well as from any defects that affect edibility or shipping quality. U.S. Grade B syrup would have similar requirements to Grade A but less strict.

xxx

Anhydrous ammonia is a potent fertilizer - its ability to increase crop production is well known. Not so well known is that splashed in the eyes, it can cause total blindness in a matter of minutes.



2-ROW 309 PLANTER

309 PLANTER

- Versatile 309 comes in 2-row units—can be toolbar mounted to make 2, 4-row planters.

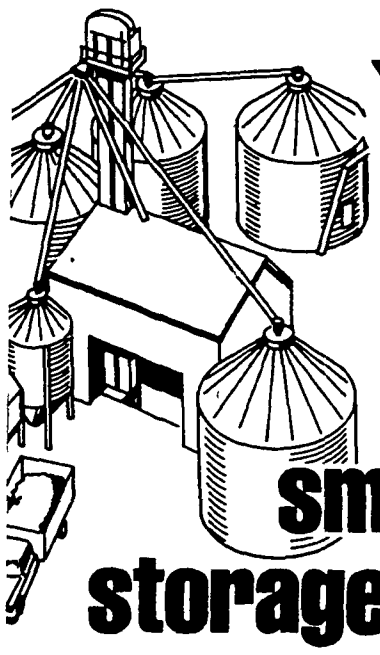
LANC. CO'S OLDEST FORD DEALER

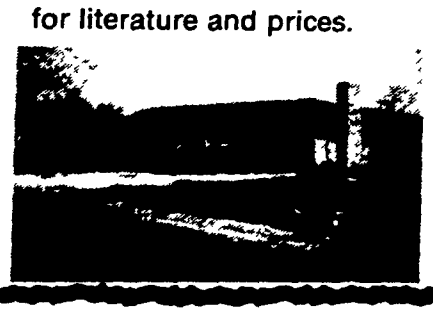
NOW is the time to PLAN, Budget and Select YOUR STORAGE, DRYING and HANDLING SYSTEM.

BAZOOKA® Feed/Grain Movers give you a long lasting, smooth running storage system.



Bazooka augers offer a wide range of capacity, choice of drives and accessories for automated grain and feed handling. These matched components make a system that can be expanded. You can be sure the system we design and install will move your grain or feed smoothly, safely . . . and for a long, long time.

In addition to Bazooka Portable augers, we can furnish high-capacity 10" unloading systems for bins to 48 ft. diameter and the new Model GC 101 GRAINCLEAN'R (scalper with cleaner and built-in fines collector). Call for literature and prices.



GRAINCLEAN'R™

BAZOOKA® Model GC101

- Scalps and cleans corn, milo, soybeans, wheat or rice to improve grade and storability.
- Fully enclosed to prevent flying chaff, help control dust and give weather protection.
- 56 sq. ft. of screen can remove 80% of fines in dry corn at 500 bu/hr . . . up to 2000 bu/hr capacity.
- Can be equipped with trailer undercarriage, tow bar and 6" or 8" fill auger which swivels beyond 180° and rides on top of cleaner during transport.

War on brucellosis declared

PARK RIDGE, Ill. -- Recommendations by the American Farm Bureau Federation (AFBF), beef cattle and dairy advisory committees for stepped up research and an aggressive control program to hasten the eradication of brucellosis in the U.S. have been approved by the AFBF board of directors.

Acting on the approved recommendations, AFBF has requested that appropriations for the jointly funded state-federal eradication program include adequate funds for indemnities to encourage the complete depopulation of beef and dairy herds under quarantine because of brucellosis that cannot be quickly cleaned up by test and slaughter procedures.

Action also has been requested for strengthening the milk ring test to identify reactors in dairy cattle.

Support has been given for indemnities for exposed S-branded cattle that are not returned to the farm or ranch and for expansion of the calfhood vaccination program with federal funds providing the vaccine and administration where it is most needed.

AFBF has requested that states with approved eradication programs not be limited to the current 60 per cent federal funding participation.

Additional research has been requested for the development of a more effective vaccine than Strain 19 now in use which can be administered to both young and adult cattle; for creation of a test to determine the difference between cattle with a suspicious reaction and those with brucellosis; and for the improvement of surveillance procedures for identifying infected herds.

Other committee recommendations approved by the AFBF board and upon which action has been requested include: strict monitoring of the use and distribution of Strain 19 vaccine; use of adult vaccination in herds under strictly controlled conditions; establishment of an alternate position on the animal for placing the S-brand used to identify suspect animals; prosecution of veterinarians who illegally screen brucellosis infected cattle; and enforcement of state-federal regulations in intrastate and interstate movement of cattle.

Sharing ideas on local government issues during a special legislative breakfast at State 4-H Capital Days in Harrisburg April 18 and 19, are, from left: Cindy Balmer, Hegins; Senator Joseph Gurzenda; Julie Drumheller, Nuremburg; Representative William K. Klingaman; Joan Wydock, Nuremburg; Representative Edward Helfrick; and Chris Balmer, Hegins. The two-day event was designed to give 4-H members a working knowledge of the functions of state government which is part of the youth citizenship program.

Waste reported in poor countries

UNIVERSITY PARK, Pa. - Inadequate transport and storage systems for agricultural commodities is a major cause of waste and high costs in many developing countries, said Richard Meyer and Charles Wright during the annual meeting of the American Agricultural Economics Association at Pennsylvania State University last year.

Meyer and Wright, agricultural economists at The Ohio State University, argued that inefficiencies in local agricultural commodity markets prevented some countries from economically competing in world markets. International loans are now helping several countries finance major new construction and upgrade existing transport and storage facilities.

To properly plan investments in new or improved facilities, it's necessary to analyze alternative projects. Meyer and Wright presented a model to estimate the costs and benefits of investments in various segments of a transport and storage network. The model is designed to determine the least cost combination of facilities for the major crops grown in southern-Brazil.

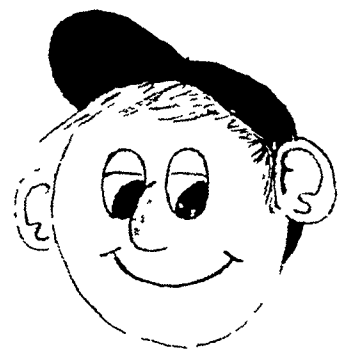
Nixnutz's Corral

By BARNEY NIXNUTZ

"All the news that's unimportant, but still interesting."



Quick switch

A farmer from Georgia moved up North last January with all kinds of management ideas for his new environment. He even made promises of how he was going to cut costs here and there. One of them was to cut his staff at his home by one third. At last count, however, he has 608 people working for him, instead of the targeted 357. His predecessor at the sprawling estate had 510 on the payroll.

Wrong number

You would think that with a last name like Krieg, the editor of this newspaper would have a slot all for himself. But that's not so. Yes, there are other Kriegs around -- immediate relatives in Florida, and North Dakota, but lo and behold, there are more still. This week it came to the editor's attention that a family in Lancaster has the same last name and they aren't even related to Dieter Krieg. Now, the point of this message is, if you're trying to call the editor at home, forget about Lancaster phone numbers. That's the wrong person and the wrong number. You'll have better luck checking the Lititz listings.

Money for us

Most folks may have never realized it, but this past Wednesday marked an important day in the lives of every tax-paying American. The Tax Foundation, a private organization, dubbed May 4 as "Tax Freedom Day."

The national organization of taxpayers figures that as of that day the average American taxpayer will be earning money for himself. Up until then, every working day of 1977 was for the glory of the powers that be in Washington, Harrisburg, and city hall.

Figured another way, the Foundation reports that the average worker spends 2 hours and 42 minutes of an 8-hour working day earning money to pay his federal, state and local taxes. Of that time, an hour and 44 minutes worth of wages go to the federal boys in Washington, while 58 minutes worth of earning power goes to the state and local level.

Hardly anyone forgets what April 15 is significant for. Might it be high time to remember May 4?

Poor soil

Lancaster County farmers are envied most every place you go. One gentleman who farms a good distance to the north of the Garden Spot, for example, described his soil as consisting of "two stones for one dirt."

Broken rules

While you folks out there have been spending money and losing sleep over how you're going to comply with OSHA regulations, the boys down in Washington have found themselves amidst 4000 violations of the Occupational Safety and Health Act. But they aren't doing anything about it. You see, they're exempt. Congress, in passing the Act, had exempted all federal workplaces, and the $16,000 worth of fines are going to be overlooked.

Crabgrass can be controlled

FLEMINGTON, N.J.- Crabgrass probably causes homeowners more grief than any other lawn weed.

New seedlings, germinated from last year's seeds, begin to infest lawns early in May. High temperatures, abundant moisture and a liberal application of nitrogen fertilizer contribute to its rapid growth, says Henry W. Indyk, extension specialist in turf management at Cook College, Rutgers University.

But it is possible to have a crabgrass-free lawn with not too much effort on your part.

The condition of the lawn itself is the first line of defense against crabgrass. If you have a dense and vigorously growing lawn, crabgrass hasn't a chance of getting a foothold.

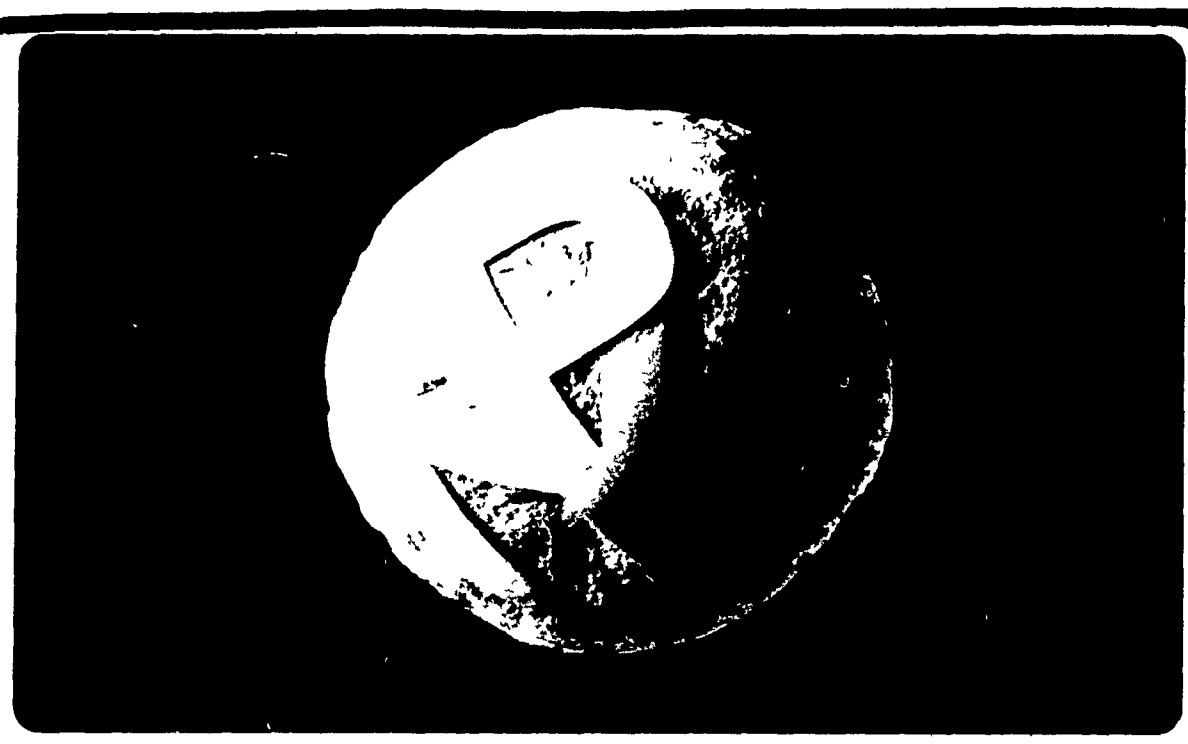
Lawn care practices that contribute to an attractive lawn are the same ones that can control crabgrass. Attention must be given to liming, fertilizing (adequate but not excessive), mowing at a height of 1½ inches, watering only once a week and only if necessary, and pest control. Neglect these practices and you've issued an open invitation for a crabgrass invasion, Dr. Indyk cautions.

Crabgrass can be controlled by chemicals. The trick is to apply the chemical early in the Spring before the crabgrass seeds germinate. This is called preemergence control. A good rule of thumb to go by is to apply the chemicals before the first week in May.

You can get satisfactory results from DCPA (Dacthal), siduron (Tupersan), benefin (Balan), and bensulide (Betasan). Dacthal has the longest record of satisfactory control. Siduron is the only safe material to use on newly-seeded lawns. If you plan to see later in the season you'll have to forego the use of these chemicals. Their long residual effect may be harmful to the new seedlings.

Once crabgrass plants start to grow, preemergence control does no good. Your only alternative is to kill the plant. The methyl arsenates, sold under a variety of product names, are the most commonly used chemicals for this purpose. One treatment may be effective when the plants are young. If more are needed, applications should be made at 7 to 10 day intervals.

This is why it's best to use preemergenc control - less work for you.



Help clinch corn profits with plow-down application of Unipel® 20-10-10 fertilizer.

If you're plowing corn ground this Spring, help clinch this year's yields and profits with a single pre-plow application of Unipel 20-10-10 It's a program proved to get results

Here's why:

1 Unipel 20-10-10 is a high-N complete fertilizer suited to high corn production
2 Each Unipel 20-10-10 pellet is a homogenized, precise, complete 3-course meal.
3 Unipels' uniformity enables precise, uniform spreading Every square foot of your corn field has a good chance of coming in contact with several pellets, each one a complete nutrient package.
4 Each Unipel pellet has quick-acting and long-lasting forms of Nitrogen and Phosphorus for fast starting and continued nutrient feeding.
5. The intimate Nitrogen and Phosphorus combination in Unipels gives up to 50% better phosphate uptake than separately-applied N & P.

The result: You lay big-yield groundwork by providing a sufficient and balanced nutrient supply for every plant, all season long. What's more, you're investing in a proved fertilization program

We recommend Unipel 20-10-10 for basic corn fertilization, because it's a precise complete fertilizer well-suited for today's precise, profitable corn production.

Turkey and pork producers in labeling conflict

By JOANNE SPAHR

WASHINGTON, D.C. - Turkey producers and pork producers are locked into a disagreement right now. The turkey people have a product in the market called "turkey ham" and the prok producers don't like the labeling at all. Because of this, the National Pork Producers Council, Des Moines, Iowa, and the America Meat Institute, Washington, D.C. have jointly asked the U.S. Department of Agriculture not to allow labels such as turkey ham on non-pork products and to propose a regulation on the prohibition for public comment.

The problem, as far as the AMI and the NPPC is concerned is that "turkey ham" doesn't have a single bit of ham in it, and that surveys which the pork groups have taken show that consumers associate ham with pork. Therefore, they feel that the poultry product banks on the hard-won reputation of real ham for its success, while actually being an imitation.

"People like ham" stated Bruce Butterfield, director of public relations, the American Meat Institute, in a telephone interview with **Lancaster Farming**. The AMI is a national trade association for meat packers and processors, which deals mainly with red meats.

"Consumers eat a lot of ham," he continued, "and our pilot consumer attitude survey shows that people think the turkey ham is made of two meats–ham and turkey."

The survey referred to was done by Westat, Inc., Rockville, Md., a market research firm, in February 1977. In four major U.S. cities–New York, Chicago, Los Angeles, and Kansas City–400 consumers shopping centers were shown examples of real ham and "turkey ham" products and labels. The results showed the 91.4 per cent associated the term "ham" with pork or swine. And, the major findings were that consumers believe that "turkey ham" products contain more than one type of meat, and, more specifically, that consumers believe that "turkey ham" products contain both turkey and ham.

Because of this, J. Marvin Garner, NPPC executive vice president, has said the turkey ham label is shown by the survey to be deceptive to consumers, and that the USDA should end "this deception and misuse of the name of one of the pork industry's valued products".

The National Turkey Federation thinks differently.

"We really think that there is no intent to deceive or mislead the consumer," Lew Walts, executive vice president of the National Turkey Federation, said. "The words "turkey" and "ham" have equal prominence on the label, and the ingredient statement is evidence that there is no pork in the product," he explained.

Walts also pointed out that some labeling actually states "contains no pork" on the label.

In rebuttal to the survey taken by the groups, Walts also said that the Turkey Federation has done a survey of its own in six major cities which has shown contradictory evidence to the pork survey.

"Our survey was taken in six cities compared to four, with 2000 consumers compared to 400, and the results are directly opposing," he stated.

The Turkey Federation is not releasing the survey, however, because it will be used in response to a petition filed with the USDA by the pork groups asking that regulations be proposed which would allow the term "ham" to be used in labeling only in the connection with the hind legs of swine, and that it not be used in turkey products.

Up to this point, USDA has defined "ham" as the hind leg of any animal, and as long as the sepcies of the animal precedes the word "Ham" (except in the case of pork) that term may be legally used.

So, legally, the turkey processors are doing nothing wrong.

Because of this, the NPPC and AMI is trying to have new regulations created to stop this. If the petition they filed with the USDA is accepted, the proposal will be published in the Federal Register for public comment.

"Kick" up corn profits with Unipel® Starter Special 13-34-10.

This is the "corn-popper" special...the most imitated pop-up fertilizer on the market As part of a Unipel corn fertility program, it suits perfectly the young corn plant's immediate craving for nutrients to develop a good root system, the starting point for top yields.

Yet, it's also a complete fertilizer with these key nutrients available in each Unipel pellet:

* quick-acting, non-volatile nitrate Nitrogen that starts working immediately, even in cool, wet, early-season soils;
* slow-acting ammonic Nitrogen that provides continued feeding through the growing season;
* both quick and slow acting Phosphorus to resist fixation, team with Nitrogen to become more efficient and feed plants for solid growth, help develop strong root systems;
* vital Potash to furnish young plants with building blocks for strong roots, tough and hardy stalks to resist weather and stress of pests and disease.

We can recommend to you the program details for a sound Unipel fertility program —which, on Starter alone, has returned over $30 an acre above fertilizer investment more than blend "bargain" programs.

Big poultry

[Continued from Page 1]

schedule for the 1977 Pennsylvania Poultry Conference and Annual Banquet will look like . . "a candy store to a six year old." There's even something for those who have been conferenced-to-death. Visitors will be pleasantly surprised with light breakfast-to get the adrenaline flowing-and a two hour buffet luncheon for some personal rest and relaxation.

The conference concludes in the evening with the industry's Annual Banquet, and even it has been changed to correspond to the new image and growing industry. The banquet, in addition to introducing the new president of the Pennsylvania Poultry Federation, will now include some light entertainment. But the biggest change has been with the primary function of the banquet, that of honoring outstanding industrymen. This year, for the first time, three distinguished industrymen will be selected as Broiler Industrymen of the Year, Egg Industryman of the Year, and Turkey Industryman of the Year. For details and registration forms, contact the Pennsylvania Poultry Federation, 500 N. Progress Avenue, Harrisburg PA 17109.

Right to Work group formed

HARRISBURG, Pa. - The formation of a political action committee (PAC) to promote the Right to Work principle in Pennsylvania was announced Wednesday by Albin W. Simokat, vice president of Pennsylvanians for Right to Work.

"This PAC will be an important tool for the Right to Work movement, which is working for enactment of a Pennsylvania law guaranteeing all workers the right to decide for themselves whether they want to join a labor union or not," Simokat said.

"Although public opinion polls consistently show overwhelming support for Right to Work-the latest figure reported by the Roper Organization is 76 per cent in favor-many state legislators have bowed to union officials' demands to ignore the issue because of union help in their elections," Simokat continued.

"A total of 35 of the 48 state senators (two seats are vacant) in the current session of the State Assembly, or almost three out of four, gained election with the assistance of organized labor. In the State House, three of every five representatives were backed by the Pennsylvania AFL-CIO Committee on Political Education (COPE)," the Right to Work leader added.

The Right to Work Political Action Committee of Pennsylvania, as approved by the Board of Directors of Pennsylvanians for Right to Work, "will participate actively in the election campaigns and provide contributions to, and expenditures on behalf of, those candidates for public office in the state who support Right to Work," said Simokat.

Pennsylvanians for Right to Work is a coalition of employers and employees from all walks of life, including union members, who believe that every wage earner should have the right to get and hold a job regardless of union membership or non-membership.

DRY HAY IMPROVER AND APPLICATOR

APPLICATOR FOR IM-PRUV-ALL LH-77
DRY HAY IMPROVER

This applicator is designed for use with IM-PRUV-ALL DRY HAY IMPROVER. By using IM-PRUV-ALL DRY HAY IMPROVER, you can insure better quality hay through saving more leaves. One more big advantage is being able to go to the field earlier in the day and staying later in the evening to bale that quality hay you have grown and would like to keep. Or maybe you will be able to bale the field of hay which just isn't quite dry, but there is a rain coming which is bound to keep you out of the field for a day or two while the rain is washing away your quality hay and leaving you with only second rate hay. The applicator has been designed by a farmer with simplicity and reliability foremost in mind. The unit can be mounted with a minimum of labor and is powered by the 12 volt or 6 volt system of tractor. The switch is located at tractor seat allowing operator to control application at all times. The tank is plastic to insure no corrosion and less damage. The product is sprayed on hay while in throat of pickup before entering bale chamber insuring uniform coverage of material.

Churches to celebrate soil stewardship week

LANCASTER, Pa. - Resource or Soil Stewardship Week, a nationwide observance which emphasizes man's responsibility to protect and conserve soil, water, and other natural resources, will be May 15-22 this year, Aaron Z. Stauffer, chairman of the Lancaster County Conservation District, announced this week.

"This year's theme, 'When We Care', will help each to examine his own motives and actions in the conservation of God's manifold gifts," said Stauffer.

Among the churches in the district that are scheduling special soil stewardship services are: Mechanics Grove Church of the Brethren, St. Mark's Methodist Church of Mt. Joy, Elizabethtown Church of the Brethren, Cedar Grove Presbyterian Church, East Fairview Church of the Brethren, Bethel Mennonite Church, the First Presbyterian Church of Strasburg, and the Hinkletown Mennonite Church.

"We hope," said Stauffer, "that during Soil Stewareship Week. millions of Americans will pause for a moment to consider their responsibilities for the protection and proper care of the Lord's earth."

J. Everett Kreider is chairman of the Lancaster County Conservation District's soil stewardship committee.

The District, upon request, did provide local churches with a reference booklet, bulletins, bulletin inserts, and other materials designed for this year's observance. The material was prepared by the Soil Stewardship Advisory Committee of the National Association of Conservation Districts. The advisory committee is composed of churchmen of various faiths.

This is the 23rd consecutive year that the National Association of Conservation Districts, along with almost 3000 local districts throughout the nation, has sponsored Soil Stewardship Week. The custom of setting aside special "Rogation Days" for this purpose began more than 1500 years ago in France, when French peasants prayed for help after crop failures had brought widespread hunger.

CONSUMER GUIDELINES

Choosing Toys

When buying toys for children, don't buy impulsively Children will enjoy their playthings more if you carefully consider the types of toys that capture

the children's interest Look for toys that provide a variety of play experiences Spread your toy budget throughout the year and don't overwhelm children with too many toys at once

ATTENTION

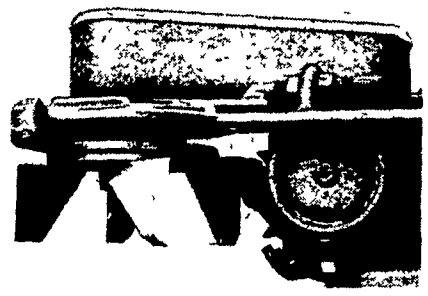
PATZ Silo Unloaders give you two big, lugged drive wheels for sure traction and flotation. Silage is removed evenly with the Patz exclusive self-leveling device. Preset depth control adjustment; "no-load" starting with the PATZ throw-out clutch; and easy lifting, high into the top of the silo for refilling; are additional features of this durable performer. Call us for design matched systems, installation and service of quality PATZ equipment.

...but DON'T STOP with the UNLOADER

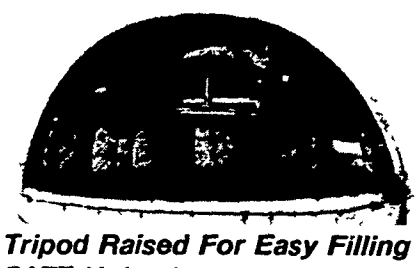
The big capacity of the PATZ Silo Unloader can be design matched to a choice of Material Movers, Conveyors, Conveyor-Feeders or In-bunk Feeders to completely automate your feed handling chores.

Claw-Like, Hardened Steel Gathering Chain
Steel claws and rakers cut and pull apart the hardest packed or frozen silage.



Spring Tensioned Frost Cutter
Four hardened steel, self sharpening blades shear away frozen silage.

Adjustable Impeller Blades
Four impeller blades adjust for close tolerance and efficient silage throwing.



Tripod Raised For Easy Filling
PATZ Unloader prepares easily for raising high into silo top.

Trash costs $1.3 million to Pa. taxpayers

HARRISBURG, Pa. - If a small minority of motorists who insist on littering would stop using the highways as a dumping ground, they could save Pennsylvania taxpayers about $1.3 million annually.

The $1.3 million-about $3000 per day-represents PennDot's cost to remove trash from the highways.

Transportation Secretary James B. Wilson would rather see the money spent for highway improvements.

Wilson said that the problem seems to be getting worse instead of better with the growing popularity of fast foods served in disposable containers.

Littering is punishable in Pennsylvania by fines of $50 to $100 but enforcement is difficult, Wilson said, because violators must virtually be caught in the act and witnesses are reluctant to testify at hearings.

"But we feel it is primarily a problem of education anyway," said Wilson. "That's the reason we started our highly successful Keep Pennsylvania Beautiful Days.

4-H officers elected

The Schuylkill County 4-H Council recently elected officers. They are: first row: (left to right) Jayne Adams, Greenbriar Horse and Pony Club, Secretary; Cindy Balmer, Hegins Valley Trailriders, President; J.J. Joyce, Greenbriar Horse and Pony Club, Vice-president; (top row) Jodi Koury, Greenbriar Horse and Pony Club, Treasurer; and Chris Balmer, Hegins Valley Trailriders, Historian. The 4-H Teen Council is made up of 4-H members who have had experience in 4-H. The purpose of the council is to involve youth in planning and conducting county-wide activities. 4-H is an educational youth program sponsored through the Schuylkill County Cooperative Extension Service of The Pennsylvania State University.

Horse club announces coming events

The Saddle Cinches 4-H Horse and Pony Club has announced its schedule of events for the coming year. On May 14 they will hold a work day at Dan Fellenbaum's, and the list of events for June is as follows: 1-Riders must have coggins test, 17-4-H meeting and demonstration on how to make hay nets, 18-4-H gymkanna. A trip to Cowtown is also scheduled.

On July 23 the club will attend the county round-up at the Lancaster Riding Club, and on August 20 they will take part in the open horse show at the Lancaster Riding club. August will also include a one-day trail ride.

The district horse show is set for September, the state horse show for November, and the 4-H banquet for all members in Lancaster County for December 3.

Crop Report

Rain put fieldwork behind schedule

RRISBURG - Rainfall most of the Com-ealth during the week g May 2 slowed ork progress by far- with only three days as suitable for field-across the state, ac-ng to the Pennsylvania Reporting Service.

l unsettled weather iled across the Com-ealth through Thur-with fair and gradually conditions during the nd. Frost and freezing ratures occurred in sections of the state y and Saturday ngs. The rain helped ve soil moisture es, which were rated stly adequate to sur-

rain forced many rs out of the fields, and g fell further behind year's progress. ng is rated at 68 per complete, almost ten behind last year's 81 cent at this time. ern and central es are at about 76 per ompleted while only 54 ent is reported com-n northern counties. oats crop in the state is ed at 73 per cent sown, ys behind the 85 per sown last year. rn counties stand at 81 per cent sown, central counties report 84 per cent sown and the north stands at about 58 per cent completed. Most reports say the crop is looking good.

Potato planting, at 39 per cent statewide, is about a week behind the 44 per cent reported planted last year at this time. Southern counties stand at 69 per cent completed with some coming through, while central counties report 34 per cent and northern counties 12 per cent completed.

Corn planting moved up to seven per cent complete statewide, about a week behind last year's 18 per cent. Scattered fields are reported planted in the north, with six per cent in central and 12 per cent in southern counties now planted.

Barley and wheat are beginning to enter the boot stage in southern counties. Conditions are reported good for most, with some scattered reports of poor looking crops.

Pastures are rated as providing average to slightly below average amounts of feed. Condition is considered generally good, with more cows being put out to pasture. The week's rain should speed up what had been somewhat slow growth of hay and pastures. There is evidence of weevil activity increasing.

Asparagus is being harvested. Most strawberries have been planted with some frost damage reported.

LET OUR 30 YEARS EXPERIENCE WORK FOR YOU

CONGRATULATIONS TO THE ROHRER'S
For Good Farm Management

When Robert Rohrer decided to make haylage instead of hay, he turned to HARVESTORE.

He tells why:

BOTTOM UNLOADING — "Harvestore was the only one with a proven bottom unloader. Theirs worked best while the others were still experimenting."

SERVICE — "It's available when needed."

OXYGEN-FREE STORAGE — "There's no spoilage. Two independent feed companies tested my haylage last Winter at six week intervals. Both samples were over 19% protein. Haylage in a Harvestore has cut my protein buying requirements."

EFFICIENCY — "I'm spending less time now to feed 200 cows than I did four years ago to feed 40 head. I feed 200 cows in about 15 minutes. Also, haylage eliminates baling, and there's less of a gamble with the weather. The labor savings are terrific."

LONG LASTING QUALITY — "I bought my first Harvestore nine years ago, and the fourth just last year. We went into it gradually. The HARVESTORE system proved well; as we expanded we kept adding on. Over the years I can see that they'll last and last. I think over the long run they're well worth it."

yes you can

Have a HARVESTORE built
for first cutting this spring

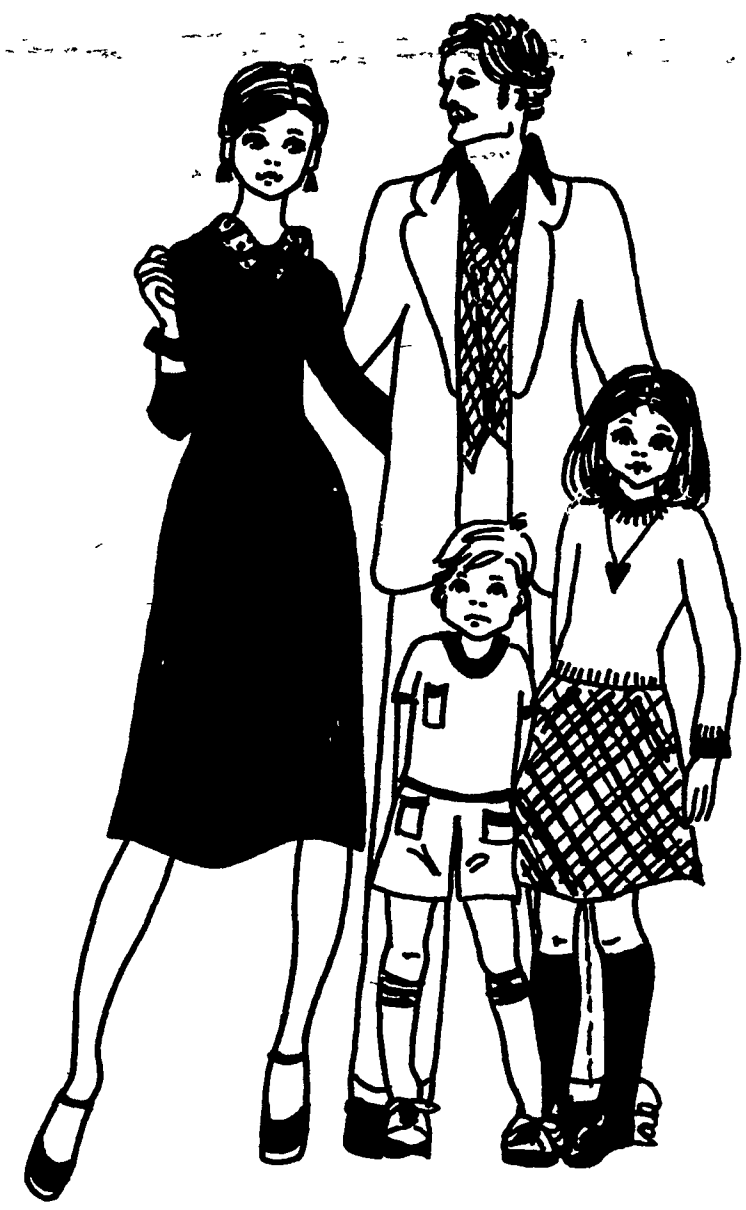
Homestead Notes

What lies ahead for the family in America ????



By SALLY BAIR
Feature Writer

Dr. Stella Goldberg is optimistic about the future of the American family and said she rejects the notion that the family is disappearing.

Speaking in a workshop during the homemakers seminar in Hershey recently Goldberg, associate professor in the College of Human Development at Penn State University, said, "The family is changing, but it always has been changing. The family may have greater significance than ever before."

Despite her optimism, she termed the present high divorce rate "really scary," and predicted that the trend toward divorce will continue until we see the highest divorce rate in history. Responding to questions from the audience, Dr. Goldberg said one main reason for the high divorce rate is that the "more you expect, the more you are likely to be disappointed. If you expect little, you settle for less."

Furthermore, she said, "Women now have more options than ever before. Most women can support themselves, so they don't need to stay married for room and board." Also, the stigma which was previously attached to the divorced person no longer exists, and divorce is no longer taboo even in professions where it was once highly criticized, like the ministry and teaching professions.

Dr. Goldberg also asserted, "Many people marry for the wrong reasons. Many people don't have their own heads together. For the two most important steps in life - marriage and parenting, we receive absolutely no training."

When this comment drew applause and loud murmurs of support from the all-women audience, Dr. Goldberg added, "I believe we really ought to implement good family life programs in public schools with good teachers. Children must learn this - good marriages won't happen by instincts."

Ideally, Dr. Goldberg said, "A good basic family life education program should be a joint effort of the family and the schools. A parent education program should be included."

She discussed the implications of the high rate of unwanted pregnancies among high school girls and the venereal disease epidemic and concluded, "Everyone ought to be involved - it's that important." She stressed that the community must have input into any family life program in the schools so that parents can be involved in what types of things are taught. She said, "It's not a matter of sex education; it's a matter of character education."

"We can't have effective programs without community involvement. We must ask for feedback." She said the emphasis must be on "wholesome interpersonal relationships."

Making other predications about the family in the "not too distant future," Dr. Goldberg maintained that families will become increasingly more affluent and will be able to do more than just buy necessities. Education, travel, recreation, eating out and other leisure time activities will take up increasing amounts of money.

She said, "Increased affluence will bring about some positive benefits, one of which will be that women will go to work out of desire and not out of necessity." She predicted that there will be increasing numbers of women working outside the home, who also have young children which will trigger an increase in the amount of nursery services provided."

Another side benefit of the changing family may be an increased number of people choosing brand new occupations in their mid-forties. "The career you start with may not necessarily be the one you wind up with," she said.

She said family lifestyles will alter in the future with a closer standardization of ideals and a covergence of ideas. She said people from all classes will eat out, buy the same types of wearing apparel and purchase similar kinds of outdoor play equipment.

She suggested that although some people will experiment with different lifestyles entirely, the percentage will not be great. She also noted that experimentation with different styles of living is not new, but dates from Biblical times.

She predicted that a larger number of people may choose not to marry at all, but said that despite the high divorce rate, "We are the most marrying people in the world." This results in what Dr. Goldberg terms "serial or sequential monogamy," because people marry over and over and over.

Dr. Goldberg told the women, "The more democratic a marriage, the more flexible it becomes and the more need there is for communication." She said effective communications must be learned, adding, "We talk at someone, not with someone." She said further that problems should be discussed at the time they occur, not at some pre-appointed time for a "discussion."

In the future, the family will become even more future-oriented, and members of a family will do tasks they feel most comfortable doing instead of having male-female types of jobs, Dr. Goldberg predicted.

Dr. Goldberg cited studies which show that many functions which historically have been performed by the family have been usurped by social institutions. For example, the family once afforded protection to its members, but now an outside agency takes care of that function. Leisure time was once the domain of the family but again outside agencies fulfill much leisure time. Religious functions of the family are now mostly provided by churches.

However, Dr. Goldberg noted that there are two major functions which are becoming increasingly more important. The family provides the primary socialization of its members and it provides the affectional function; that is, it provides love for all of its members. Dr. Goldberg emphasized, "Love is learned, starting from birth."

She discussed other factors influencing the family today, with a major one being the demographic revolution. She emphasized that the world population is multiplying at an unprecedented rate, and that by the year 2000 there will be between six and seven billion people living here.

She talked about the "cybernetic revolution," calling cybernation the science of relationships, including such things as the scientific revolution. She raised the question. "As more and more machinery performs the work of man, what will happen to the human potential for creativity?"

She said we may need to institute programs in the school systems to teach people how to use leisure time in more effective ways, but added, "To date, automation has not increased leisure time. It has only given more goods and services."

Dr. Goldberg asserted that the "human rights revolution" is gaining increasing freedom for women and for marriages. She said, "The emphasis on the individual which is inherent in democratic ideals shows itself."

Dr. Goldberg told the women, "We must ransmit respect for life to our children. Men and women must work together and males and females must both be involved."

She suggested that the current marriage and birth rate is a reflection of the higher birthrate following World War II. She predicted that families will continue to follow the trend to smallness, with one or two children being the norm.

"Young couples," she commented, "will be nearer in age at the time of marriage, therefore ensuring a greater probability of mutural survival to old age."

In relating research on the family which takes into consideration trends having an effect on family life as we know it, Dr. Goldberg said, "The family is still needed for contentment and for stability."

My Thoughts

And welcome to them

By JOANNE SPAHR
Associate Editor

Mom. Well, Mom's the lady who always "did without" so my brother and I could have more, and she's the person who never took a second helping of her favorite pie if we were still hungry.

She also taught us compassion, and that it was okay to cry. And, when we did, only her loving arms were good enough to hold us and make it all better.

Then, as we grew older, only Mom listened to our school stories and laughed out loud when the jokes weren't even funny, and read our school compositions at night when she thought we didn't know. She thought they were masterpieces.

Then, college came. And, Mom's the lady who had to struggle within herself to accept us growing away from her and becoming "college kids" with strange ideas and funny way of dress and thought. But, she never gave up on us, and she was still proud of us because she loved us.

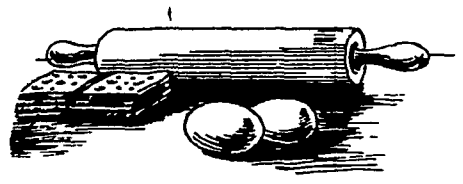
And, now, she's the grandmother who shares a humorous joke with her grandson which only they can know, and only they can share--for hours on end.

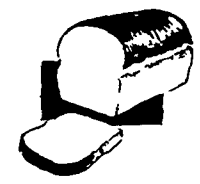
And, she's still the mother that laughs out loud at the bad jokes, loves the crummy stories, and cries when we hurt, and when she doesn't understand us.

I guess she's gotten older, and I guess she's changed, but you know, I never noticed. To me she's the timeless, beautiful lady I call Mom, and that will always be the same.

Happy Mothers Day.

Home on The Range





Diets. Diets are something you are always going to start Monday, but never do. Right? The main reason is that the foods usually associated with low calorie eating are so hum drum. Just how many different ways can you eat grapefruit, or cabbage, or low calorie cottage cheese? And, what if you HATE grapefruit, cabbage, or low calorie cottage cheese?

There is an answer to the "diet blahs", however. Instead of making your normal, high calorie meals, why not make the same foods, substituting low calorie ingredients for the fattening ones? It can be done, and this week's recipes are the start of three weeks of showing you how.

Meats are on today's schedule. Whether you like beef, pork, chicken, or lamb, or liver, we have a recipe for you to try. Hope you like them. And, keep watching for next week's "Easy on the Waistline Desserts."

Beef

BARBECUED BEEF PATTIES

1 pound ground beef
1 cup bread crumbs
½ cup milk
1 teaspoon salt
⅛ teaspoon pepper

Mix and shape the above ingredients into patties. Place in baking dish.

1½ tablespoon Worcestershire sauce
¼ cup vinegar
3 tablespoons sugar
½ cup catsup
½ cup water
½ cup onions (optional)

Mix above ingredients and pour over patties. Bake at 350 degrees F. for one hour.

Mrs. Timothy Newswanger
Danville, Pa.

xxx

BRAISED SWISS STEAK

¼ cup packaged dry bread crumbs
2 teaspoons salt
¼ teaspoon pepper
2 lbs. round steak
2 tablespoons butter or margarine, melted
1 can (1 lb.) tomatoes, undrained
2 medium onions
1 clove garlic, finely chopped
1 tablespoon Worcestershire sauce

Combine bread crumbs, salt, and pepper. Trim fat from steak; wipe meat with damp cloth. Sprinkle one side with half of crumb mixture; pound into steak using rim of saucer. Repeat on other side. Brush both sides with butter; place under broiler, turning once, until browned on both sides. Meanwhile, in Dutch oven or heavy skillet with tight-fittings cover, combine remaining ingredients. Add steak; simmer, covered, two hours, or until meat is tender. Makes six servings; one slice with two tablespoons pan juices equals 311 calories per serving.

McCalls Cookbook

xxx

Pork

HAM KABOBS

1 cup chunk pineapple, canned in own juice
1 tablespoon steak sauce
1 teaspoon cider vinegar
1 teaspoon brown sugar replacement
Dash ground cloves
1 medium tomato cut in six wedges
½ medium green pepper cut in quarters
12 oz. boneless fully cooked ham cut in ½ to 1 inch cubes
½ teaspoon paprika
⅛ teaspoon garlic powder
Dash white pepper
Sauer Kraut Supreme
Chopped parsley

Reserve ½ cup chunks of pineapple for kabobs. Place remaining pineapple and juice in blender container. Add steak sauce, vinegar, brown sugar replacement, and cloves. Cover and process at medium speed until smooth. Pour into small sauce pan. Heat slowly. Arrange reserve pineapple chunks, green pepper, tomato, and ham on skewers. Combine paprika, garlic powder, and pepper. Sprinkle over kabobs. Place on rack and broiler pan. Broil about four inches from heat source for three to five minutes. Turn kabobs. Broil until meat is thoroughly heated—about three to five minutes. Serve on Sauer Kraut Supreme with equal amounts of heated pineapple sauce. Sprinkle with parsley. Makes two servings.

Sauer Kraut supreme

½ cup water
1 pack of instant beef broth and seasoning mix
2 teaspoons dehydrated minced onion flakes
1 bay leaf
¼ teaspoon salt
¼ teaspoon fennel seed
2 cups sauer kraut, rinsed and drained
1 medium apple, pared, cored, and chopped

Place all ingredients in medium sauce pan. Cover and cook over medium heat for 30 minutes. Divide evenly and serve with ham kabobs.

Weight Watchers Primer on Pork

xxx

Chicken

LOW-CALORIE CHICKEN PAPRIKA

2 (2½ - to 3-lb size) broiler-fryers, cut up
2½ teaspoons salt
4 teaspoons paprika
½ cup chopped onion
1 cup yogurt
2 tablespoons chopped parsley

Wash chicken well; drain on paper towels. Sprinkle with two teaspoons salt and two teaspoons paprika. Arrange in broiler pan without rack; broil, about six inches from heat, five minutes on each side, or until nicely browned. Place chicken and onion in large skillet with tight-fitting cover. Add 1½ cups water; simmer, covered, 40 minutes, or until chicken is tender. Remove chicken to serving platter. Stir yogurt and rest of salt and paprika into liquid in skillet; heat slowly, stirring, until hot. Do not boil. Pour over chicken. Sprinkle with parsley. Makes six servings; 282 calories each.

McCalls Cookbook

xxx

BAKED CHICKEN AND PINEAPPLE

2 (3-lb size) broiler-fryers, cut up
2 teaspoons dried rosemary leaves
2 teaspoons salt
½ teaspoon pepper
10 shallots, peeled
2 cups unsweetened pineapple juice
1 teaspoon ginger
Paprika

Preheat oven to 350 F. Wash chicken; drain well on paper towels. Combine

Ida's Notebook

Ida Risser

Some things change and other things never change. Our son recently returned from a weekend in New York City. And, that is one city which I feel as though I know something about as I've spent several vacations there many years ago. So, when he came home tired and sleepy I had to wait until the next day to question him about his trip.

He informed me that everywhere he went it took money-a play on Broadway, meals in Chinese and Mexican restaurants and sightseeing trips. When I asked if he's been in the Empire State Building, he said, "No, but I looked down on it from the World Trade Center observation deck!" I haven't even seen this huge twin-type building.

But when he began talking about subways, we had a common ground-except for the price. No longer can one ride for miles and then transfer for more miles and all this for a nickel. Now the price is 50 cents.

We heartily agreed that the farm is a much better place to live than a big city.

xxx

In organizing the Manheim Township 4-H Community Club this year, I've been pleased with the turn out and the parent response to our program.

Even businessmen in the community are quick to say "yes" when we ask about touring their facilities. We hope to see a veterinary clinic, a planing mill, a phone company and go on a fossil hunt among other things.

Now if our project leaders are successful in keeping the children interested in completing their work, we will have a good year.

YOU'RE IN GREAT SHAPE WITH EGGS!

Avoid non-food uses of microwave oven

UNIVERSITY PARK, Pa. Microwave ovens have come increasingly versatile in the last four or five years, and over 30 manufacturers now market these appliances. Variable power lets the cook simmer spaghetti sauce or bake a delicate custard in minutes. Depending on the brand and model, cooking can be done by time or temperature or both. Defrost cycles allow large roasts to thaw quickly and without constant attention.

New cookery books and articles on using this versatile appliance appear daily with a myriad of practical and inventive uses. It is in this last area, inventive uses, that the consumer needs to use some restraint, according to hone economics specialists at Penn State University. For example, many sources, including a number of manufacturers of microwave ovens, have suggested using the microwave oven to dry flowers. Flowers dried in a microwave oven dry faster, look fresher and retain their natural colors better than conventionally dried flowers.

Other manufacturers, including the manufacturer which currently commands the lions share of the market, do not recommend using their oven for such non-food activities. Part of their rational is that one non-food (or craft use can lead to another and experimentation with a sophisticated appliance such as the microwave oven could lead to difficulties. These manufacturers would not consider the warranty to be in effect if difficulties resulted from craft uses.

Microwave ovens were developed for food uses, and unless a manufacturer has provided explicit instructions on non-food uses, the consumer would be wise to avoid them. When in doubt, the specialists say, contact the manufacturer. Most manufacturers have toll free telephone numbers, and staffs of trained home economists to answer such calls.

You can build my pre-starter ration yourself and bank half the cost of your commercial brand.

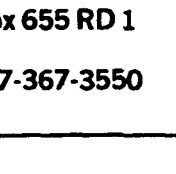
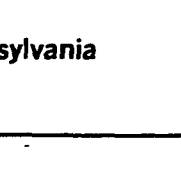
BIG TRUCK HAULING WITH YOUR PICKUP AND THE...

WINNEBAGO® Agri-Trailer™



Two-speed landing gear provides easy hitching.



Easy hook-up with wide-opening jaws of Pin & Plate.

Hitch this versatile trailer to your truck for road travel, switch it to your tractor for field loading. The Winnebago Agri-Trailer can carry as much as a 3-ton truck. It can haul over 7½ tons. Or 285 bushels of grain.

Winnebago's 5th wheel design gives unique stability. It turns short, backs up easy, and trails true at highway speeds without fishtailing.

Junior Cooking Edition

Ever eat gumdrip cookies? How about rhubard crunch? What about rhubard punch? If you've never had the good fortune to try these foods, you can give this week's recipes a whirl and see if they suit your tastebuds.

Happy cooking!

GUMDRIP COOKIES

1 cup flour
½ teaspoon baking powder
½ teaspoon salt
½ teaspoon soda
½ cup shortening
1½ cup oats (quick or old-fashioned)
1 cup granulated sugar
½ cup brown sugar
1 egg
1 tablespoon water
1 teaspoon vanilla
½ cup gumdrops (finely cut)
Shredded coconut

Sift flour, baking powder, soda, and salt. Add shortening, sugar, egg, water, and vanilla. Beat until smooth, about two minutes. Stir in oats and gumdrops. Shape in one-inch balls, roll in coconut. Place on cookie sheets, and bake at 350 degrees F. for 12 - 15 minutes. Makes three dozen.

Linda Wenger
Lititz, Pa.

xxx

WHOLE WHEAT PANCAKES

2 cups whole wheat flour
3 teaspoons baking powder
2 tablespoons brown sugar
1 teaspoon salt
1½ cups milk
2 eggs, well beaten
5 tablespoons melted shortening

Beat eggs and add brown sugar, milk, and shortening. Set aside. Mix dry ingredients, make a well and add egg mixture. Stir. Fry on griddle.

Manheim, Pa.

xxx

RHUBARB CRUNCH

1 cup flour
¾ cup oatmeal
1 cup brown sugar
½ cup melted butter
1 teaspoon cinnamon
4 cups diced rhrbarb
1 cup sugar
2 tablespoons cornstarch
1 cup water
1 teaspoon vanilla

Mix flour, oatmeal, brown sugar, melted butter, and cinnamon until crumbly. Press half of crumbs in 9 x 9 inch pan (greased). Add rhubarb. Combine and cook until thick and clear. Top with remaining crumbs. Bake at 350 degrees F. for one hour. Serve warm with milk or ice cream.

Shirley Wenger
Manheim, Pa

xxx

RHUBARB PUNCH

1 pound rhubarb
1 cup sugar
7 ounces lemonade concentrate
1 cup water
½ quart gingerale
3 more cups water

Combine rhubarb, sugar, lemonade concentrate, and water in kettle and cook until rhubarb is soft. Drain juice and cool. Add rest of water and gingerale.

Lee Wenger
Manheim, Pa.

xxx

OATMEAL SUGAR COOKIES

1 cup sugar
1 cup shortening (half butter or margarine)
2 eggs
1 teaspoon vanilla
1 cup oatmeal
½ cup raisins
1¾ cups flour
1 teaspoon soda
½ teaspoon salt
½ teaspoon cinnamon

Cream sugar, shortening, eggs, and vanilla thoroughly. Mix in remaining ingredients. Refrigerate four or five hours or overnight. Heat oven to 375 degrees F. Shape dough by rounded teaspoonfuls into balls. Place on ungreased baking sheet. Flatten with greased bottom of glass dipped in sugar. Bake 10 minutes. Makes 4-½ dozen.

Linda Wenger
Lititz, Pa.

Quilt sale set

BOYERTOWN, Pa. - The Boyertown Area Historical Society will hold its third annual quilt show and sale at 43 South Chestnut Street, Boyertown, Pa. Dates and times are: May 7, 11 a.m. to 8 p.m. and May 8 noon to 6 p.m. Donation is $1 for adults, children under 16 admitted free if accompanied by an adult.

Old and new quilts, most of which were made in the Berks County region, will be displayed at the show. The Historical Society, a non-profit incorporated organization, is planning and operating the event.

Lincoln club starts up

LINCOLN, Pa. - The Lincoln Community 4-H Club held its reorganizational meeting at the Mt. Airy Fire Hall with officers elected. Kerry Boyd will be this year's president; Allen Ackley, vice president; Judy Zimmerman, secretary; Marcia Gehman, treasurer; Scott Augsburger, game leader; Dwight Graybill, news reporter; and Audrey Gehman, song leader.

Plans for future meetings include a swimming party, parents' night, demonstrations, and a Halloween party.

The monthly meeting will be held on the third Monday of each month at the Mt. Airy Fire Hall at 7:30 p.m.

Recipe Swap

A request for yeast cakes was printed in the March 19 edition of **Lancaster Farming**. Mrs. J.C. Miller of Harrisburg replied, and the following are her contributions.

In the preface to her recipes she also writes saying that she is interested in any tested, preferably "old" yeast recipes for bread, buns, etc. because she collects genuine Pa. Dutch recipes.

HOMEMADE YEAST CAKES
No. 1

6 medium potatoes
6 cups water
Handful hops
½ cup sugar
1½ teaspoon ground ginger
2 tablespoons salt
1 cup liquid yeast
1 package dry yeast
1 cup water
2 cups flour
Corn meal

Boil six medium potatoes in six cups water. Tie a "handful" of dried hops in a muslin bag and boil with potatoes. When cooked, drain liquid into a saucepan. Mash potatoes. To the liquid, add enough flour to make a thin batter. Set this on stove, long enough to scald flour, which helps the yeast keep longer. Remove from fire and cool to warm. Then, add the mashed potatoes along with sugar, ground ginger, salt, liquid yeast, and dry yeast dissolved in one cup water. Let stand in warm place until it has risen thoroughly. Put in large pan or bowl, add two cups flour and enough corn meal to stiffen so it will crumble. Spread to dry on a clean cloth in a dry airy place. One teacup makes eight loaves of bread. Yeast is supposed to keep six months. Dried hops are found in healthfood stores as "hop tea."

xxx

HOMEMADE YEAST CAKES
No. 2

1 quart buttermilk
Corn meal
3-small cakes yeast
1 cup water

Bring buttermilk to boil. Stir in enough corn meal to make a thick mush; boil for several minutes. Remove from heat, let set until lukewarm.

Dissolve yeast in one cup warm water in large bowl. Stir in the lukewarm corn meal mixture and sprinkle a small amount of corn meal over the top. Cover and raise until light in warm place. Stir in enough extra corn meal until it is stiff enough to form into "yeast cakes", one half inch thick.

Place onto a clean cloth and dry, turning every six hours or so until dry enough to store in paper sack.

Use as commercial yeast.

Above two recipes by:
Mrs. J.C. Miller
Harrisburg, Pa.

Tips offered on cleaning wood furniture

UNIVERSITY PARK, Pa. - Restoration of old furniture can be facilitated by the use of a cleanser-conditioner to remove layers of wax along with cloudiness and dullness caused by grease, dust, and smoke.

This cleanser-conditioner is a good treatment to use on furniture one might purchase at a garage sale, rescue from the attic or basement, or any piece that is soiled.

To make the cleanser-conditioner, shake together three parts boiled linseed oil with one part gum turpentine. The turpentine cuts the soil and the oil lubricates the surface. Fill a cup or small bowl with hot water and pour in enough of the mixture to cover the surface. Dip a soft cloth in the oily layer and rub this on to a small area of the wood. Use a toothbrush on canings and in grooves. For very soiled areas, use a 3-0 steel wool pad, rubbing lightly with the grain. Rinse with a clean cloth wrung out of clear, warm water, finishing with a thorough rubbing using a dry cloth.

Discard the cleanser-conditioner water mixture when cold, do not reheat. This treatment takes time on very soiled pieces, so be prepared to use some elbow grease and spend some time at it. Be sure to work in a well-ventilated room, keep the water for the oil hot, and the rinsewater clean. After a thorough cleaning, apply a coat of paste wax.

Feed & weed in one trip.

For fertilizing and weed control, there's a one-trip solution. Feed and weed—applying liquid fertilizer and weed control chemicals together in one quick trip. It saves you time, labor, equipment costs, reduces soil compaction, and helps you get more profit out of every acre.

Most herbicides can be included in our prescription mixed SLF® liquid fertilizer or in Golden URAN® nitrogen solution. So you can feed and weed preplant, pre-emerge or postemerge on practically any crop.

We'll help you rig up your equipment to make your own application, or we'll do it for you. Then, whenever you want to save busy work during the busy season, you can take advantage of ARCADIAN® liquid and feed and weed in one trip.

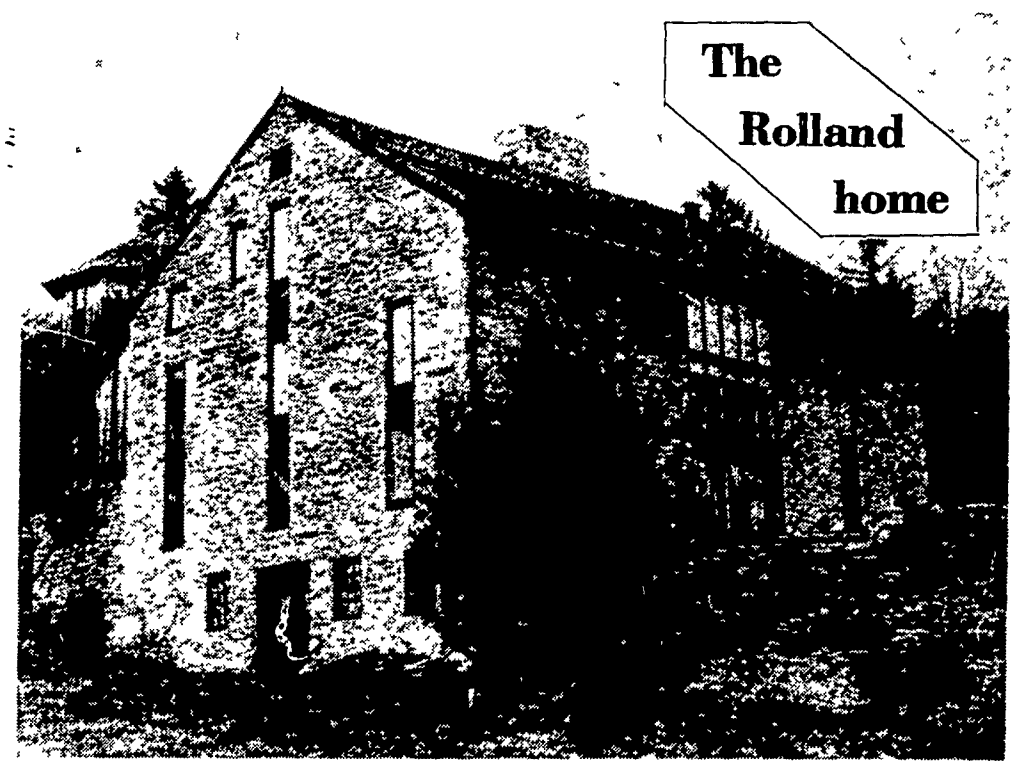
What ever happened to Chester County barns?

WEST CHESTER, Pa. - In the 1800's when Europeans "jolly well" went to "see what that place America," the farmer was king, and barns were the palaces of the states. At that time Chester County, Pennsylvania, was a key tourist attraction with its "great stone barns" as they have been referred to. These impressive edifices with their 25-inch thick stone walls, have lasted through the centuries and are, today, still standing as markers of ages gone by. Unfortunately, most of the farms that accompanied these buildings have been enveloped by suburbia.

This growth in population and diminishing of farmlands has meant either razing the barns and outbuildings or coming up with an adaptive use for the existing structure. And, made as they were for an era passed, the great stone barns of the county did not lend themselves to adaptation for modern farming.

Fortunately for Chester County, many of the barns have been saved and remodeled to fit a modern need. Some have become restaurants, supper clubs, theaters, or small, special museums. One or two have even become factories, craft centers, or artists' studios.

And, one especially popular use has been turning the barns into homes. The families who choose this method generally have a special attachment to the history of their particular building. One family has even said that on calm, cool Chester County nights, they can faintly hear the cattle lowing.



The Rolland home

Not everyone has an imagination quite that active, however, and most individuals are content to just enjoy the uniqueness of their dwellings. And, unique, they are.

William and Donna Rolland, West Chester, and their sons are one such family who have come to reside in what could be termed their "dream house." In six months they took a double decker barn (a type described in a previous story printed in Lancaster Farming on April 16) which had also been an ox driven or sweep-power grist mill, and made it into a comfortable dwelling which is also a conversation piece. And, while many barns in the county have been made into houses, this home has the distinction of incorporating the silo in the finished product, as well.

Of course, the early silos constructed at the turn of the century weren't the huge blue silos we have today. The Rolland's is an octagonal shaped structure which measures 16 feet, flat to flat. They kept the original structure and added vertical windows, a door, and spruce siding. The children's bedroom is located on the fourth level of the one-time five story silo which also contains a family room on the third level, a darkroom on the second, and an unused room at the base of the former wooden silage container. Another eight feet of enclosed space lies below that, although the Rollands filled it with debris created when a passage was made between the barn and silo.

"The family room and the boys' bedroom are really dedicated to the children," Mrs. Rolland explained. Because of this, she chose to paint the original wood on the interior of the family room with yellow paint and to install orange carpet. The wooden beams are purple.

"It's time to renovate again," stated Mrs. Rolland with a grin. After seven years of living with the same color room and the same interior decorated home, she feels she'd like a change.

What gave them the idea to use the silo for bedrooms, family room, and more? Mrs. Rolland explained, in her own words, "It was here, it was unusual, and it was relatively intact." It was also a "nice shell to work with." So, they put it to good use, and today it is the part of the home that gets the most wear.

The barn, itself, which housed a dairy operation along with a grist mill at one time, was perfect for the design of large, spacious rooms in the upper decks. The dimensions are 40 feet by 60 feet by 45 feet (at the peak).

All existing exposed beams were left to serve as room or area dividers which allowed the original architecture to dominate the remodeling. As a result, the house is basically laid out in

[Continued on Page 50]

WEST CHESTER, Pa. - For the Dennis Wilsons, West Chester, turning a barn into a home for their family represented a challenge which they couldn't resist.

After first considering building a home of their own, their thoughts changed to coming up with their dwelling by some other method.

After scouting around for all the various possiblilities, Mrs. Wilson called her husband one day, and asked, "How's a barn sound to you?"

"Great!" was the reply, which plunged them both into a major renovating job.

The most notable feature of the Wilson home is the great amount of glass on the southern exposure.

"We wanted the light primarily," stated Wilson, [illegible] then noted that heating was a second consideration. While many barns remodeled into homes are hard to heat, the Wilson's only has a five per cent heating loss

The Wilson home

To create the appearance their abode now has, they cut back part of the barn roof and added thermopane glass in its place wherever the glass went into the interior of the house.

"We were also working with three walls of stone on the East, West, and North sides, so doing this to the southern exposure was the natural choice," he pointed out.

Why did they choose a barn to remodel?

"That's like asking why a person climbs Mount Everest," replied Wilson. "It was just there."

After a few minutes of consideration, he explained that although the barn is part of a housing development, it is located far enough from the road to be private, and yet close enough to other people not to be totally secluded.

At present, the Wilsons are still landscaping the grounds and installing a pool. Although they have finished the horse stables connected to the south wall of the home, Wilson joked that so far only a "spayed kitten" has made its home there.

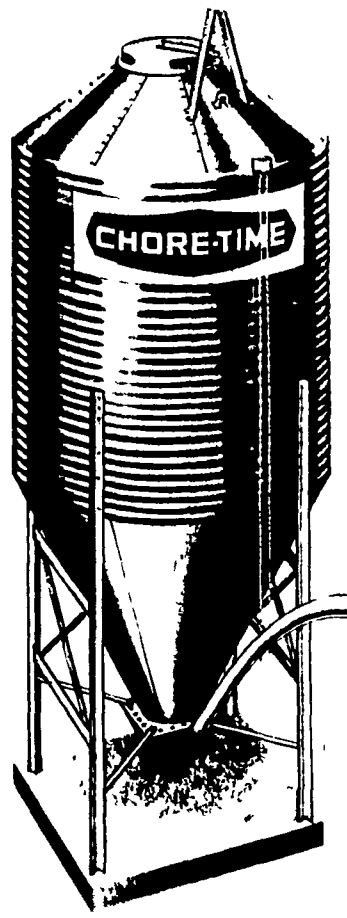
CHORE-MATIC® The Complete System Plus . . .



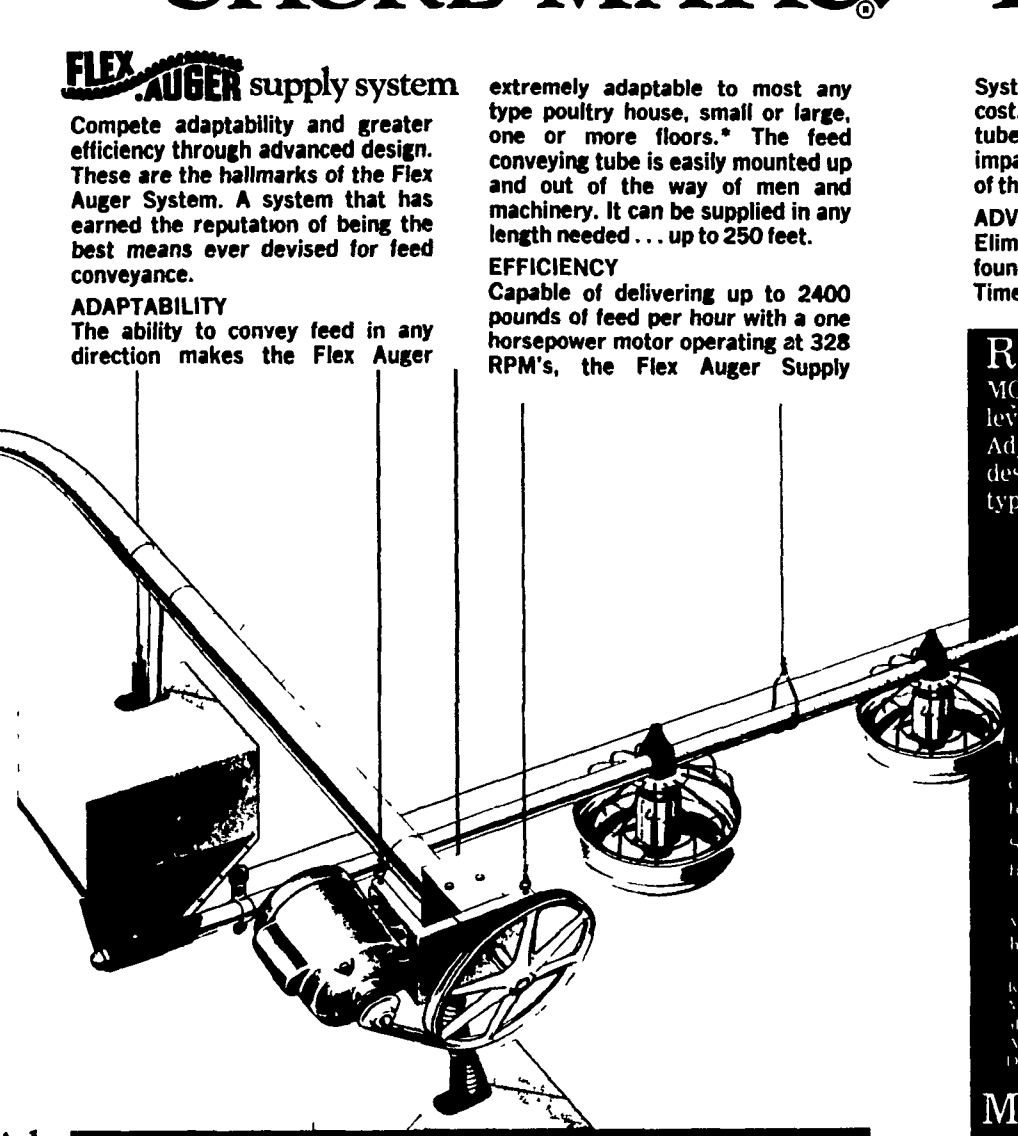
FLEX AUGER supply system

Compete adaptability and greater efficiency through advanced design. These are the hallmarks of the Flex Auger System. A system that has earned the reputation of being the best means ever devised for feed conveyance.

ADAPTABILITY
The ability to convey feed in any direction makes the Flex Auger extremely adaptable to most any type poultry house, small or large, one or more floors.* The feed conveying tube is easily mounted up and out of the way of men and machinery. It can be supplied in any length needed . . . up to 250 feet.

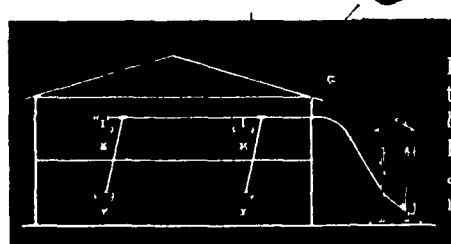
EFFICIENCY
Capable of delivering up to 2400 pounds of feed per hour with a one horsepower motor operating at 328 RPM's, the Flex Auger Supply System has the lowest operational cost. Feed is kept fresh in a closed tube and feed consistency is not impaired, due to the cradling action of the Flex Auger.

ADVANCED DESIGN
Eliminating many of the problems found in other systems, the Chore-Time Flex Auger makes possible new standards of profit, productivity and performance. The advanced design of the spring-steel auger obsoletes linkage conveyors, with their wear and breakage problems. It eliminates cross-over and corner problems. It's the single, one-piece straight-line auger that doesn't wear out, doesn't break and doesn't need adjustment.



*Multiple floors?

One Flex Auger!



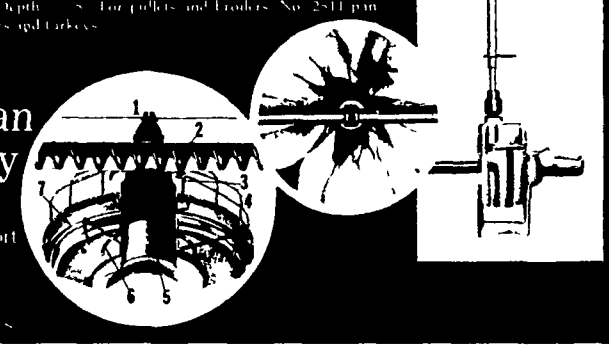
If your houses have more than one floor, feed can still be delivered with only one Flex Auger. The system adapts easily and works with its customary efficiency.

Round pan feeding system

MODEL C FEED PAN Special contoured bottom and self-leveling feature keeps feed evenly distributed. Adjustable feed level tube permits any desired feed level of most any type feed. Unique feed saver ring stops loss of feed by eating. This system allows the birds to clean up all feed, virtually eliminating feed waste. Strong wire grill divides feeding space for efficiency and keeps bird off pan. Gives positive floor feeding for starting birds.

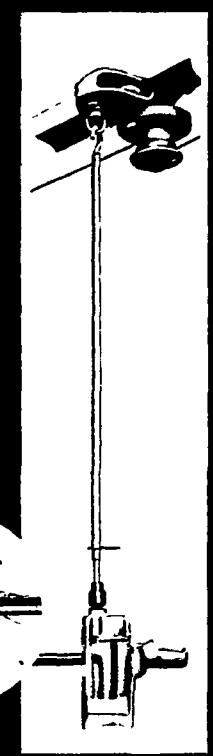
STRAIGHT LINE FEEDING. Simple. Dependable. Trouble free. No corners or drive wheels to cause trouble. Lines up to 250 feet in length operate perfectly. Lines can be adapted to your particular specifications. Fewer lines are required per house, providing more space for more birds.

ROUND PANS FEED 4 MORE BIRDS. Feeder pans are 16" in diameter. Model C pans provide 50% more feeding space than trough feeders by allowing feed to flow from trough between pans. PAN DEPTHS AVAILABLE: Model C 4 pan Depth 3". For pullets and Broilers. No. 2811 pan Depth 4". For Layers and Breeders.



Model C Feeder Pan Cut-A-Way

1. Electro-Guard
2. Feed-Saver Auger
3. Self-Aligning Support
4. Wire Grill
5. Feed Level Tube
6. Feed Saver Ring
7. Feeder Pan



Power Lift Suspension System

CEILING SUSPENDED Feeder lines can be raised or lowered with the flip of a switch, permitting quick and easy pan height adjustment for feeding any size bird. The heavy duty Power Lift will raise or lower Chore-Matic feeder lines up to 550 feet in length quickly and effortlessly. If so desired, the portable power unit can be used for raising all feeder as well as waterer lines.

The Rolland home

[Continued from Page 48]

hirds in the place of what had been the hay mows and granary and barn floor sections.

The living room formerly was the hay mow, with floor joists and black walnut floor from the Bucks County added.

"This room is a great area for entertaining," Mrs. Rolland points out.

The room's atmosphere is created by its depth (it measures 20 by 40 feet), which Mrs. Rolland has accentuated with two double trees (a piece of wooden equipment used to harness horses to a carriage) suspended from the ceiling and used to support hanging flower baskets. The family also has a swinging wicker chair hung from above.

Adding more flavor to the room are the windows. They are long, narrow vertical portals which serve three purposes-they allow the sun to brighten the area, they accentuate the height of the room, and they replicate the ventilation slits built into barns. Similar windows adorn each wall of the house, and each room they illuminate has a different flavor.

For instance, the kitchen. It is the most "enjoyed" room of the house, and features Rutt cabinets made from birchwood and stained with yellow alcohol to let the grain exposed; counter tops created from handmade ceramic tile, and a floor surfaced with handmade Mexican tile.

Other rooms in the home are the master bedroom which is in the loft area with the beam structure exposed. Below all this, on the granary level, is an apartment for William Rolland's mother and some office space. The downstairs foyer floor leading into the apartment and office is made of crosscut logs of cherry, walnut, and oak wood. Also in this foyer area is a brick wall constructed from red bricks originally used to seal the entire granary from rodents.

"The brick was formerly under the wood, which we pulled off. Then, we decided to move the brick into the foyer and decorate the wall to exemplify what the barn construction was really like," Mrs. Rolland explained.

To move between the many levels of the house, the Rollands built a 12 x 12 foot cinderblock structure which is sunken in the ground and runs the whole height of the dwelling.

The structure is multipurpose, housing two wood boxes, three fireplaces, a circular stairwell, and all the separate flues for the fireplaces.

"There's not a bit of space wasted with that box," Mrs. Rolland points out. The major fireplace in the upstairs living quarters is faced with stone taken from the walls of the barn when windows were set in, offering a very attractive addition to the living and dining rooms.

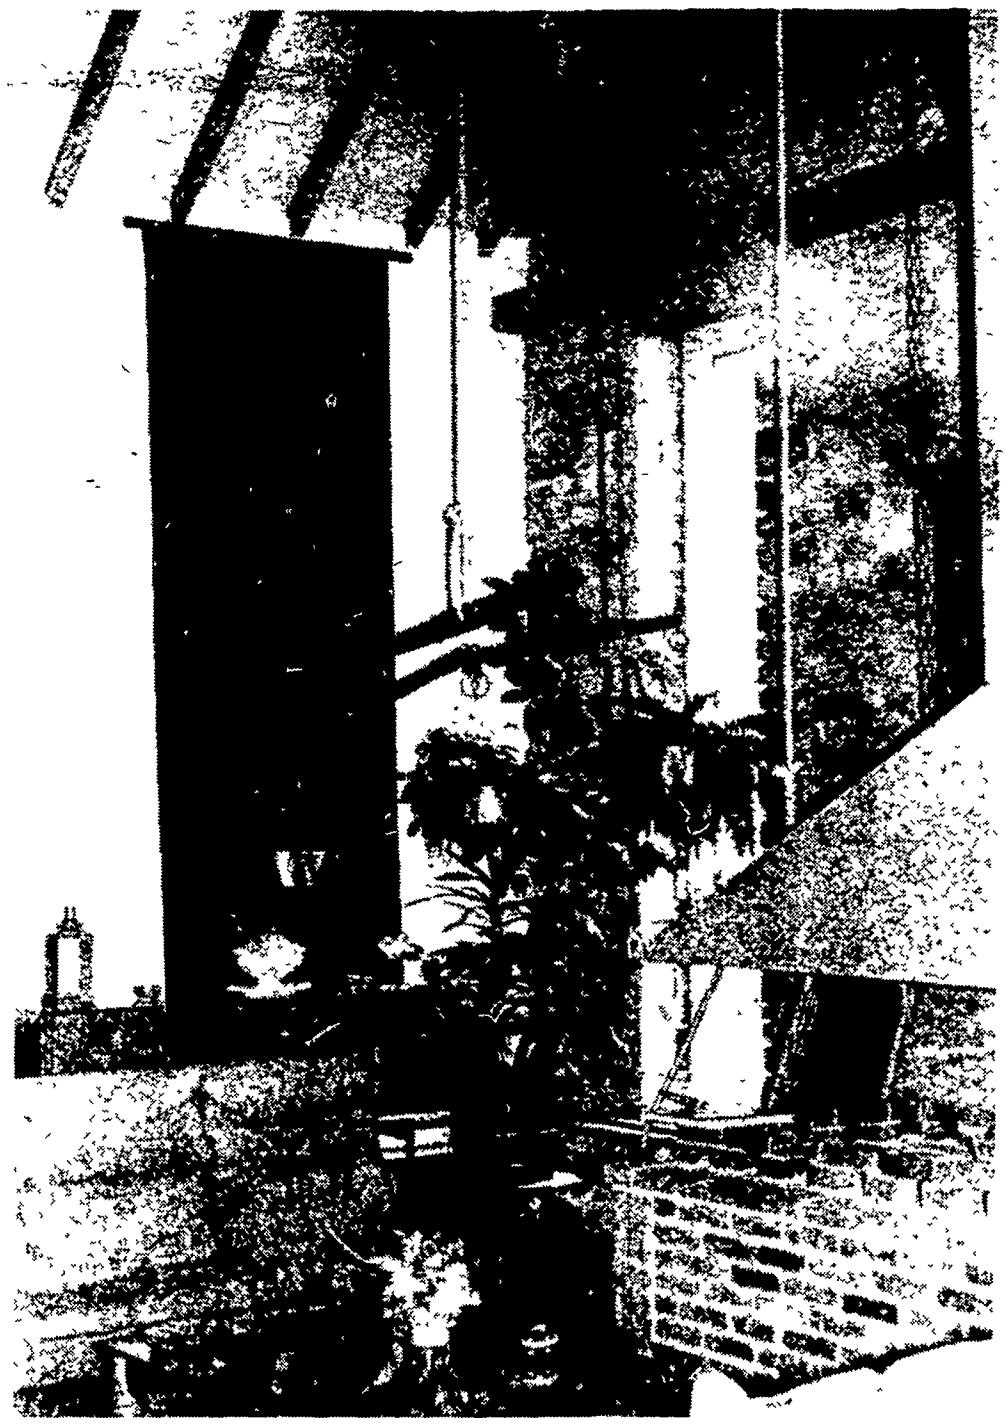
As can be imagined from the size of the rooms and the open space, heating can be a problem with this barn, as well as many others.

"Heating isn't difficult," noted Mrs. Rolland, "but it is expensive." They heat with electric.

But, for the Rollands, the heating bills aren't enough to detract from their unique house.

"I always thought that it would be nice to live in a barn," notes Mrs. Rolland. "And, if there is one thing we tried to achieve, it was that the house would always look like a barn." They have achieved that goal.

This is a shot of the dining room and entranceway to the kitchen in the home of the William Rollands.



The living room in the remodeled barn is an excellent place to do entertaining, says Mrs. Rolland. She has accentuated the depth of the room by adding a hanging wicker chair and a double tree with house plants attached. The elongated windows also highlight the room with its 30-inch thick stone walls.

Arcadian Liquid.

Now's the time to give corn a good start.

Plant and feed more acres per day with liquid starter. Seedlings develop faster, roots grow bigger, maturity comes earlier when you plant and feed an Arcadian SLF premium liquid starter. It provides the nourishment germinating seeds need for a vigorous start in the critical early stage of growth. High analysis phosphate from Poly-N®, Golden Uran® liquid nitrogen, potash, secondary elements, micronutrients, even pesticides, can be prescription-mixed to suit your soils and crops And SLF liquid saves time and labor The Gumz Farms in Indiana, plants 1300 acres of corn 50% faster since switching from dry to an SLF liquid starter. If you want to get your corn off to a running start, then count on us and SLF premium grade liquid starter.

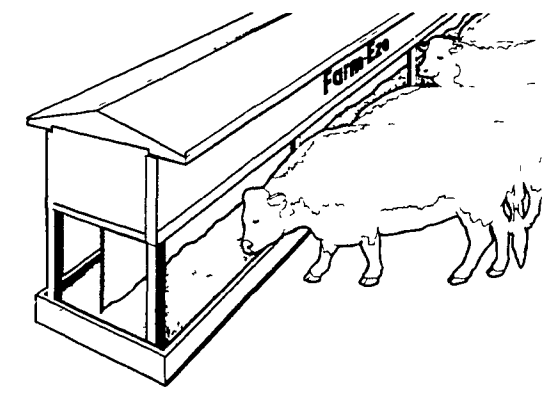
- electronic scale for precise formulations

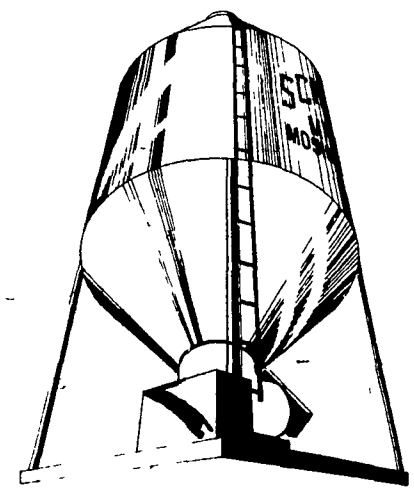


Faster feeding, less work, better profits!

Farm-Eze conveyor bunk feeder

There's a Farm-Eze Feeder just right for your operation, and it's so quiet, safe and simple-to-operate, you'll wonder how you ever got along without it! Get a minimum of 250 pounds of feed per minute. The exclusive Farm-Eze plow provides an even feed distribution for each foot of bunk regardless of length. And the Farm-Eze comes in lengths to 165'. 1½ hp motor.

Ask Agway about designing a work-saving, time-saving Farm-Eze system for you.



The right feed bin for you

Schuld bulk feed bin

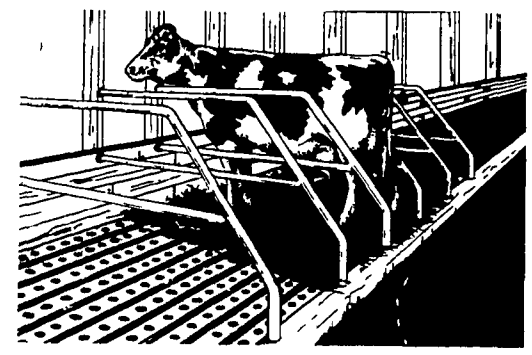
- Capacities from 3 to 125 tons
- Unique free-flow design
- Free erection (all but largest)
- Heavy galvanized steel

Shuttle Feeder #85

Save labor and up to ⅔ less power than your present feeder may use!

Starline 85 Sweep Shuttle feeder

- Uses about ⅓ the power required for conventional feeder of the same size
- Handles all types of silage and ground feed
- Double action discharge
- Whisper quiet operation
- Available up to 150' long



Keeps cows cleaner, dryer!

PERF-A-LOT

The cost-cutting, high comfort steel flooring for free stalls etc.

- minimizes the need for bedding
- easy on legs and hoofs because it gives under cow's weight
- cooler in summer, warmer in winter
- eases the stresses of confinement
- also ideal around waterers, lick tanks, feed bunks, in loafing yards and alleyways
- check Agway for details

Farm Women Societies

Berks. Co. Society 8

A tour through the WLYH-TV studio, Lebanon, preceded the meeting of Berks County Farm Women Society 8 of Strausstown.

The 15 members present voted to give commencement awards to a senior boy in agriculture and to a senior girl in home economics at the Tulpehocken Area and Hamburg Area School Districts.

A ham-on-roll sandwich sale will be held on May 7. The membership approved the purchase of two scales to be used when making sandwiches.

Two group members delivered an orchid corsage to the adopted guest at Berks Heim for Easter.

Four pounds of cookies will be donated by Society 8 for the Berks Heim Tea on May 11. Also on that date, seven group members will attend the Spring Rally at the York Fairgrounds.

The group's president, Shirley Stricker, read an invitation from Society 2 to attend their 25th anniversary on June 8.

"Women in Crisis" will be the topic of the next meeting on May 24 at the residence of Donna Hix, Shartlesville.

Lancaster Co. Society 11

Lancaster County Farm Women Society 11 met April 26 at the home of Mrs. Betty Burkins. Twenty members and two guests attended.

The Society is scheduled to sew at the General Hospital, Lancaster, on May 18 from 9 a.m. to 3 p.m. Ten dollars was given to the American Cancer Society.

The afternoon's program was given by Doris Thomas, Lancaster County home economist. Mrs. Thomas spoke on nutrition and gave new recipes which she prepared and offered to the members.

Next month's meeting will be held on May 26 at the home of Mrs. Gladys Brown.

Lancaster Co. Society 13

Lancaster County Farm Women Society 13 met on April 15 in the Gimbel's Community room, Park City, with Mary Ann McClenaghan, 125 Highview Drive, Lancaster, and Mary Sayres, Witmer, serving as hostess.

The speaker for the evening was Amos Esh, New Providence, a representative of the Youth For Christ, New Danville Pike, who spoke on the YFC activities.

The group voted to sponsor the Farm and Home Center as their project for the year.

The next meeting of Society 13 will be a tour of Ephrata Cloisters on May 14, 1977. The group will meet at the restaurant at 12:30 p.m. for lunch. The tour will be conducted at 2 p.m.

Lancaster Co. Society 26

Lancaster County Farm Women Society 26 met on April 28 to sing at the Brethren Village, Neffsville. Many old and new songs were sung by the women, who were accompanied on the guitar by Jean Shearer.

After the program at the retirement home, the Society met at the residence of Annie Ginder, Elizabethtown R3.

The group chose three selections for the Farm Women County project - they are: Good Will industries, S. June Smith Center, and the Farm and Home Center. The majority vote went to the S. June Smith Center.

The Farm and Home board gives 12 $500 scholarships each year to home economics, nursing and agriculture majors. Not all the scholarship money has been used, so anyone knowing an individual eligible for the scholarhsip should inform Society 26 and they will take the matter up with the board.

A course on financial planning is being offered at Elizabethtown College. Anyone interested should contact the college.

The next meeting will be held on May 26 at 7 p.m. at the Bird-In-Hand restaurant. The group will be entertaining Society 14 with Miss Gloria Longenecker as special guest.

Lancaster Co. Society 27

A "backwards meeting" was the order of business when Lancaster County Society 27 met on April 26 for their monthly meeting.

After entering the back door, the group was served dessert, then the meeting was adjourned after which the group proceeded to old, and new business and reports. Following the reports, the meeting was called to order.

The next get-together of Society 27 will be held on May 21 at which time they will be entertained by Society 8.

York Co. Society 12

The 25th birthday anniversary of York County Society of Farm Women, Group 12, was observed at Atalong Dining Room.

Twenty-five members and 30 guests attended. Twenty-seven charter members organized this group in January 1952, 16 of those 27 belong today.

Twelve past presidents were recognized: Mrs. Esta Douglas, Mrs. Mabel Pickel, Mrs. Janet Kohler, Mrs. Mary Wise, Mrs. Louise Massa, Mrs. Margaret Tyson, Mrs. Gladys Craley, Mrs. Dorothy Lanius, Mrs. Clara Shaull, Mrs. Helena Stover, Mrs. Annie Warner and Mrs. Violet Warner.

Three honored guests were present-Mrs. Naomi Bupp, York County Farm Women president; Mrs. Mabel Rishel, first president of Group 1 in York County, 47 years ago, and Mrs. Grace Perry, former York County president.

Entertainment included soloist Mrs. Carl Almquist, York, and accompanist Marti Schriver, York.

A panel consisting of four charter members highlighted the past 25 years of the group's existence.

A gift was given to the first president, Mrs. Esta Douglas (1952-53).

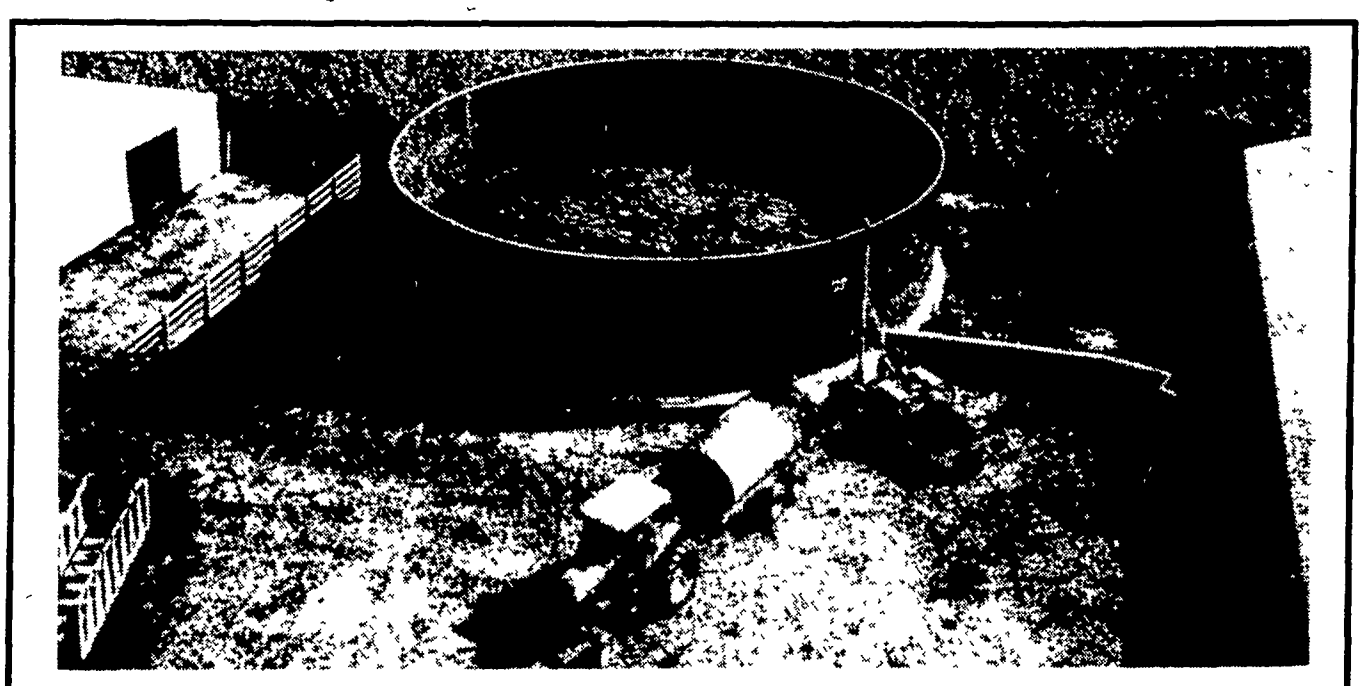
Mrs. Carl S. Bacon, president, had charge of the program.

York Co. Society 16

Several dates of future events were announced at the April meeting of York County Farm Women Society 16. The get-together was held at the home of Charlotte Dowell, 4520 W. Canal St., Dover, Pa.

The Society will help at the York Co. Bake Sale at the York Mall on June 24-25. And, on September 6 through 12 the York County bus trip

[Continued on Page 55]

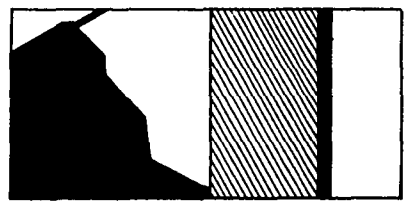


You're looking at money in the tank.

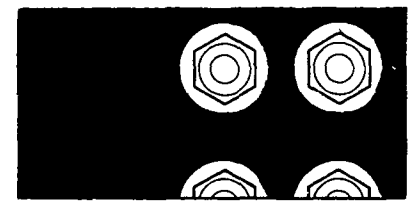
The nutrient content in manure will vary from farm to farm However, with proper storage, the value of NPK coming from the spreader will often test out to be worth 2 to 2½¢ per gallon

Because your Sealstor® Liquid Manure Control Center is filled and unloaded through the bottom, the protective crust that forms over the top is not disturbed This crust deters flies and odors and prevents oxidation Leaching is eliminated. The natural nutrients in the manure are preserved

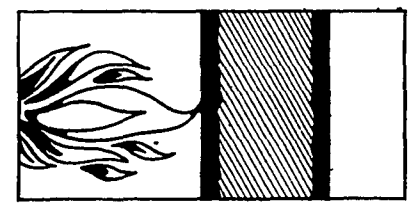
Every animal on your farm is a source of valuable NPK You can waste it through runoff, leaching and oxidation or you can Sealstor it in the tank, and put more money in the bank.



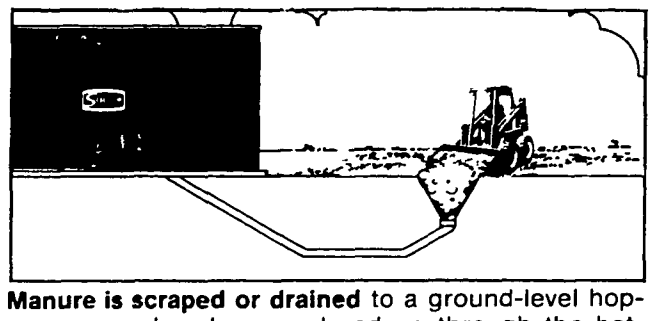
Glass, fused to heavy gauge steel, gives a smooth, nonporous surface, resists rust, is imperious to acids and corrision



Sealstor double-bolt construction provides more strength along vertical seams More sealant assures a tighter structure



In our modern plant we have been manufacturing glass-fused-to-steel products for 27 years for industrial and on-farm use



Manure is scraped or drained to a ground-level hopper, pumped underground and up through the bottom of your Sealstor Manure Control Center

Sealstor products are manufactured by Southwestern Porcelain Inc
P O Box 8 Sand Springs Oklahoma 74063

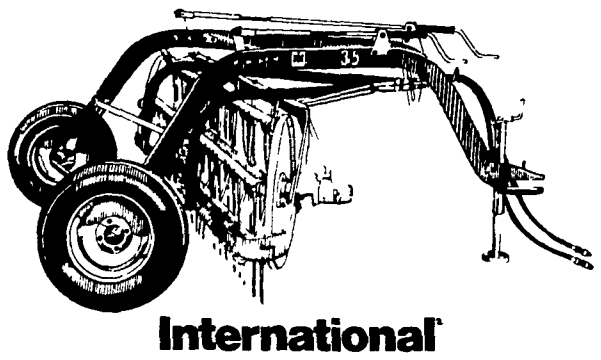
Enjoy the best in gentle, high-capacity raking



International 35 Parallel Bar Rake

With the 35 rake, not only do you get clean raking at the right speed, but also the action to handle any crop from rank hay or thick sorghum to easily damaged beans One major reason Teeth are triple-grouped, rather than doubled, so they work like a fine-tooth comb And they're rubber-mounted for flexibility longer working life

- Rakes a 9-ft swath 4 tooth bars standard, 5th can be added for extra-delicate raking
- Choice of ground drive or exclusive hydraulic drive for complete tractor-seat control over raking action
- Offset wheels are right behind basket for best work in uneven ground
- Dolly wheel attachment helps prevent tooth dig in over extra rough fields

Let's arrange a demonstration. Finance plans available.

This is the "before" picture of the Dennis Wilson home, and is a view of the south wall and what is now the horse stables.

The Wilson home

[Continued from Page 48]

As a note to barn enthusiasts, they converted the one-time granary into a "sunken conversation pit," and the machinery shed into a garage.

They did keep one of the most notable features of the stone barns of Chester County - the conical supports - and included them in the architecture of the home.

And, on the east stone wall, they constructed an open portal for the sun to shine through in the morning. The rays go directly into the master bedroom.

In general, as a result of extensive planning, the house, which is still in some stages of construction, is a breathtaking labyrinth of angles.

[Continued from Page 52]

to the New England States will be held.

In August from the 11th through the 14th, the Cancer Fair will be held at the York Fair Grounds.

Society 16 will be selling vanilla as their project for the month. Anyone interested should contact a member of the group. The Society will also take part in a food stand at William Mummert's sale, on North Main St., Dover, on June 4.

The entertainment for April's meeting consisted of exchange students, Lars Sorenson and Adrian White. Sorenson is from Denmark. He spoke on his country and showed slides.

Miss White was an exchange student from Dover to Brazil. She spoke about her trip and displayed the souvenirs she brought back from the country.

The next meeting of Society 16 will be held in the United Church of Christ in Dover. At this meeting, the members will entertain Society 28. The date for the get-together is May 28, time, 6 p.m.

York Co. Society 27

"Fragile Handle With Care," a movie on child abuse, was shown by Mrs. Karen Merdante, from the C.O.P.E. agency to the members of the Mount Royal Society of Farm Women, Group 27, at their recent meeting.

Mrs. Grover March, president, called the roll and members answered with their ideas on "Spring".

On May 20 all members will have their birthdays recognized with a dinner-theatre party at the Allenberry Playhouse and the exchange of pollyanas. The show for the evening is "Dames At Sea".

Mrs. Oberlander and Mrs. Carl Kroft, will help with the serving and clean-up committee at the Spring Rally to be held at the York Fairgrounds on May 11.

On June 24-25, Mrs. Kenneth Wire and Mrs. George Shaffer, will man the bake-sale table at the York Mall, when a sale will be held to benefit the county activities fund.

A change of meeting date for May has been made, due to the Memorial Day holiday. It will be held on May 23, at the home of Mrs. Kenneth Wire, 3890 Schoolhouse Road, Dover, starting at 7:00 p.m. Mrs. Kathryn Delp will be in charge of the evening's program.

The county-president's bus trip is planned for June 22, and will include a tour of the Mt. Alto Rehabilitation Center, a box lunch at the Caledonia State Park, a matinee show at the Totem Pole Playhouse, and dinner before returning home.

Mrs. March attended a recent board meeting at the York Mall community room, and announced that there have been 1601 more cookbooks ordered.

Mrs. Patricia Yost was elected vice-president at a special election.

A thank-you note was read from Mrs. Richard Smith, a member, who was a recent surgical patient.

By DIETER KRIEG

Some of the dearest recollections I have of my life on the farm involve my grandmother and grandfather. They were exceptional people -- a quality which can easily be illustrated by mentioning that even at their respective ripe ages of 87 and 92, they were still travelling across the ocean. Many people dare not undertake such an adventure at 60 or 70 years of age. For them to travel the great distances between America and Germany during their latest years is just one indication of their hardiness and good health. They're qualities, I suspect, which were fortified by their many years of life on the farm.

My grandfather -- affectionately called "Opa" by all in the family -- was an octogenarian by several years already when my father purchased his own farm. My grandmother was close to it. Nevertheless, a day didn't pass that they didn't provide significant help with the farming operation.

Opa was always up with the sun -- rain or shine, Summer or Winter. He'd occupy himself with anything from feeding heifers and chopping wood, to digging fencepost holes and carrying milk. Meanwhile, Oma helped out in the garden and kitchen.

By lunchtime they both had interesting stories to tell. Oma might remark on how swiftly the asparagus was growing, while Opa told of his observations in the heifer pasture while he was repairing fences. The world wasn't old to either of them. They found their surroundings interesting and it kept them young, I'm sure. Both kept active to "keep from getting rusty," they said.

Chores as we know them were never chores to Opa. Rather, they were pleasure and delight. At times, I believe, they were even a privilege for him as there wasn't anything he seemed to dislike more than doing nothing. That's not to say he didn't rest.

Nearly every day Oma and Opa would sit on the front porch awhile, with our dog "Shep" at their side. They were as relaxed and content as gentle breezes combing through the trees on the lawn. Always welcoming somebody they could talk to, their company was equally appreciated by all younger members of the family.

Opa dug hundreds of fencepost holes by hand; he fixed fences nearly every pasturing season; he carried up to two tons of milk to the milkhouse per day; he cleaned up the premises whenever he could; he walked across snow-covered fields to feed youngstock at a second farm and he found delight and satisfaction in it all.

What's more, both he and Oma were the type of grandparents a person can't help but love dearly. And their love for their grandchildren was just as strong.

I'll never forget those years of life on the farm when Oma and Opa were with us.

BREEDING CATTLE FOR YOUR NEXT GENERATION

Horticulture happenings reviewed

GETTTYSBURG, Pa. - Farm income should improve and consumers remain well fed if research and extension plans of The Pennsylvania State University materialize.

The production and processing of horticultural crops is important to the economy of Adams County and constitutes a major industry in Pennsylvania. "Opportunities for making money in the production and marketing of these crops is now greater than ever", according to Dr. R. William Hepler, head of the Department of Horticulture at Penn State.

Hepler provides leadership to a staff dedicated to the support of the horticultural industry through out the state. The equivalent of fourteen staff members devote full time to research programs on the main campus at Field Research Laboratories at North East and Biglerville. Ten staff people are engaged in teaching and another six conduct Extension programs for people through-out the state. Dr. Hepler was interviewed about the program of his department during a workshop held recently at Penn State.

"Commercial agriculture will remain first research priority for the next five years" said Hepler who went on to suggest that direct marketing to consumers through farm markets and pick-your-own operations will improve farm income. Projects related to fruits, vegetables, flowers, and ornamental plans were outlined.

"First research at Penn State is seeking to discover the most economical system for orchard design with projects to compare and evaluate tree training systems. Plant growth regulators to improve production are under test.

Commonwealth fruitgrowers have been instrumental in the establishment of two field laboratories for conducting research in the major growing areas, adding to the effectiveness of our efforts" said Hepler.

The corking disorder in apples and its relationship to calcium nutrition is the major problem under investigation by Dr. Goerge Greene, resident horticulturalist at the Biglerville Laboratory.

"This problem is causing serious economic loss to Pennsylvania growers and has significance world-wide because calcium nutrition is not well understood," continued the Penn State DEPARTMENT HEAD.

Variety testing is another important aspect of the horticultural research program at Biglerville. The peach variety trials have been expanded. A total of thirty apple varieties are now bearing. The apple project seeks varieties suitable for processing and with potential for supplementing our important York Imperial variety. Another apple study will evaluate the fruit quality of thirty disease-resistant varieties.

"A major new apple project will be established at the Arendtsville location near Biglerville beginning in 1978" announced Dr. Hepler. This five acre planting will evaluate systems of production to see how well they are adapted for reduced use of pesticides and beneficial cultural practices. he project will compare: (1) free-standing trees on M7 rootstock; (2) free-standing trees with an M9 interstem on M111 rootstock; (3) slender spindle training of trees on M9 rootstock; (4) trees with M9 rootstock trained to a four-wire trellis and a fifth system still to be decided. The experiment, to be partially funded with a grant from the United States Department of Agriculture will be correlated with similar experiments in Massachusetts, New York, and at the new USDA Experiment Station in West Virginia.

"Most of our grape research is conducted at the Penn State Fruit Research Laboratory, North East, Erie County, near the center of a 10,000 acre production area," continued Professor hepler. We're seeking improved techniques for propagating grapes and are continuing to evaluate varieties for both wine and table grape production. A variety plot at Biglerville contains 20 popular wine varieties and two suitable for table use.

The Penn State department head praised the Extension Service as "a vital part of the team serving commercial agriculture". He cited the team effort of research and extension with cooperation by farmers and industry personnel in mechanizing tomato production from direct seeding to mechanical harvesting, as an example. "This provides good evidence of how our team of professionals can effectively improve and expand food production," he continued.

Research and extension programs in vegetable crops are concerned with improving varieties, mechanizing production, soil testing and improving plant nutrition." New varieties and production techniques, originated at the experiment station, are taken out into the

On being a farm wife

By Joyce Bupp

She loves her life there on the farm; Protects her flock from unknown harm; Hard work brings this gal no alarm. Who's that? Why, the farm mother.

She tends the garden, mows the grass, Bakes cookies for the first-grade class, And takes each day as it comes to pass, Who else.....but a farm mother.

She milks the cow; and tends the calf, Picks up new parts on his behalf, Is known at the bank by the entire staff! That's her.....the farm mother.

She cans tomatoes, corn and peas, Entertains all guests with grace and ease; And dusts the dog when he brings home fleas. You guessed it.....she's a farm mother.

She cleans up mud and mops up snow, Finds intimacy with the broom and hoe, Wakes up each day with the rooster's crow. That talented farm mother.

Her job-to sew; her job-to mend; Her job-a sick child to attend; She shares her cares with a cherished friend. They love her, their farm mother.

She corrects their wrongs, praises the right, Checks baby lambs late at night; Shares his fears about the new corn blight, That concerned partner, the farm mother.

You'll find her in church early on Sunday, With a basket of wash in the yard each Monday, And she'll clean out the closets–maybe one day, If she can find the time–that farm mother.

Her favorite color is alfalfa green, By herself, she installs the porch door screen, The chicken house tomorrow she'll clean, Your friend and mine.....the farm mother.

She drives the truck and also the car, Speaks out on farm problems, near and far, And at night leaves her door just a bit ajar; In case her kids need their farm mother.

She may protest, but never riot, She'd love some peace, along with quiet, But probably won't get the chance to try it. 'Cause it's hectic being a farm mother.

She may never get a salute or award, Or a shiny plaque upon a board, But each night she prays and thanks the Lord, For the blessings given her, the farm mother.

Happy Mother's Day–to Mothers everywhere.

Cleaning guide available from PSU

UNIVERSITY PARK, Pa. - Now that it's Spring and time to do some extra cleaning, have you ever wished for some expert advice on the best and cheapest way to take care of your home and the things in it?

To help you find your way through the many cleaning processes and products, one of Penn States' Extension specialists' Helen Bell, has written a correspondence course on cleaning called the "Home Cleanliness Guide Course No. 179."

Dr. Bell emphasises the economical way to clean-economical of time, energy, and money. Whevever possible, she gives the directions and uncomplicated formulas for cleaning products you can make yourself to get good results and save many dollars.

To get the seven-lesson course that you can study at home and keep as a reference guide, send $4 to "Cleaning", Box 5000, University Park, Pa. 16802. Make checks payable to Penn State.

Shorthorn breeders meet

GREELEY, Colo. - Milking Shorthorn breeders from 25 states and Canada gathered here April 14-16 for the 29th Annual Meeting and National Sale of the American Milking Shorthorn Society (AMSS).

Brad Ellsworth, an attorney from Grass Valley, Calif., was elected AMSS President by the Board of Directors, and Jim Foss of Kenyon, Minn., was elected Vice-President. Foss; Marcia Schradle of New Providence, Iowa; James Scott of Burgettstown, Pa.; and Fred K. Bailey of Summers, Ark.; were all elected to their second term on the AMSS Board of Directors.

Dr. Charles Young, professor of dairy cattle breeding at the University of Minnesota, was named "Milking Shorthorn Person of the Year." He was cited by outgoing President Kenneth Alles for his outstanding contributions to the Milking Shorthorn breed through his work with the AMSS Young Sire Committee and other efforts.

The Society's highest honor, Progressive Breeder awards, were presented to five breeders with outstanding herd production.

A four-year-old cow consigned by Clayton DeForest of Bristol, Colo., topped the AMMS's National Sale at $1500. Red Bird Matilda's Tilly went to Tony Majerus of Homeplace Farms at Albion, Neb.

Buyers from 18 states took their selection of the 42 head that were offered. The cows averaged $906 and the 12 promotional heifers averaged $535.

The 1978 Annual Meeting and National Sale will be held next April in Springfield, Mo., national AMSS headquarters.

Bad roads boost driving costs by $265 million

HARRISBURG- Rough, rutted roads cost Pennsylvania drivers an extra $265 million a year in fuel, tire wear and vehicle repairs, says a new study.

Bumpy, broken pavement boosts driving costs by an average of 41 per cent a year over the cost of travel on a smooth road surface, according to The Road Information Program (TRIP), of Washington, D.C.

The research and information agency found:

- Thirty-per cent of Pennsylvania's 34,228 miles of main roads are deficient by federal inspection standards. This includes 7,830 miles rated "fair" and 2,438 miles rated "poor."

- It costs an average of 41.3 per cent more to drive on the "fair" and "poor" roads than on "good" roads, or 9 cents-per-mile versus 6.4 cents-per-mile.

- The state's drivers traveled 10 billion vehicle miles in 1975, the latest year of record, on "poor" and "fair" main roads at a total cost of $905.3 million. Had these roads been in "good" condition, the travel would have cost $640.7 million - a saving of $264.6 million.

The roads in TRIP's study are the arterial and collector systems. They account for 30 per cent of Pennsylvania's 115,187 mile total road system but handle 76 per cent of the traffic.

"Pennsylvania motorists are paying a premium to drive on uncomfortable, hazardous roads," said TRIP spokesman Henry D. Harral of Honeybrook, who announced the study finding.

Harral is a former secretary of the Pennsylvania Highway Department.

"Road agencies have fallen behind in road renewal in recent years because of a lack of funds," Harral said. "The problem is aggravated by the fact that nearly $100 million in road-user tax revenues are used for other state services."

Harral said the state needs to preserve and protect its roads to minimize maintenance costs and reduce the number of accidents where poor pavement is a factor.

TRIP estimates it would cost $1.3 billion to rebuild the 2,438 miles of roads in "poor" condition and $951.3 million to resurface the 7,830 miles of roads considered "fair." Many of the roads involved are eligible for federal-aid funds covering between 70 and 90 per cent of the total cost.

An adequate road renewal program is essential to keep pace with an estimated 16 per cent increase in traffic volume in Pennsylvania by 1987 says the study.

The recommended road improvements would last from 12 to 25 years depending on pavement type, thickness and foundation, traffic conditions, weather and terrain, says TRIP.

TRIP's findings are based on sceintific road tests that measured fuel consumption and tire and vehicle wear relative to the physical condition of the pavement in use. Road tests were conducted by Paul J. Claffey and Associates of Potsdam, New York.

The tests showed that drivers used up to one-third more fuel when stopping or slowing to pass safely over rough, broken pavement before resuming normal speed.

Driving on substandard pavement also increased tire wear by an average of 156 per cent a year and accelerated brake, steering and suspension system wear by an average of 72 per cent, according to the tests.

Soil Scientists return to the field

LANCASTER, Pa. – It is that time of year when once again soil survey parties like Donald Holzer and Boyd Custer can be seen in the fields continuing soil mapping (identifying a soil and delineating the soil area on a aerial photo).

Many people mistakingly believe that a soil survey comes to a standstill during the Winter months, but that's not true. Only the field work ceases but important work is accomplished during the Winter.

Such things as the writing of soil descriptions, the summarizing of field notes and the transfer of soil lines from temporary maps to more permanent sheets and more were done last Winter.

However, Spring is one of the best times for mapping soils, because the fields are relatively open and free of crops. Both Holzer and Custer, who work out of the U.S. Soil Conservation Service (SCS) Office, Farm and Home Center Building, Lancaster, agree that Spring and early Summer are the best times to review landforms and soils in particular.

So, once again these two men will be seen somewhere in Lancaster County doing the job they were asked to do by local government.

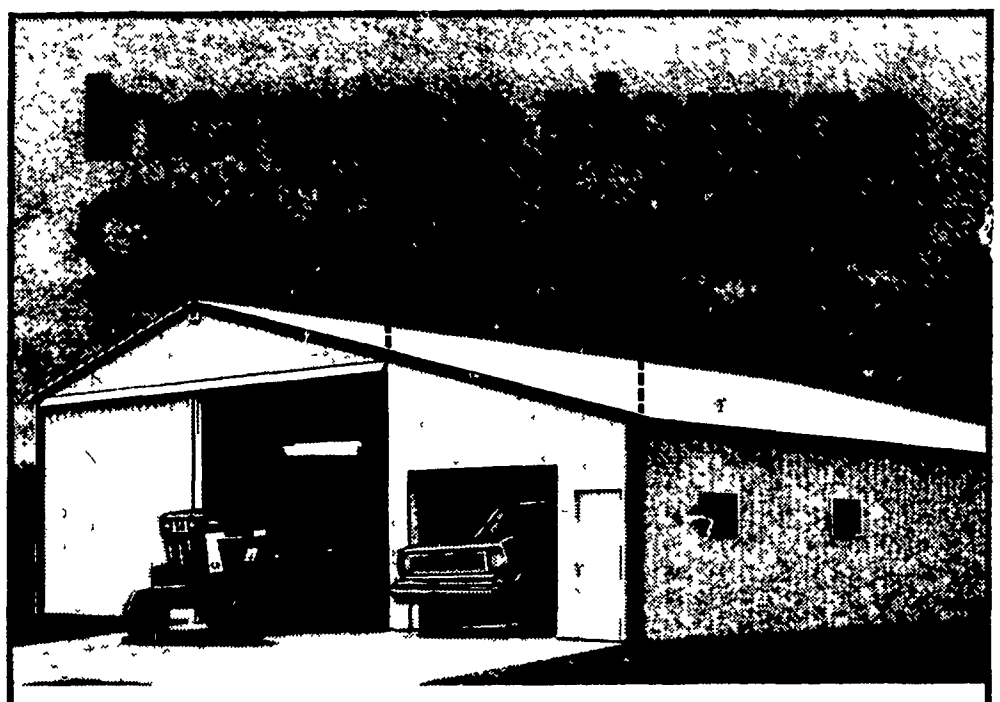
"Identification of a soil area by looking at the soil layers (horizons) from the surface down to five or more feet, is the name of the game," explained Custer. "The local people have in the past been quite cooperative in allowing us access to their land so that we can do our job, which means walking, augering, taking notes and often taking soil samples," Custer further adds.

Horticulture

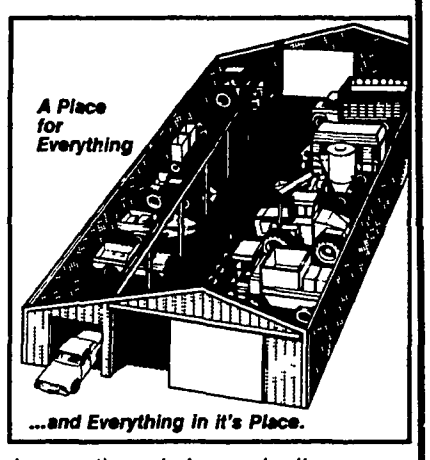
[Continued from Page 57]

state for further testing under the direction of Extension Specialists and County Agents," said Hepler. "These same people provide ideas to keep our research program in tune with the needs of farmers." Potato research and extension work, a responsibility of the Department of Horticulture since April 1, 1976 is typical, with much of the work conducted with cooperating farmers around the state.

"Our work in floriculture has a direct tie-in to extension programs", remarked the professor. "As the interest developed for green plants, we provided production schedules for greenhouse operators; as this demand tapers off in favor of flowering plants, we're ready with improved varieties. Our research on curtains for conserving heat and solar collection systems for greenhouses, projects involving several research departments, were inspired by concerns brought to us through extension personnel".



...at less than half the price per square foot!



It's quite a *buildings* — our Off-Peak Wide Span We say 'buildings' because that's what it is, two buildings in one.

The big, clear-span part is just what you need to store large, tall equipment — combines, 4-wheel drive tractors, hay balers and other super-size farm tools. The off-peak side bay gives you up to 50% more storage space to 'garage' smaller implements and vehicles — tillage tools, small tractors, trucks, cars, trailers, boats, the family camper, maybe a snowmobile or two A big, wide sliding track door in the clear-span section lets you move big machinery in and out easily, while the smaller door on the side bay endwall provides easy in/out access for smaller equipment without 'jockeying' the bigger stuff around to do it.

If you need a new building why not get the one that gives you *double utility*, plus more space at less cost. The Off-Peak Wide Span from Wickes Buildings — it's the best of both worlds.

ADA to promote soft drink mix-milk beverage

ROSEMONT, Ill. - What does a milk promotion organization do when the biggest per capita consumers of milk, children under 12, start switching to the newest beverage craze, powdered soft drink mixes? "Shake Up A Magic Cow" is American Dairy Association's (ADA) answer to the challenge. This 1977 Summer promotion will urge youngsters to use milk rather than water with their favorite mix, and stir or shake for a new taste treat.

According to ADA this promotion benefits the dairy industry by capitalizaing on the informal eating trend. This has led to childrens' freedom of beverage choice and the current popularity of powdered soft drink mixes.

A national survey indicates that children under 12, the largest group of milk drinkers, account for 37 per cent of all milk consumed as a beverage in the U.S. Yet, this important market is currently losing milk sales faster than any population segment.

This sales decline is accelerated by the rise in informal eating situations, in which youngsters have free and unsupervised choice of beverages. National statistics indicate that 70 per cent of today's in-home meals are informal with part of the family or only one member present. This results in family members having their own schedule of activities.

Homemakers still buy milk and put it in the refrigerator. But this dosen't mean it's on the table because most homemakers are working with two-thirds of the in-home eating takes place. Many other homemakers are involved almost daily in outside social and charitable activities.

Because today's eating occasions are a matter of individual choice, beverage companies have sharply increased advertising and distribution of soft drinks and powdered mixes.

According to Advertising Age these mixes have captured the number three position in beverage sales since entering the market in April 1976. They have become a $700 million business. Powdered mix advertising for major brands in 1977 will approximate $50 million with most ad schedules concentrated in the Summer months.

More money will be spent on advertising powdered soft drink mixes in 1977 than the combined non-brand and brand milk expenditures! This concentrated ad campaign cannot be countered by a broad positive campaign for milk. Direct response is needed. Normally this would consist of a competitive alternative aimed at increasing the occasions milk is used and frequency of its use. But the powdered mixes situation is unusual as ADA has found milk is compatible with its competition. Milk ... Mixes Prove Compatible ... Following its own taste tests with milk and powdered mixes, ADA presented the idea of combining the two.

A home economist pretested children from the Oakland School in Chicago on their reaction to milk combined with flavored powdered mixes. They served strawberry, cherry and orange milk drinks. Strawberry was the children's favorite flavor. (In rating the flavors according to their taste appeals, with nine being the optimum score, the children gave strawberry a 7.1; cherry-5.88; and orange-4.76.

The strawberry and cherry flavors also scored highest in surveys conducted by Fairmont Food demonstrators at 42 supermarkets in seven cities. One out of every two shoppers participated in the demonstrations bought milk and a powdered soft drink mix. In one of the stores where a demonstration was held, milk sales increased 19.6 per cent.

"Based on these surveys, we anticipate our "Shake Up A Magic Cow" promotion will be highly successful," says Grover B. Simpson, ADA's vice president of marketing services, "and will build future markets as youngsters drink mixes."

ADA is the advertising and sales promotion arm of the United Dairy Industry Association, an organization dedicated to increasing the sales of U.S. produced dairy products through its total promotion effort. This also includes the product and process R&D projects of Dairy Research Inc. and nutrition research and education programs of National Dairy Council.

ARE YOU RUNNING OUT OF HAY?

Replace hay with rye silage. If cut at the proper stage of growth rye silage can have as much as 24% protein. It is high in vitamins and fiber. Don't wilt it too much so it packs well for a good ferment. When wilted to dry, it overheats and you lose those valuable vitamins and digestible protein. Don't forget to treat it with IM - PRUV - ALL 303 silage compound for a fast 3 day ferment. IM - PRUV - ALL treatment on silage saves protein, vitamins, energy, and makes it very tasty. Your animals will love it.

Congress decides farm export embargoes

EDITOR'S NOTE: The following information is taken from the National Farmers Union's WASHINGTON NEWSLETTER, dated April 29, 1977.

WASHINGTON, D.C.- A House-approved bill, H.R. 5840, which extends the Export Administration Act of 1969, would require that Congress act affirmatively within 60 days before any Presidential action to impose an export embargo on farm commodities could become effective. The provision was inserted in the bill on the House floor on motion by Rep. Joe Skubitz (Kansas) and accepted on a voice vote. As it had come from the from the House International Relations Committee, the bill would merely have given Congress a 30-day veto power over a Presidential decision to impose an export embargo or controls. The Skubitz amendment will prevent an embargo from becoming effective unless affirmatively approved by Congress. Under the Committee version, Skubitz complained, the Congress chould have allowed the embargo to go into effect simply by failing to act within 30 days.

The Export Administration Act expired last Sept. 30 when Congress was unable to agree on an extension. However, President Ford continued the authority for export controls by executive order.

The new legislation is badly entangled in the controversy over the Arab boycott against Israel. A related Senate bill, S. 69, cleared the Senate Banking Committee on April 5 but has not yet been set for floor debate.

A second agricultural provision of the House bill would assure that foreign governments which purchase and pay for U.F. grains can store them temporarily in the U.S. without fear that export might be barred by a later embargo.

WHAT'S NEW

Emergency repair of pipes, tanks, plumbing, gutters, metals, wood, masonry, glass, and fiber can be made quickly with new hand-mixed epoxy product from Weil. To make a repair, an equal amount of material is taken from the rolls of light and dark material and this kit. The epoxy is mixed by hand rolling and applied without tools. It hardens without heat in one hour and, once it sets up, can be filed, sanded, drilled, and sawed. Screws can be tapped into it as well.

Epoxy Kit comes in a package that preserves unused portions. From Weil Service Products Corporation, 2434 West Fletcher Street, hicago, Illinois 60618.

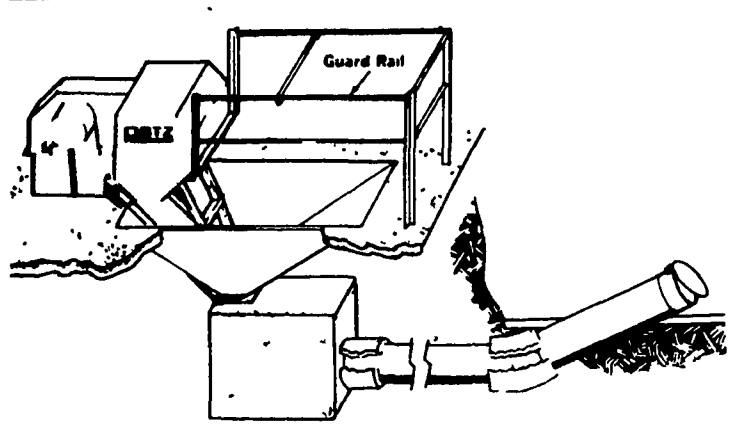
PATZ



MANURE PUMP

. . . Handles slurry-type manure and manure ranging from semi-solid to free flowing. Operates at 21 strokes per minute to move an approximate 1¼ cubic feet of manure per stroke to manure holding facility.

YES

21 Strokes Per Minute

Not just 6 to 10 as Hydraulics Advertise, and don't consider length of hydraulic cylinder, only measure length of cylinder sleeve; as nothing happens till manure is compressed, so on most hydraulics you only benefit from ½ the foreward stroke and nothing from back stroke, or only ¼ of energy is used to push manure.

ON A PATZ you have a hollow piston, so on back stroke cylinder sleeve is filled with manure and you get full benefit of foreward stroke. Also a PATZ is installed vertically so the piston arms action mix up the manure in 180 gallon capacity hopper. You don't have to stand there with a fork or 2 x 4 to push bridged up manure down into lazy-acting horizontal hydraulic cylinder.

YES — Every year hundreds of hydraulic BARN CLEANERS are replaced with continuous chain barn cleaners, because they were too slow, and too costly upkeep.

So before you buy, check PATZ roller chain reduction mechanical manure pump from

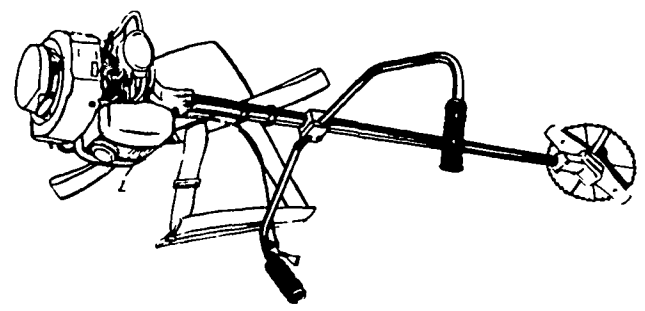
NOW AVAILABLE FOR RENTAL

The Hoffco Power Scythe is a portable powered light-weight machine designed to cut, trim and clear weeds, grass, briars, brambles and other similar vegetation.



Perhaps the best explanation of the Power Scythe is: It is a motorized scythe for cutting weeds and similar vegetation in areas that are inaccessible to other powered cutters on wheels and too much work for hand tools.

Prevent Fogging Easily - With "Grayco No-Fog Cloth"

Large size-17 in. x 18 in. complete with zip-seal storage pouch.

ONLY $1.19

Economical, Lasts For Years.

*A Necessity In Your Car . . . Wipe windshield and rear window with cloth before driving. One application can last all day long. Inside of your windshield stays crystal clear in rain, sleet, snow or hail. Even in worst weather, windshield won't fog up.
*A Real Convenience In Your Home . . . Kitchen: Simply wipe Cloth on windows and they stay clear, even when the kitchen fills up with steam from cooking and dish washing. Bathroom: Wipe mirror with Cloth once and bathroom windows and mirrors stay clear all day-even after a hot, steamy shower!
*Perfect to keep eyeglasses and goggles fog and mist free.

FREE REPLACEMENT GUARANTEE:
Buy with confidence. Your "GRAYCO NO-FOG CLOTH" must perform as advertised, fog preventing action must last for at least one year, or it will be replaced to you free of charge.

ANOTHER DEVELOPMENT FROM

MASTER MIX RESEARCH

NEW **Ensil-ate™**

Independently Research Tested and Proven Effective at the U of Georgia Experimental Station by Prof. Marshall E. McCullough, Chairman of the Department of Animal Science.

The Silage Preservative With A Real Difference

WHAT IS IT?

ENSIL—ATE is a silage additive designed to

- Reduce Rancidity
- Prevent Oxidation and Over-Heating
- Inhibit Mold Growth
- Increase Palatability of any Ensilage

ENSIL—ATE has its own feed value!

Protein 11 percent - Fat 2 percent - Fiber 35 percent

ENSIL—ATE Adds Highly Digestible Protein and Fiber in the form of ground soybran flakes

ENSIL—ATE prevents initial run off

- 10 lbs. of Ensil-Ate will absorb 40 lbs. water

ENSIL—ATE is perfectly safe to use and contains only all-natural proteins

ENSIL—ATE is backed by leading experimental stations as well as Master Mix Research

HOW IS IT USED?

ENSIL—ATE requires no additional equipment

It should be added to your silage at the rate of 10 lbs. per ton. Packaged in 50 lb. paper sacks, each bag will effectively treat 5 tons of silage. Simply spread the bag on the silage wagon before or during filling.

REMEMBER — You can mix 10 lbs./ton easier and more thoroughly than 1 lb./ton of silage that most additives require. ENSIL—ATE can also be added as the silo is being filled.

FOR MORE INFORMATION ON HOW TO PUT ENSIL—ATE AND SWEET BULK 'N FLAKES TO GOOD USE IN YOUR SILO THIS SPRING CALL OR VISIT YOUR MASTER MIX DEALER TODAY.

YOU'LL BE GLAD YOU DID!

Red Rose HORSE FEEDS

OFTEN COPIED NEVER DUPLICATED

RECOGNIZED FOR YEARS AS THE LEADER IN HORSE FEEDS
USED BY OUTSTANDING TRAINERS EVERYWHERE
THE COMPLETE LINE OFFERS A FEED FOR EVERY NEED -

RED ROSE SUPER HORSE

14 Percent Protein - flaked grains - contains every vitamin and mineral a horse is known to need.

RED ROSE CLASSIC

10 percent protein with flaked grains, some pellets and some meal - contains vitamins A, D, E and minerals.

RED ROSE ROUND-UP

A 12 percent protein pellet with roughage included - does not require hay - contains vitamins and minerals - horses love it.

RED ROSE TROPHY

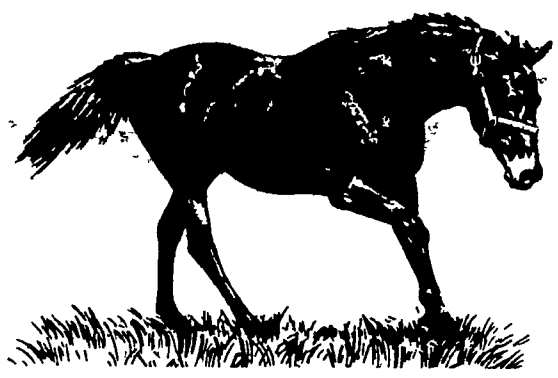
The reliable weight builder - cracked corn, crimped oats and molasses - trace minerals.

RED ROSE CHALLENGE

The economy 10 percent protein feed that has flaked grain, pellets, vitamins A, D, E and minerals and plenty of molasses.

RED ROSE SUPER FOAL PELLETS

17 percent protein and every vitamin and mineral a foal needs - extremely palatable to foals and will not draw flies in a creep.



RED ROSE EQUINADER

The protein - vitamin - mineral supplement to go with your grains, pelleted and palatable - contains every vitamin and mineral a horse is known to need.

RED ROSE HIGH SPIRIT

A vitamin-mineral supplement to be fed at the rate of four ounces a day for top performance, glossy hair coat, and resistance to stress.

Commandments on tractor safety

EDITOR'S NOTE: Below are some operator tips to help make this a "safe" crop season. They're provided by Gary Smith, Extension agricultural engineer at the University of Maryland.

Thou shalt present thyself to they tractor fit and ready to operate it well and safely, thus reaping a handsome day's work and good health.

THOU SHALT never permit a gear to turn nor a wheel to roll until all guards and safety devices are in place to shield thee from harm.

THOU SHALT require they small sons and daughters (and they neighbor's offspring) to keep themselves apart from farm machinery.

THOU SHALT hitch drawbar loads low and forsake wrapping chain or cable about the axle, lest they tractor wrap itself around its own axle and smother thee beneath.

THOU SHALT weight thy tractor's front to balance it if the drawbar be heavily burdened with such as a two-wheel spreader, and also place upon the rear sufficient weight to effect balacne when they tractor is encumbered with a front-end loader.

THOU SHALT faithfully cause thine eyes to remain open to discern precisely where thee and thy tractor are going and, furthermore, to spy hidden obstacles and other hazards so thou can avoid them.

THOU SHALT contain they temper, even though the day goes foul and everything attempted consprieth against thee, as robust anger not only maketh thee look foolish and exclaim unkind sentiments, but also multiplieth they propects of coming to grief by accident.

THOU SHALT diminish they speed on rough ground and when approaching ditches and turning corners, thereby smiting propects of thee supporting they tractor's weight with thine neck.

THOU SAHLT interrupt the flow of power before exploring, reaching or poking about in they machinery, if thou treasure they limbs.

THOU SHALT mind they manners on the roadway, acting courteously to highway travelers by not entering the roadway until after thou hath established that the way is clear, by always signalling what thou art contriving to do, and by decorating the rear of thy machinery with a SMV Emblem, to proclaim that thou art proceeding slowly.

THOU SHALT render they tractor out of gear and stoutly set the brakes before dismounting.

THOU SHALT NOT require nor permit they offspring to perform tasks without first ascertaining if they are capable in body and temperament and are sufficiently trained to operate a tractor without risk.

THOU SHALT enlist a protective cab or frame to assist thee in surviving should thy tractor tumble over despite thy good intentions.

THOU shalt respect they tractor, keep it well, and not demand more than it can deliver, nor require that it labor under burdens better suited to a huskier steed lest it repay thy maltreatment with low performance, mechanical troubles and accidents.

Strasburg, already well known for its railroads, adds yet another attraction of the sort this year with the opening of the Train Collectors Association Museum, above. Hundreds of old toy trains from the late 1800's are preserved here for their historic and educational value. The museum opens its doors for the first time on May 14. Hours are between 10 a.m. and 6 p.m. daily, including Sundays.

Brown Swiss Breeders name Youth Achievement Winner

BELOIT, Wis - The Brown Swiss Cattle Breeders' Association recently announced their 1976 Youth Achievement Winners. The Youth Achievement Award was initiated in 1974 to honor one outstanding Brown Swiss youth in each of the eight districts in the United States. The winners were picked from over 30 applicants by an anonymous committee. Winner in this area is Michael Simpson, 18, of Port Jarvis, N.Y. He is the son of Mr. and Mrs. Willis Simpson, own 25 Brown Swiss and is a master showman.

The applications were not identified by name or town, thus were judged completely on the applicant's merit. Some of the information requested on the application included the number of registered animals owned, classified and on official test, show participation and Brown Swiss and community activities and awards. They were also asked to tell of their duties on the farm and the influence Brown Swiss has had on their farm.

All of this year's winners help with the work on the farm whether it be milking, feeding, cleanup or field work. Also, all of the winners were 4-H or FFA members and recipients of several awards and honors. The Youth winners have exhibited their Swiss at county, district, regional or national shows.

For the first time this year, an overall Youth Achievement Winner was chosen. She was Janell Brehm, 16, of Loyal, Oklahoma, daughter of Mr. and Mrs. Guy Brehm. Janell, who was District VIII's winnter, owns 16 registered Swiss. All of her cows are on official test and classified.

Former consumer advocate says farmers have to get fair price

WASHINGTON, D.C. - Carol Tucker Foreman wants to have food prices remain the same, with a larger share of the food dollar going to the farmer. The new assistant secretary of agriculture for food and consumer services at USDA also wants everyone to know that the farmer is going to have to be given a fair price.

Mrs. Foreman, former executive director of the Consumer Federation of America, made the comments during a meeting with the Newspaper Farm Editors of America, gathering in the nation's capital last week for their 25th anniversary conference.

In office since March 25, Mrs. Foreman directs USDA's Food and Nutrition Service, which includes all of the Department's food assistance programs such as food stamps and school lunches. She is also in charge of the Food Safety and Quality Service, which has reponsibility for meat and poultry inspection and for standardization and grading of meat, egg products, poultry, dairy, fruits, and vegetables.

Very adamant about her belief that farmers will have to be given a fair price at the marketplace, Mrs. Foreman exclaimed that her attitudes have not changed since entering the U.S. Department of Agriculture as an assistant secretary. In addition to heading the Consumer Federation of America, she was also executive director of the Paul Douglas Consumer Research Center.

"Lots of studies have shown that the consumer does not blame the farmer for higher food prices," she emphasized, "but food prices are too high." She wants to see food prices stay the same with a larger share of the dollar going to the farmer.

On the subject of the federal grading system for beef, Mrs. Foreman said she was not really pleased with the changes which were implemented last year. But she offered that she doesn't want to further disrupt the market by making immediate changes. She acknowledged heavy comment from the industry regarding yield grades, concluding that "evidently the industry doesn't like it." The situation will be looked into, she assured.

One of Mrs Foreman's current concerns revolves around the use of sodium nitrites, and how it affects the poultry industry with such products as chicken hot dogs, etc. With poultry processing being a major business in Lancaster County, it could prove to be a topic of considerable impact on the local level. Sodium nitrite is used by the industry to give the meat a red, lean appearance. The use of the chemical has reportedly been kicked around by both USDA and the Federal Drug Administration for three years. Mrs. Foreman would like to determine under whose jurisdiction sodium nitrite use falls, since neither FDA or USDA are certain at this point.

Nominated on March 7 by President Carter to be assistant secretary at USDA, Mrs. Foreman was confirmed by the Senate on March 24 and sworn into office the following day.

Moisture meters to be tested

ANNAPOLIS, Md. - Maryland Secretary of Agriculture Young D. Hance has announced that his department is again offering an opportunity for grain producers, handlers, and buyers to have their grain moisture meter calibrated. Grain dealers, as well as farmers, are urged to bring all meters to one of the six locations listed below. "Early arrival," he said, "will insure adequate time for testing the meters," and added that, "charts used to determine moisture and the operator's manual or instructions should accompany the meters."

All of the locations listed are Extension Service offices in the respective towns. Tuesday, May 10, (8:30 a.m.-3 p.m.)-Salisbury (Corner of Parsons & Quantico Roads). Wednesday, May 11, (8:30 -3 p.m.).-Easton (Post Office Annex, Dover Street). Thursday, May 12, (8:30 a.m.-3 p.m.)-Centreville (County Building). Tuesday, May 24, (9:00 a.m.-12:30 p.m.)-White Plains (four miles South of Waldorf on U.S. Rt. 301). Wednesday, May 25, (8:30 a.m.-3 p.m.-Westminster (County Office Bldg. Annex, 55 N. Court St.). Thursday, May 26, (8:30 a.m.-3 p.m.)-Frederick (520 N. Market Street).

Hance observed that "the measurement of moisture in grain has always been and will continue to be a most important factor to the seller and purchaser. To the producer, it will reflect in the price he receives: to the buyer, it will determine his cost to prepare it for storage so quality may be maintained. With this in mind, every owner of a moisture meter should have their meter tested to insure optimum return from this phase of marketing."

ABS goes to straws

DEFOREST, Wis. - American Breeders Service headquartered here, announces that they are now making semen available in the French medium straw as a supplement to their glass ampule.

ABS has carried out extensive research on various straw packages since 1970. Hundreds of thousands of straws have been produced in the ABS+Canada facility for New Zealand and Austrailian markets. Thousands more have been processed at the company's Wisconsin headquarters for shipment to customers in many other foreign countries who preferred to use straws.

In addition, extensive and closely supervised field trials in the U.S., involving nearly 20,000 cows, were conducted.

FREY FREE STALL

LIFETIME FREE STALL HOUSING

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6" Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10" concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

- 8 Models all steel welded farm and feedlot gates
- 2 Models all steel welded head catch gate

The tent caterpillar is back

NEWARK, Del. - The tent caterpillars are back again. You can see their ugly nests along any country road now, or wherever the wild choke cherry grows.

This is one of the best known insects in our part of the country, yet many people confuse it with another "tent maker"-the Fall webworm. University of Delaware extension entomologist Dr. Dale Bray says one way to tell the difference, even from a car window, is by the tent or nest. The tent caterpillar seldom encloses leaves in its tent. The fall webworm, on the other hand, spins its nest around many leaves. Don't let the name of the Fall webworm deceive you-it's with us from late Spring until Fall, so you can't be sure of telling the two pests apart by the time of year.

Tent caterpillars feed on the cherry tree leaves for a few weeks, enlarging their tents as they themselves get fatter and longer. And then, on a warm day in May, they desert their trees-tents and all. They crawl about the countryside, sometimes climbing up the sides of houses and even entering homes. This understandably distresses homemakers, and such intruding caterpillars are likely to end up in the trash can.

Most of the rest find some dark, protected place where they can change from two-and-a-half -inch brownish caterpillars with white stripes down their backs into a resting or pupal stage. Each pupa is covered by a sulfur-yellow cocoon.

Come June, small reddish-brown moths will emerge from these cocoons and fly back to the cherry trees where the females will lay their eggs. Each female lays between 150 and 300 eggs, one next to the other, around twigs in such a way that they look very much like dark, brown, varnished collars. These eggs won't hatch until next year in late March or early April, when the cycle starts all over again.

Old-timers thought that the best way to control tent caterpillars was to burn them with a ball of flaming rags soaked in kerosene. Bray discourages this practice. Not only is this apt to set fire to the whole place, it harms the tree itself. It's better, says the entomologist, to spray or dust the tents with a small amount of some insecticide when the tents are small. Materials which are effective include Sevin, Imidan, Dylox or Orthene at labeled rates.

Non-chemical controls for the pest include destroying egg masses before April, hand destruction of webs and larvae now, or removing the wild fruit trees that harbor them. If you're going to destroy the nests, do this at dusk while all the caterpillars are gathered inside. When using insecticides, it isn't necessary to spray the whole tree-just cover the tent and the branches closest to it. In most cases the best treatment is to ignore the insect. In a few weeks, there'll be more leaves on the trees and all is nice again.

Lamb care discussed

YORK, Pa. - The York County 4-H Lamb Club held its April meeting at the home of Charla, Jon, and Susan Janney. Linda Ebaugh and Charla Janney assisted Tony Dobrosky in demonstrating and explaining the selection, feeding, and care of project lambs.

The tentative date for the next meeting is May 11 at the home of Donald Flory. The program will be washing show lambs.

May 20 deadline set in York for dairy princess applications

YORK, Pa. - The York County Dairy Princess and Promotion Committee has set Friday evening, June 24, for its annual pageant. Highlight of the evening festivities, scheduled for the 4-H Center near Bair, will be the crowning of the 1977-78 York County dairy princess.

Mrs. Leo Rutter, 53 Lightner Road, York, is coordinating committee plans for the June program. Entry forms for the pageant are available from Mrs. Rutter, or from county dairy farmers, and must be returned to her no later than May 20.

Eligibility requirements for contestants are:

-must live in York County.

-must be the daughter of a dairy farmer, dairy farm manager, herdsman, or dairy farm owner, or be the owner of more than one dairy animal prior to May 1.

-must have completed her junior year of high school prior to the pageant and not be 22 before December 31, 1977.

-must be single and never married.

-must have parent's or guardian's consent.

-former county winners are ineligible.

-county winner must attend Summer training seminar to participate in state pageant.

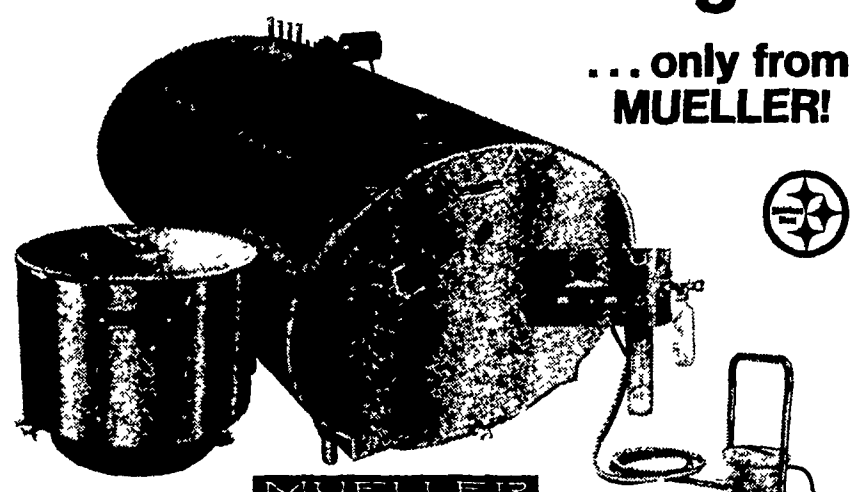
1. Free Hot Water
2. HiPerForm Cooling
3. Mueller-Matic Washing

...only from MUELLER!



MUELLER FRE-HEATER™ PATENT PENDING

1. ● Save energy and get FREE hot water by capturing the heat you're wasting when cooling milk!
● In the Fre-Heater, the refrigerant is routed to a specially designed condenser/heat exchanger and its heat is transferred to the water.
● A thermostatically controlled valve delivers 140° F water to the storage tank A mixing valve also delivers 'prepping' temperature water
● Tests indicate the Fre-Heater consumes 10% less power than an air-cooled system and you get Free hot water!
● Eliminates the most common causes of slow cooling cold-weather starting problems, and compressor failures because
1 There is no air-cooled condenser to become clogged or fans to fail or generate noise
2 The Fre-Heater is installed in doors
3 The head pressure is very stable assuring longer compressor life
● A Fre-Heater operating on 60° F well water will produce a volume of 140° F water similar to the amount of milk produced during a milking

MUELLER HiPerForm*

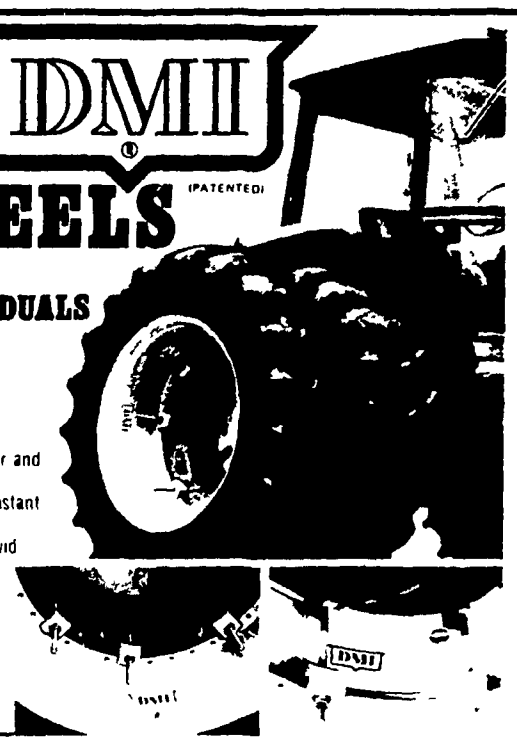
2. ● Patented refrigerant control system developed by Westinghouse
● Fast cooling — by combining the HiPerForm control system with the efficient Mueller Temp-Plate® evaporator (cooling plate) Split evaporator and controls for dual condensing units
● Gentle but thorough agitation aids cooling and an automatic interval timer assures uniform blend of temperature and butterfat
● Service-free dependability and longer compressor life due to unique control system and factory-sealed precharged refrigerant tubing
● Wall-mounted control cabinet for both cooler and Mueller-Matic controls
● Mueller Craftsmanship, 100% stainless steel construction, lower elliptical design and large radius corners for easy cleaning

*A refrigerant control system licensed under and covered by Westinghouse Patent 3,264,837 and perhaps others

MUELLER MATIC

3. ● If you're still hand washing your cooler, your valuable time is "going down the drain" with the wash water
● Simple, 3-step operation
1 Insert the jet-tube
2. Fill detergent container and check acid level
3 Switch unit "on" for automatic operation
● Daily use on thousands of dairy farms has proved that Mueller-Matic cleans the cooler consistently better than hand scrubbing
● Mueller-Matic gives your cooler a hot water pre-rinse, hot-water and detergent wash, hot water rinse, and a cold water acid rinse—all automatically
● Unique Mueller-Matic jet-tube spray action and precision-metered acid rinse sanitize every inch of cooler interior Milk stone build-up is eliminated and bacteria count is sharply reduced

durable dependable DMI® DUAL WHEELS (PATENTED)



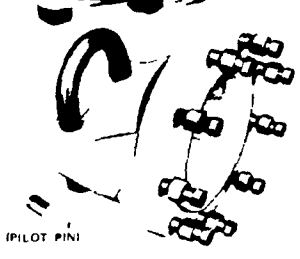
Lok-Rail™ HOOK-ON DUALS

● STRONGEST DUALS MADE
● INSTANT MOUNTING
● POSITIVE ALIGNMENT

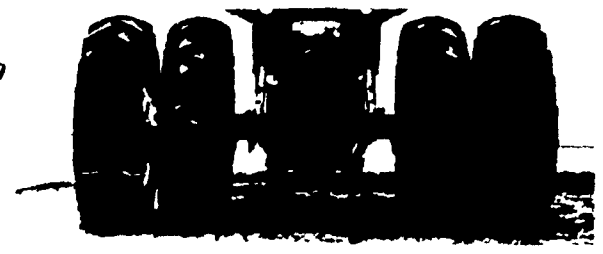
● Universal rims and fasteners to fit all regular and power adjust wheels with no welding
● Locking lugs on multiple hole rail permit instant mounting with no wheel alignment problems
● Fasteners angle slightly in each direction providing positive lock
● No dual slip when tractor shifts forward or backward
● Duals painted with rust retardant primer and finish coat
● 20 year guarantee on hook portion of fasteners

150plus™ axle mount Duals (PATENTED)

● New malleable iron hubs give precision Pressed Fit with tractor axle have extra thick outer flange with buttressed shoulders to put strength where it's needed between outer U Bolt and Dual Wheel ● 9 special grade 8 heat treated studs with lock nuts 1 deep in hub ● Double strength 9 hole wheels ● 2 high tensile strength 1 1/8 U Bolts hold hub to tractor and are spaced apart to reduce leverage stress



(PILOT PIN)



If you want to save money on new and used wheel sets, deal with Factory Direct Dist. Also we have many large tires at low prices.

Government suspected of price manipulation

CHICAGO, Ill. - A poll, conducted by International Harvester's FARM FORUM Magazine, indicates that almost three-quarters of farmers polled believe that the U.S. Government is actively involved in manipulating the prices farmers receive for the products they sell.

A total of 46 per cent believe that the U.S. will have a serious shortage of food within the next two to 10 years.

These and other conclusions are based on a random sampling of 1000 U.S. farmers who voiced their opinions on a variety of questions concerning food prices

In response to the question, "Do you believe the U.S. Government is actively involved in manipulating the prices farmers receive for the products they sell," 72 per cent responded yes. Another 22 per cent felt there was "some involvement." Only 5 per cent said there was little or no manipulation by the government.

When asked whether they felt food processors, wholesalers and-or retailers were involved in price fixing, 60 per cent felt food processors did engage in price fixing, 54 per cent felt wholesalers did, and 47 per cent believed retailers were involved . And 56 per cent of those interviewed felt that processors and food manufacturers were receiving more than their fair share of the consumer food dollar, while less than one per cent felt the farmer was receiving a fair share.

With the high price of food a major concern for most people, some 34 per cent of the respondents felt that increasing prices of farm products has hurt the image of the farmer. More than a third (36 per cent) felt it had somewhat hurt the farmer's image, and 23 per cent felt it had very little effect.

Despite the fact that the farmers blame processors, wholesalers and retailers for price fixing and receiving more than their fair share of the consumer food dollar, 50 per cent of the farmers believe that consumers blame the farmer for increasing costs. The farmers believe that government officials have the greatest influence on food prices.

Which one of the following do you believe has the most influence on food prices?

Government officials	38 per cent
Commodity speculators	19 per cent
Processors	18 per cent
Retailers	12 per cent
Wholesalers	8 per cent
Consumers	8 per cent
Shippers	1 per cent

Less than one per cent felt that farmers have the greatest influence. In most farmers' minds, consumer boycotts have very little effect in lowering retail food prices. In response to the question, "Are consumer boycotts effective in lowering prices of food at the retail level," the farmers answered as follows:

Definitely lower prices	17 per cent
Somewhat	27 per cent
Very little	33 per cent
No effect	10 per cent
No, they actually increase prices	13 per cent

On the other hand, some 43 per cent of the farmers felt that consumer boycotts definitely depress the prices farmers receive at the farm level. And 34 per cent felt these actions "somewhat" depress prices.

An alarming percentage (21 per cent) of the farmers said they were getting discouraged and might give up farming if the present trend for operating costs and market prices continues. Nine per cent felt they could only hang on for one more year. But almost half – 45 per cent – felt they would make it somehow, even though times are tough.

When asked if they felt the U.S. would have a serious food shortage in the very near future, the farmers responded as follows:

Yes, next 2 or 3 years	11 per cent
Yes, next 5 years	17 per cent
Yes, next 10 years	18 per cent
Yes, next 15 years	11 per cent
Not in this century	27 per cent
No, U.S. always will have plenty of food	14 per cent

Perhaps most important for the consumer, when asked if food prices at the retail level would rise or fall in the next 12 months, the farmers responded:

Rise 21-30 per cent	3 per cent
Rise 11-20 per cent	15 per cent
Rise 1-10 per cent	55 per cent
Stay the same	13 per cent
Fall 1-10 per cent	11 per cent
Fall 11-20 per cent	1 per cent

Yet despite the farmers' distrust of government influences and policies in agriculture; their feelings that processors, wholesalers and retailers are involved in price fixing; and their belief that the farmer is not receiving his fair share of the consumer dollar spent on food; the majority indicated a desire and an intent to remain in farming and do their best to insure that the U.S. would not face a food shortage.

Penn Willow elects officers

The Penn Willow 4-H club recently held its first meeting of the year to reorganize and elect officers. Jay Irwin, Lancaster County Extension Agent, attended the meeting.

The new officers are as follows: Sandy Dagen, Lancaster R6, president; Teresa Dagen, Lancaster R6, vice president; Donna Walton, Conestoga R1, secretary; Lorraine Huber, and Brenda Huntzinger, Conestoga R1, song and game leaders, and Pam Goss, Pequea R1, news reporter.

Representatives of the Lancaster County 4-H Council are: Sandy Dagen, Lancaster R6; Teresa Dagen, Lancaster R6; and Donna Walton, Conestoga R1.

The group's annual clean-up of trash will be held May 6. Members will meet at the Conestoga United Methodist Church at 6:30 p.m. They plan to clear trash from the sides of roads in the vicinity of Conestoga, Marticville, and New Danville. Al Goss, Pequea R1, is in charge of the project.

Antibiotic restrictions proposed

PRINCETON, N.J. - U. S. Food and Drug Administration proposals to severely restrict feed-use antibiotics pose a serious threat to America's livestock industry and hence to food supplies and prices at the consumer level, according to American Cyanamid Company.

FDA Commissioner Donald Kennedy announced at a press conference in Washington on April 20 that he would move to restrict the use of penicillin and tetracycline antibiotics in livestock and poultry feeds for disease prevention, putting them on veterinary prescription only for treatment of disease.

The new Commissioner's decision, first disclosed at a meeting of the National Advisory Food and Drug Committee (NAFDC) on April 15, came just eight days after he was sworn into office. Earlier, NAFDC recommended, without dissent, that tetracycline uses in animals not be restricted. The advisory group said the record did not support any change.

Cyanamid said it hopes further consideration of the mass of scientific data available, newly raised questions about substitute antibiotics listed by FDA, and the overwhelming importance of the tetracyclines for disease prevention will lead to a modification of the FDA position.

Tetracyclines have been widely used in livestock feeds since 1950 to prevent disease, resulting not only in healthier animals, Cyanamid said, but also in increased feed efficiency and growth.

Commissioner Kennedy said his action was based on the theoretical possibility that such uses would result in populations of antibiotic-resistant bacteria which could lead to human health problems. The Commissioner advised the NAFDC that, although he could not point to a specific instance in which human disease is more difficult to treat because drug resistance has arisen from an animal source, "It is likely that such problems could have gone unnoticed."

Cyanamid said that since chlortetracycline, the first of the antibiotic feed additives, has been in widespread use for 27 years, "We cannot agree that if such a problem had occurred it would have 'gone unnoticed' by American physicians."

Responding to the new Commissioner's "disappointment" that industry had not come up with other alternatives, Cyanamid pointed out that the search has been going on since 1950.

"Many new antibiotics have come on the market in the past 27 years," the company said. "The tetracyclines are still the most widely used because they are the most broadly beneficial."

The firm maintains a 640-acre agricultural research facility at Princeton, employing more than 400 scientists and technicians.

A USDA study, published in 1975, said banning antibiotics in livestock feeds could raise meat prices to U.S. consumers as much as $2.1 billion per year.

Restrictions similar to those proposed by the FDA Commissioner were imposed in England in 1971. Addressing the American Society for Animal Science in August, 1976. Dr. R Braude, University of Reading, England, said the British restrictions do not appear to have improved human health there. However, he said that, because of increased animal disease, veterinary prescriptions for antibiotics are about equal to the amount used in feed for disease prevention prior to the restriction.

Early warning system set up for plant pests

WASHINGTON, D.C. - Plant pests invading the United States will be less likely to become established because of a new early warning system to find them promptly and take rapid action against them, the U.S. Department of Agriculture announced last week.

The warning system, called "Project Pest Alert," establishes a 1200-mile detection belt around 16 major ports of entry that stand a high risk for offering a foothold to foreign plant pests. USDA's Animal Plant Health Inspection Service (APHIS) plans to expand the project to 39 locations within three years.

Specially trained APHIS inspectors will systematically survey about 1000 locations in each detection belt. The goal is to find invading plant pests quickly so that they can be eradicated before they do real damage to American crops and gardens. Inspections will concentrate on major foreign insects, nematodes, snails, and slugs that attack home vegetable gardens and farm crops-like corn, small grains, forage, soybeans, and citrus.

Project Pest Alert backstops the continuing aphis inspection of incoming vehicles, freight and baggage at airports, seaports, offshore islands, and border crossings. More than 100 million such inspections were done in 1976. There is a continuing risk, however, that pests can slip through port inspections and establish themselves in the port area. There they could build up large populations to invade the rest of the country.

Project Pest Alert also supplements the ongoing state-federal program to monitor plant pest damage and coordinate action to reduce it. This program already issues the Cooperative Plant Pest Report, which gives the status of the current pest situation. Findings of Project Pest Alert will be published in this report.

Popcorn up

Last year, U.S. producers harvested popcorn on six per cent fewer acres than in 1975, but came up with a record crop nonetheless. Execptionally high yields averaging 2,863 pounds an acre-up 443 pounds from 1975-caused the increase.

New total-vision cab

You'll have to sit in the new MF® cab to believe it. Visibility is fantastic! MF engineers designed the new total-vision cab with **7,336 square inches of window area** for a clear, unobstructed view in all directions . . . front, sides and back. The new total-vision cab has a brand new luxury seat that adjusts 6 ways to fit your weight and height. The **tilting, telescoping steering wheel** means no more reaching, no more straining . . . no more tired, aching muscles at the end of the day. There's also a full view instrument panel with easy-to-read universal symbols on warning lights and gauges. The electrically driven **two-speed ventilating fan** fills the new cab with filtered-clean, fresh air. During those cold winter months, you'll appreciate the big hot-water heating unit . . . it's standard equipment on the new MF 2770/2800. And to combat the scorching heat of summer days, **full cab air conditioning** is also available. An electrically driven two-speed windshield wiper with washer is standard equipment. And for a quieter ride under the toughest conditions, interior cab surfaces have been upholstered with a heavy, sound-absorbing urethane foam. Listening is believing too! An optional **AM-FM radio and/or 8 channel stereo tape deck** is available for your listening pleasure. Step right in and let your MF dealer show you around the total-vision cab of the new MF 2770/2800.

NFO selling cows as protest

CORNING, Iowa - Meetings have been held across the nation by members of the National Farmers Organization (NFO) to schedule sell-offs of dairy and beef cows as a protest against low prices for milk and for beef cattle.

The sell-offs, began on April 11, are being held at over 200 NFO livestock marketing facilities nationwide and are being coordinated through NFO's Dairy and Cattle bargaining departments.

"I am encouraging all NFO dairy producers to take advantage of this coordinated cow sell-off," commented Ed Grat, director of NFO's Dairy Department. Supply management is needed in order to get fair prices for dairymen, and culling of dairy herds is one method of supply management."

The price dairymen are now receiving for their milk in some areas is as much as $4.00 a hundredweight below what they need to meet their production costs and pay them for their labor and management, Graf said.

The future of the American cattle industry is even dimmer, according to Bill Sellhorst, Head of NFO's Cattle Department. Cow-calf men are losing as much as $150 a head on their 500 pound choice steers, which means cattle feeders need an additional $280 on 1000 pounds slaughter steers to be able to pay cowmen what they need and still clear a profit.

Despite these losses, Sellhorst says, the culling of herds across the country has slowed due to manufacutred optimism about Fall markets-more optimism than realism, Sellhorst says.

"The buyers are using numbers against us," said Sellhorst, "and have the upper hand. Our plan is to conduct organized sell-offs at our collection points until it becomes obvious to everyone that ranchers really mean 'No Price, No Production".

Sellhorst said cow sell-offs have already been held by NFO members in various areas and have met with excellent response and participation from producers. Cows already sold have been evenly mixed between dairy and beef and most have been with calf. All are going to slaughter in order to prevent them from reappearing in the markets later.

Free blood pressure tests available

LANCASTER, Pa. - You can have high blood pressure and still feel good. In fact, many people with high blood pressure have no unusual symptoms. They don't even know they have this disease.

The American Heart Association, Lancaster Pennsylvania chapter urges you to have your blood pressure checked. It is the only way to find out if you have high blood pressure. Stop in at one of the sites listed below for a free blood pressure check during the month of May: Pharmacy Labs, 355 W. King Street, Lancaster. Weekdays from 1:30 to 3 p.m.; Strasburg Pharmacy, 1 W. Main Street, Strasburg, Monday, Tuesday, Thursday, and Friday from 9 a.m. to 9 p.m., Wednesday and Saturdays from 9 a.m. to 6 p.m.; Sloan's Pharmacy, 61 E. Main Street, Mount Joy, Tuesdays from 2 to 4 p.m.; McElroy's Pharmacy, 100 E. Main Street, Lititz, Wednesdays from 1 to 4 p.m. and Fridays from 7 to 8:30 p.m.; Community Nursing Service, 459 N. George Street, Millersville, Mondays from 9 a.m. to 4 p.m.; American Heart Association, Lancaster Pa. Chapter, 246 W. Orange Street, Fridays from 2 to 4 p.m.; Willow Pharmacy, Willow Street, Third Tuesday (May 17) from 6 to 8:30 p.m.

Quarryville Drug Company, 15 E. State Street, Quarryville, Third Friday (May 20) from 2 to 4 and 5:30 to 7 p.m.; Rpyer Pharmacy, 2 E. Main Street, Ephrata, Third Wednesday (May 18) from 9 a.m. to noon and 6 to 8 p.m.; Manheim Township Ambulance Headquarters, Municipal Drive, Fourth Monday, (May 23) from 9 to 11 a.m. and 6 to 8 p.m.; Lancaster Osteopathic Hospital, Outpatient Clinic, during May which is hypertension month, every Tuesday from 9 a.m. to noon.

Box cars scarce

While boxcars and covered hopper cars are expected to be in generally good supply during 1977, freezing weather and drifting snow last winter have lowered barge grain loading and brought about significant shorages of covered hopped cars in corn and soybean producing areas. USDA economists warn that some shortages could develop once the May-June wheat harvest gets underway. At that point, the Southwest could face some interacting shortages of storage capacity and railcar space, as well as some short-lived congestion at Gulf ports.

Fast acting, long lasting, systemic sucker control!

There's really only one reason so many Lancaster County growers have switched to Royal MH-30: It does a fast, consistent job.

They watched it work in neighbors fields, saw the results of University trials, then proved it to themselves on their own acreage.

Royal MH-30 flows right into the plant and is working in half the time of regular MH-30, greatly reducing the danger of wash off from unexpected afternoon showers.

Yet even though it's significantly more efficient Royal MH-30 is relatively low in cost. Produces a high return for every dollar invested. It's easy to apply. 25-35 more effective than MH-30 and even kills small suckers that have emerged on tender fast-growing tobacco.

If you want full-season sucker control, use Royaltac to kill early suckers, then follow through with systemic Royal MH-30. Two outstanding products from the world's leading producer of tobacco growth regulants. Uniroyal Chemical, Division of Uniroyal, Inc. Naugatuck, CT 06770

Royal MH-30

UNIROYAL

As with all agricultural chemical products, Royal MH-30 and MH-30 should be used at label rates. University research has shown increased benefits from using excessive rate.

Union dues to be refunded

HARRISBURG - A group of workers employed by the state of Pennsylvania have won an important case to halt deduction of labor union dues from their paychecks. In the face of an unfair-labor practice hearing before the Pennsylvania Labor Relations Board, attorneys for the Commonwealth agreed to cease the union dues checkoff and the union attorney agreed to refund to the employees all dues deductions made since the initial dispute.

Pennsylvania Right to Work Defense and Education Foundation President James Scott II declared the union's capitualation "an important victory protecting individual freedom choice to belong or refrain from belonging to a labor union."

The case comes under provisions of Public Employee Relations Act 195, which is currently being studied by a special commision appointed by Governor Shapp. The Act gives workers employed by the Commonwealth the right to decide for themselves whether they want to join a union or not. Act 195 also permits "maintenance of membership" contracts which lock workers into union membership once they join the union, for the duration of the contract. A 15 day 'escape period" prior to the expiration of the contract is provided during which workers may resign from the union.

Timothy P. Miller and sixteen other workers resigned from the Pennsylvania Employment Security Employees Association union (PESEA) Local 675 during a strike-no contract period in 1975.

"Because Mr. Miller and others involved in the case resigned from the union during a period of no contract, the administration of the Bureau of Employment Security recognized the resignations and stopped union dues deductions from their pay," Right to Work Foundation President Scott explained.

"However, the union filed a grievance and arbitrator found that the Commonwealth had improperly halted the union dues deductions and that the affected employees must have double dues deductions made from their paychecks to make up the amount not deducted since their resignations," Scott continued.

"At that point the workers came to the Pennsylvania Right to Work Defense and Education Foundation for assistance. With attorneys supported by the Foundation, the decision was appealed to the PLRB which led to the agreement with the union and the Commonwealth," Scott said.

The Pennsylvania Right to Work Defense and Education Foundation is a public, non-profit foundation established in 1972 to provide assistance, upon request, to individual employees working through the courts to correct injustices and abuses arising from compulsory union membership.

False seed case settled

HARRISBURG - Agriculture Secretary Kent Shelhamer on Tuesday announced that the Ohio Seed Company of West Jefferson, Ohio, has paid $450.00 to settle a case filed against the firm under the Federal Seed Act in the U. S. District Court for the Southern District of Ohio.

The settlement came as a result of alleged violations in two shipments of oat seed and a shipment of timothy seed into Pennsylvania in 1973 and 1974, Shelhamer said.

The laboratories of the Pennsylvania Agriculture Department's Bureau of Plant Industry, in testing the seed from the Ohio Company, found evidence of incomplete labeling concerning the presence of noxious weed seeds at a prohibited level as well as false labeling in regard to the presence of pure seed, Shelhamer noted. He added that his department's findings were the major basis for the alleged violations in the court case.

"The Federal Seed Act, a truth-in-labeling law, is designed to protect farmers and other consumers when they buy seed shipped through interstate commerce," Shelhamer declared.

The Agriculture Secretary said it was his intention to see that the Bureau of Plant Industry "would not only continue its fine past record in farmer-consumer protection but would extend every effort to improve upon that record."

Shelhamer also pointed out the enforcement professionalism in the Ohio case demonstrated by the Agriculture Marketing Service of the United States Department of Agriculture which administers the Federal Seed Act.

"This kind of state-federal cooperation always works out as a plus for the public and I am going to encourage such cooperation at all levels of agriculture-related government," Shelhamer said.

Injury sparks help from neighbors

By DIETER KRIEG

LEBANON - A dozen of Hershey Bare's neighbors prepared the ground and planted corn for him this season. To Bare it's an event he won't forget. To those who left their farms in order to help Bare, it was just simply the thing to do during the time of a neighbor's need.

"They're a great bunch of guys, these fellows," Bare told **Lancaster Farming** on Tuesday afternoon when rain brought field work to a standstill. Bare has had back trouble for over a year and underwent surgery for it on March 31. Although the ruptured disk has been taken care of, he has to take it easy for a while yet. He was down for two weeks before the operation took place, saying that "I just couldn't fight it anymore."

So neighbors took up the fight for him. On Tuesday, when rain cut their efforts short, they had planted all but 14 of Bare's 80 to 90 acres of corn ground.

"Hershey would have done the same things for us," said neighbor Ray Sattazahn. "In fact he has already," added Albert Moyer. Others around him nodded in agreement. To them, helping a neighbor in need is nothing at all unusual.

A week earlier the community became involved in cleaning up the site of a barn fire. That same week some of the men also helped replace a roof which had blown off during a severe wind storm in the area.

One of the volunteers had donated 12 to 13 hours of his time by Tuesday afternoon. Many others had given five or six hours. Everyone came with equipment. Some neighbors sent tractors and hired hlep to operate them.

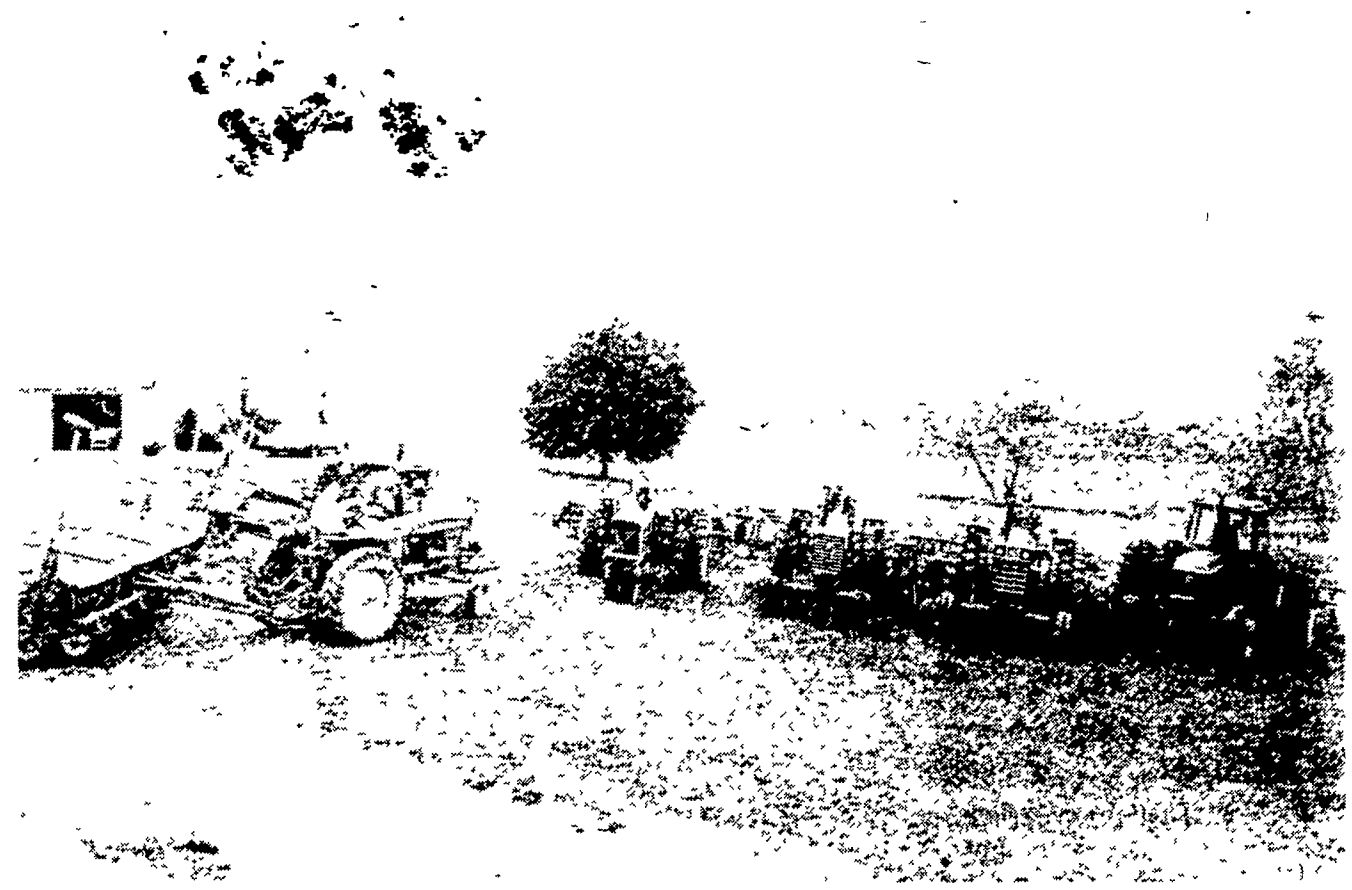
And it didn't stop there.

Wengert's Dairy heard about the neighborly project and had refreshments brought to the Bare farm by Mrs. Earl Shay, wife of the milk inspector. Mrs. Bare reciprocated by providing the men with lunch.

One of the circumstances which made Bare Especially appreciative of the efforts is that some hadn't planted much of their own corn yet. But he's done because of their help.

"If somebody needs a helping hand, we help him out," commented Sattazahn matter-of-factly. Moyer reportedly once held off on his custom work in order to help a neighbor. To them and the farming community as a whole, it's a part of living.

Helping Bare on Tuesday were Dennis Merkey, Clifford Groff, Albert Moyer, Ronald Kelchner, Mike Groff, David Heller, Ray Sattazahn, Ronald Lentz, Frank Reist, Robert Lentz, Vince Wagner, and Jeff Smith.



A parade of machinery assembled at the Hershey Bare farm on Tuesday to help the injured dairyman with his Spring fieldwork. Among those who pitched in to help were, (clockwise, starting with the tractor operator, lower left): Dennis Merkey, Clifford Groff, Albert Moyer, Ronald Kelchner, Mike Groff, David Heller, and Ray Sattazahn.

Rehrersburg 4-H club reorganizes

REHRERSBUTG, Pa. - The Rehrersburg Adventures 4-H Cloub met at the Tulpehocken Elementary School for the reorganization of the club for the coming year. The following officers were elected: Pamela Keeney, president; Melanie Caskie, vice president; Jayne Malsbury, secretary; Christine Rebman, news reporter; Alane Seiler, treasurer; Melissa Moyer, song leader; Jamie Batz, song leader, and Kara Seiler and Wendy Ziegler, game leaders.

The next meeting will be held on May 12.

Messick is president

BIRD-IN-HAND, Pa. - Mervin Messick of Messick Farm Equipment, Elizabethtown, has been named president of the Lancaster County Farm Equipment Dealer's Association.

In elections held during the group's meeting on April 20 at the Bird-in-Hand Restaurant, here, the following other officers were chosen: Earl Martin, ABC Groff, New Holland, vice president; Park Lefever, L.H. Brubaker Inc., Lancaster, 2nd vice president; and Clydeth Buch, Farmersville Equipment, Inc., Ephrata, secretary-treasurer.

Directors are: Roy Buch from Roy H. Buch, Inc.; C.B.Hoober, from C.B.Hoober and Son, Inc.; Ken Herr from A.L. Herr and Sons; John Rineer from Landis Brothers, Inc.; and Amos Stauffer from Stauffer Diesel, Inc.

Norlebco wins PP contest; Kirby Horst is top speaker

Norlebco's winning parliamentary procedures team is, front row, left to right: Gary Bender, vice president; Larry Gross, president; Scott Ritchie, sentinel; Arthur Swinehart, student advisor. Back row, left to right: Tom Seaman, secretary; Tom Donmoyer, treasurer; Mike Brajkovich, reporter; and Mark Tyrpin, chaplain.

By LAUREL SCHAEFFER
Berks County Reporter

LEESPORT, Pa. - Contestants representing several FFA Chapters met at the Berks County Ag Center, April 27, to participate in the Area Speaking and Parliamentary Procedures Contests.

The four teams which competed in the parliamentary procedures contest were: Annville Cleona; Northern Lebanon; Blue Mountain; and Tri-Valley. The winning teams: Northern Lebanon, 1st; and Annville Cleona, 2nd, will go on to the regional contest which will be held May 9th at the Lehigh County Community College, Schnecksville.

The judges for the contest were: C. F. Lebo, program specialist for the Pennsylvania Department of Education; R. Lee Henney, administrator for the Pennsylvania Fair Fund; and H. E. Givler, vocational consultant for the Pennsylvania Department of Education.

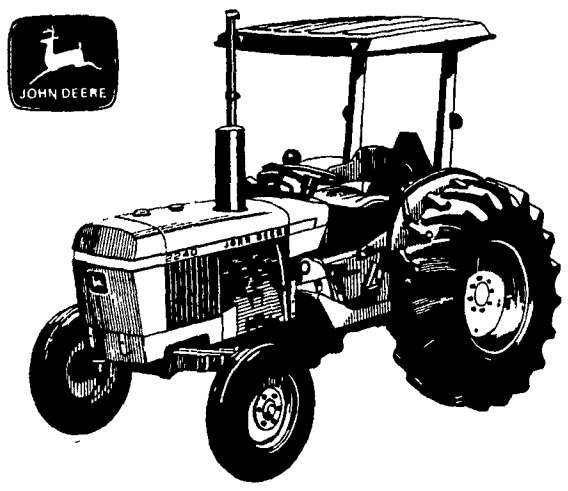
Seven Students representing six chapters competed in the public speaking contest, held at the same time as the other contest. The judges were: George J. Buchanan, auditor for the Pennsylvania Fair Fund; Mrs. Sally Hubner, vocational consultant for the Pennsylvania Department of Education; and Robert E. Gregory, Pennfield Corporation.

First place was awared to Kirby J. Horst of Eastern Lebanon FFA. His speech was entitled; "FFA Power - Sucessful Leadership" Second place - Wendy Shaw of Oley Valley FFA, "Your Future in Agriculture"; and third place - Norman Manbeck of Conrad Weiser FFA, "Problems and Opportunities" These speakers will also go to the regional contest May 9th.

The other contestants and topics were: William Romberger of Tri-Valley, "Dairy Farming - A Way of Life or a Way of Business"; Randy Behney of Northern Lebanon, "A Miracle in Our Time"; Michael Seltzer, Blue Mountain, "The Ocean Holds the Keys to Our Future"; and Robert Sauer, Blue Mountain, "What Are You Standing On?".

Kirby Horst and Wendy Shaw received first and second places, respectively, in the area public speaking contest.

John Deere 50-hp 2240



Its ultrawide job scope leaves few idle hours

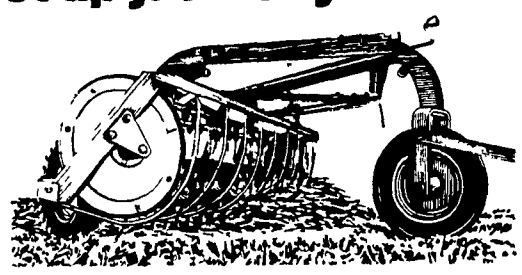
The John Deere 2240 — it's quite a tractor It's fully prepared to serve as the sole power unit on many farms and add new vigor and versatility to most any operation

This John Deere 2240 is ready — without extra-cost "add-ons" — to take on most any hitch-mounted, drawn, PTO-driven machine job That's only the beginning of a huge array of 2240 "can-do's" Many more base-price features expand and broaden the 2240's job scope to include most every job on your farm

This tractor is so well suited to such a wide variety of jobs, that you'll be amazed how often you favor it over other, possibly larger, tractors The 2240 — it'll see few idle hours, and many highly productive hours

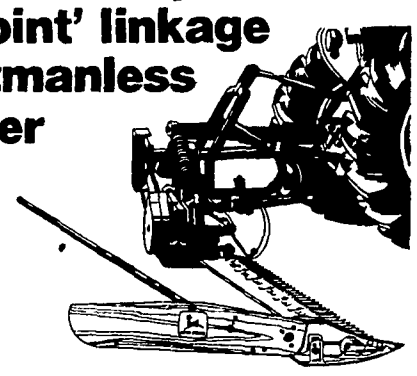
See us today for more details on this "seldom idle" John Deere 2240 Tractor

There's an 8½-foot 660 Rake here... set up just for you



Rake all the hay laid down by a 9-foot mower or 9-foot mower-conditioner And do a good job of it with a 660 Rake You get five bars standard, choice of heavy-duty steel tine teeth or rubber-ball-joint teeth

Discover the unique 'fourth-point' linkage on our pitmanless 350 Mower



The 350 attaches to your tractor's 3-point hitch and (with a chain) to the drawbar. This unique fourth-point linkage and double framing provide faster, higher cutterbar lift. It's simple and quick to hook up.

Richard Glatfelter poses with his team of horses and carriage. Glatfelter organized the carriage parade that toured the Lititz area last Sunday. One stop on the route was the Stanley S. Stephen farm near Lititz, where this picture was taken.

Carriage parade tours country and city

By JOANNE SPAHR

LITITZ, Pa. - The refreshing, cool wind was streaming through their hair, their noses were getting slightly sunburned from the warmth of the sun's rays, and whole families-grandparents, children, and grandchildren-were just generally enjoying the feel of taking their ponies and horses for a carriage ride. The day-last Sunday. The event-the 12th annual Lancaster County Horse and Pony Drive held by the Red Rose Horse and Pony Club and headed by Richard Galtfelter, 451 Petersburg Road, Lancaster.

Glatfelter has been organizing carriage drives through Lancaster County for 12 years now, although the club has only been in existance for eight of those 12. This year, Glatfelter routed the parade over country roads leading to and from Lititz, beginning at his farm. There will be 12 or 13 more drives such as this in other parts of Pennsylvania throughout the year with each drive usually 12-15 miles in duration.

"We can put well over 1000 miles on these animals in a year," Glatfelter commented.

Previously he had also said, "This is a family-type club and drive, and a small child driving a little cart is as welcome in the drive as a stately four-in-hand coach."

Fifty-one carriages took part, coming from places as Mechancisburg, Carlisle, Allentown, Spring Glen and New Jersey. Almost all were club members.

"One thing about this club," pointed out Glatfelter during a brief rest in Lititz Springs Park, "We don't have any competition-it's just for pleasure."

The big draw for the members is the common interest shared by all, and the good, wholesome family atmosphere.

"A club like this is something that grandparents and grandchildren can share in," Glatgelter noted.

On Sunday's drive, two carriages boasted, "We (the mules) drove a Bicentennial wagon from the state of Washington." One of the teams, owned by Marshall Jones, Westtown, was comprised of a mule from a Washington wagon train and one from an Alabama train.

Other scheduled drives of the Lancaster County Horse and Pony Club will take place near Schaefferstown, Millersville, Lebanon, Pottsville, Stouchsburg, and approximately seven other towns and cities.

Chester Co. PFA signs 1000th member

WEST CHESTER, Pa.—Dennis Derr, orchard manager of Highland Orchards, 1000 Thorndale Road, West Chester, became the 1000th family member to join the Chester County Farmers' Association recently. Derr, who is also roadside manager for the orchard, joined for several reasons, according to his wife.

"He heard about the organization and realized its value to growers and farmers," she said, pointing out that he was particularly impressed with the organization's legislative effects.

Eugene McDowell, regional organization director for southeast Pennsylvania, noted that of all the 300 lobbying efforts in the government, PFA has been rated one of the 10 most effective by legislators.

The organization in its entirety has 21,000 members in the Commonwealth and strives to be voluntary information organization which is due supported and farmer controlled.

Poultry people to discuss energy

LANCASTER - A symposium on the conservation of energy in the poultry industry will be held here at the Farm and Home Center next Wednesday. $10 registration fee is required.

The meeting will cover practical talks on insulation, ventilation, building construction, intermittent lighting, nutritional aspects of energy, improved methods of management of energy in broiler raising, pullets, layers and poultry processing plants.

Lancaster County Extension Agent Jay Irwin will be in charge of the day-long proceedings, which begin at 9 a.m. and end at 5 p.m.

Following is a complete schedule of the program.

9:00 a.m.-Registration-$10 per person; includes lunch: send name and business address to Jay Irwin, Farm and Home Center, Lancaster.

9:25 a.m.-Welcome by Dr. Kenneth Goodwin, Head, Department of Poultry Science, The Pennsylvania State University.

9:35 a.m.-Current & Future Use in the Poultry Industry, Dr. Tony Stemberger, Agricultural Economics, PSU.

10:05 a.m.-A Checklist for Energy Use on a Poultry Farm, Dr. Floyd Hicks, Chairman, Science Extension, PSU.

10:35 a.m.-Nutritional Aspects of Energy Conservation, Dr. Richard Peacock, Pennfield Corporation, Lancaster.

11:10 a.m.-Question and Answer Period

11:30 a.m.-Break for LUNCH Special free time in this symposium to get acquainted.

11:40 to 12:55 p.m.-Lunch in Farm and Home Center-(Included in Registration fee)

1:00 p.m.-Intermittent Light for Layers, Prof. Charles Ostrander, Poultry Extension, Cornell University, Ithaca, NY.

1:30 p.m.-Improved House Construction and Insulation, Dr. Joe McCurdy, Prof. of Agricultural Engineering Extension, PSU.

2:00 p.m.-Energy Conservation in Poultry Processing, Bill Kulp, Pennfield Corporation, Lancaster.

2:30 p.m.-Coffee Break and Social Time

3:00 p.m.-Manage Ventilation to Save Energy, Bob Mieczowski, president, Vent-O-Matic, Tuscarora Electric Mfg. Co., Inc., Tunkhannock, Pa.

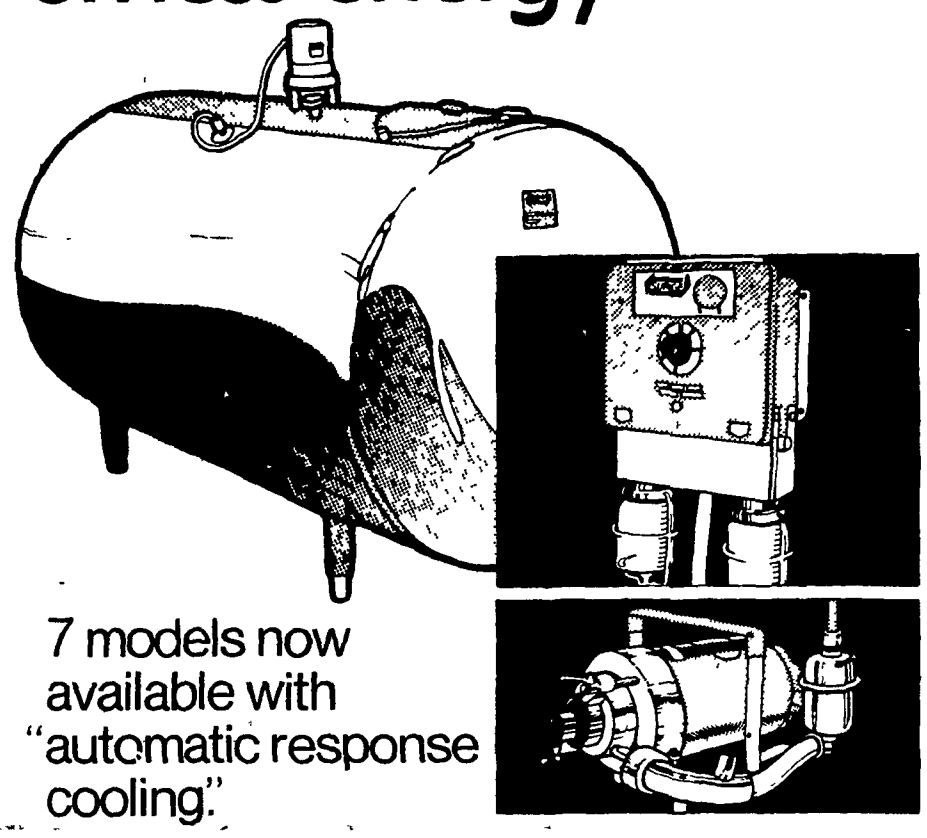
3:30 p.m.-Managing Broilers to Reduce the cost of Energy Used Per Pound of Broiler Produced, Phil Walbert, Bayshore Foods, Inc., Easton, Md.

4:00 p.m.-Alternative Sources of Energy, Dr. Bob Aldrich, Prof. of Agricultural Engineering, PSU.

4:30 p.m.-Question and Answer Period

5:00 p.m.-Adjourn

The tank that maintains peak quality on less energy...



7 models now available with "automatic response cooling."

If you've been waiting for just the right milk tank deal to come along, you just found it A new Surge ARC (Automatic Response Cooling) tank with a Surge Automatic Tank Washing System

This new line of tanks offers all the features you'd expect in a quality milk tank, and then some Features like rugged, easy-to-clean white vinyl exteriors or the unique refrigerant control which saves energy and prolongs compressor life because it allows the refrigeration unit to operate at peak efficiency.

Choose from any one of 7 models with capacities ranging from 500-2000 gals with a Surge automatic washing system that could easily save you up to 250 man hours a year cut your detergent bill, and save on energy Call us today

Drought committee formed

WASHINGTON, D.C. - Four heads of executive departments and agencies involved in handling aid to drought areas met April 26 at the White House and formed a Drought Emergency *Coordinating Committee.*

Signing the memorandum of agreement forming the committee were Secretary of Agriculture Bob Bergland, Secretary of the Interior Cecil D. Andrus, Secretary of Commerce Juanita M. Kreps, and Administrator A. Vernon Weaver, Small Business Administration (SBA). The committee consists of a representative designated by each of the four principals. Representing Secretary Bergland and serving as committee chairman will be Dr. M. Rupert Cutler, assistant secretary for conservation, research and education. The committee executive secretary will be the administrator of the Federal Diaster Assistance Administration (FDAA) or his designee.

The memo established a uniform procedure for designating Emergency Drought Inpact Areas (EDIA). The governor of a state may request that the committee designate all or part of his state as an emergency drought impact area, the committee secretary will record it and publish it in the Federal Register. Designation of an area will make it immediately eligible for available aid from SBA and the three departments. If a committee member objects to such a designation, the committee will forward the request for designation to each individual agency for independent action.

One of the first actions by the committee was to publish a list of 24 states and some 1,200 counties that are potentially eligible for emergency drought assistance.

The listing of eligible areas includes all areas previously designated for drought assistance by FDAA,SBA, the Farmers Home Administration and Agricultural Stabilization and Conservation Service of the U.S. Department of Agriculture, and areas in which Interior Department Bureau of Reclamation projects are located.

The committee stressed that designation of a county at this preliminary stage does not confer automatic entitlement to drought aid. Individuals or communities still must meet separate egilibility requirements established by each agency.

The new procedure will reduce the time required by state and local governments to obtain an emergency designation from each of the separate federal departments or agencies. A single request-if approved-can clear the way for emergency assistance from all affected agencies.

Governor Milton J. Shapp has proclaimed May 15-22 "Resource Stewardship Week." In the above picture, Gov. Shapp signs the proclamation. With him are: (seated, left) Oliver Swartz, chairman, Resource Stewardship Committee; (right) Clifford McConnell, deputy sec., DER; Standing, (left to right) Kent Shelhamer, Secretary of Agriculture; and Walter Peechatka, DER.

Poultry health committee to meet

WASHINGTON, D.C. - The Poultry Health Advisory Committee of the U.S. Department of Agriculture (USDA) will meet May 12-13 at the Federal Building, 6505 Belcrest Road, Hyattsville, Md. The meeting preceded on May 4 with a special subcommittee meeting on disease outbreak quarantine restrictions.

The committee advises the Secretary of Agriculture on the policies and procedures necessary to prevent or control poultry diseases, and helps obtain cooperation from all segments of the industry to improve the health of poultry and other birds.

At the May meeting, subcommittees will report on proposals on "avian influenza," "mycoplasmosis" and "quarantine restrictions during outbreaks." U.S. Customs Service officials will discuss what can be done to help prevent smuggling of cage birds into the country. Smuggling is the major source of new introductions of exotic Newcastle disease into the U.S. and is a constant threat to poultry, fancy fowl and pet birds.

Chairman of the committee is Bob Meyer, assistant secretary for marketing services. Vice chairman is Dr. Francis J. Mulhern, administrator of USDA's Animal and Plant Health Inspection Service (APHIS). Executive secretary is Dr. John W. Walker, APHIS senior staff veterinarian for poultry and swine diseases.

Both the subcommittee and committee meetings are open to the public. Any questions should be directed to Dr. Walker at (301) 436-8487.

Bees busy

U.S. honey production in 1976 at 199.8 million pounds, a gain of 1 per cent over a year earlier. Three per cent more-or 4.3 million-colonies produced the 1976 crop, average yields dropped nearly a pound to 46.4 pounds per colony. Grower prices for the 1976 honey crop dropped slightly to just below 50 cents a pound, for a total crop valued at $99.8 million. Meantime, beekeepers averaged $1.12 for a pound of beeswax-10 cents over the 1975 price.

Goats going strong

In stark contrast to the dwindling sheep population, the Texas inventory of goats and kids registered a 16 per cent increase during 1976. The Crop Reporting Board estimates total goats and kids on hand as of January 1, 1977, at 1.3 million. The inventory value rallied for a 46 per cent increase to $32.5 million, as average value per head jumped $5.10 from a year ago to $25.

NEW... STORMOR EZEE-MATIC 160

The revolutionary, portable, batch or continuous-flow grain drying system that dries grain for less.

The Stormor EZEE-MATIC 160 was designed for the grain producer who demanded the cost efficiencies of a stationary system, but needed the flexibility of a portable dryer. The Stormor EZEE-MATIC 160 does both jobs well.

Efficient, low-cost drying is accomplished through the unique "reverse grain flow" system. This system assures there is no over-drying, no hot-spots, no trash build-up.

The Stormor EZEE-MATIC 160 can be set for either batch or continuous-flow operation with capacities up to 160 bu. per hour at 10 points moisture removal.

Kaufman to head ASCS

HARRISBURG, Pa. - Carl L. Kaufman has been temporarily named Pennsylvania Director of the Agricultural Stabilization and Conservation Service (ASCS). This position is subject to appointment of a Pennsylvania State ASC Committee.

In this position, Kaufman will direct the operations of the Pennsylvania ASCS activities in Harrisburg. In addition, he will direct the State-wide operations of ASCS through 66 County ASC Committees who maintain 58 county offices throughout Pennsylvania.

ASCS administers agricultural programs authorized by federal law. Among programs administered by ASCS are the Agriculture Conservation Program, Price Support Programs, Wool Incentive Program, Disaster Assistance for Feed Grains and Wheat, and USDA Emergency Programs.

Carl L. Kaufman has replaced Kenneth H. Boyer who resigned on April 22. Boyer has retired and will remain active in his farming operations at Selinsgrove, Pa.

Research funded

WAHINNGTON, D.C. – Grants for plant genetic vulnerability research totalling $300,000 were announced April 29 by the Cooperative State Research Service, U.S. Department of Agriculture. The grants will go to scientists at five state agricultural experiment stations.

Strasburg opens mini bank

The First National Bank of Strasburg officially cut the ribbon to open a mini-bank in Lampeter on April 27. The office offers walk-up and drive-in services daily from 8 a.m. to 8 p.m. and on Saturdays from 8 a.m. to 2 p.m. Pictured above are, left to right, William Musser, Jr., chairman of the board; John E. Burkholder, chairman of the bank's building committee; A.F. Witmer, honorary director; and John W. Jones, president.

Country style kept

Early this year, USDA established a new standard for pork products bearing labels such as "country", "country style," or "dry cured" ham or pork shoulder. The reason: To help maintain those "country-cured" characteristics-including taste and texture-traditionally associated with products which, years ago, were preserved by applying salt and removing natural moisture through drying or aging under natural climatic conditons. The new standard defines products like "country style ham" or "dry cured pork shoulder" as uncooked, cured, dried, smoked or unsmoked meat products coming from a single piece of ham or shoulder. These items, which must meet specific preparation requirements, also must be capable of being distributed without refrigeration and weigh at least 18 per cent less than before curing. To allow processors time to adopt new processing techniques, get new labels approved, and market their current stock, the new standard won't be required until July 1, 1978.

Ag sales to Reds to be $2.4 billion

WASHINGTON, D.C. - According to the U.S. Department of Agriculture, the United Sates exported $3.3 billion worth of agricultural products to communist countries in fiscal year 1976 ended last September 30. This was a record amount and a 22-fold increase over the $147 million exported to communist countries only six years ago in fiscal 1970.

Due to the large grain harvest in the Soviet Union last year, U.S. exports of farm products to communist countries will decline in fiscal year 1977 which began last October 1, but will remain at a relatively high level - presently estimated at $2.4 billion.

Although exports to the communist countries account for only 10 to 15 per cent of all U.S. exports of farm commodities, they provide impetus to overall export sales and are regard as being important to American agriculture.

Nearly all U.S. exports of agricultural products to communist countries in fiscal year 1976 went to the Soviet Union or other communist countries in Eastern Europe. Exports to Red China were minimal. This same pattern is expected to continue in fiscal year 1977.

U.S. exports of agricultural products to the Soviet Union in fiscal year 1977 are expected to be about $1.3 billion; down from last year's record $2 billion. Exports to Eastern Europe, however, are expected to be down less - from $1.3 billion last fiscal year to $1.1 billion in fiscal year 1977. Barring some unexpected development, sales to Red China will be minimal again in fiscal year 1977.

The potential exists for even greater exports of U.S. farm commodities to communist countries in the future, says USDA. Provided the U.S. follows the right farm and trade policies, there is no reason why U.S. exports of agricultural commodities to communist countries should not be averaging $5 billion a year by the early 1980's.

"By the right policies, I mean a continuation of the kind of farm policy which has prevailed in the U. S. since 1971 - e.g., a market-oriented production guided by freely moving market prices, with government commodity loan rates set at levels which do not hamper the development of export markets," said Richard Bell, former assistant secretary for USDA. "By the right trade policies, I mean giving products of communist countries an access to the U.S. market equal to that now available to most other countries."

"The Soviet Union has been and will contine to be the leading market for U.S. farm products in the communist world," Bell continued. "We have sold the Soviet Union approximately $4 billion worth of farm products since the market was opened in mid-1971." The Soviet Union the third most important export market for U.S. grain, being exceeded only by the European Community (the European Common Market) and Japan.

In its new 5-year plan which began in 1976 and spans the period 1976-80, the Soviet Union has lowered its sights with respect to increasing livestock production. For example, annual meat production in the Soviet Union in 1976-80 is expected to average only seven to 11 per cent higher than in 1971-75; and the increase in egg production is expected to be only 13 to 18 per cent. Grain production, meanwhile, is projected to increase by 18 to 21 per cent; and sunflower seed production is expected to increase 27 per cent.

The Soviet Union probably will be fortunate to average 200 to 205 million tons of grain production per year in the 1976-80 period. This means the Soviet Union is likely to need to import on average between 10 and 15 million tons of grain a year during the period.

The long-term Grain Supply Agreement concluded between the United States and Soviet Union a year ago last October provides the U.S. with a framework whereby the market for U.S. grain in the Soviet Union can be further developed in the future. There is no reason - if the policies are right - that the United States should not be selling the Soviet Union on average nine to 12 million tons of grain a year by 1980.

Many of the basic facts and trends apparent in the Soviet Union are also true in the other communist countries in Eastern Europe. The region is a large net importer of grain as well as oilseeds and oilseed products.

Net imports in 1976-77 are expected to be around 10 million tons and the U.S. should provide 8 million tons of these imports. The East Europeans have already bought 5.7 million tons of U.S. grain for shipment in 1976-77.

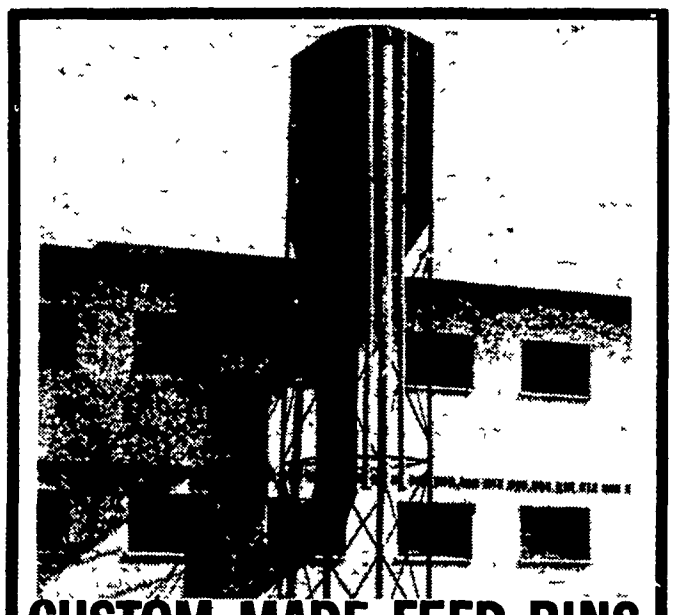
To date, U.S. exports of oilseeds and oilseed products to Eastern Europe have been mostly soybean meal. The U.S. shipped a million tons of soybean meal to Eastern Europe in 1975-76. This trade can be expected to grow as the East Europeans increase their livestock production and efficiency. Poland has been buying edible soy protein from the U.S. this past year, and the product has wider market development prospects elsewhere in the region.

The Agriculture Department has been using short-term export credit from the Commodity Credit Corporation to help develop the market for U.S. farm products in Eastern Europe. Constraints imposed by the Congress limit use of this credit to Poland, Yugoslavia and Romania.

Red China traditionally has been one of the world's great wheat importers. It also sometimes imports coarse grains and soybeans, while continuing to export rice, and occasionally soybeans. The soybean exports are mostly food beans destined for Japan.

Annual imports of wheat by the People's Republic of China have averaged about 4.5 million tons during the past five years. Coarse grain imports, on the other hand, averaged less than a million tons a year during this period.

The potential exists for must larger U.S. agricultural trade with communist countries, particularly in U.S. exports of farm products to them. But this potential can be fully realized only if there is an improvement in overall trade with the United States and the communist countries. This means that they must be given a better opportunity to sell their goods in this country, and this means a lowering of U.S. tariffs that now exist against their goods, concludes Bell.



CUSTOM MADE FEED BINS

- Made of 14 Gauge Steel
- Longer Taper for Easier Flow
- All welded seams which make it water proof and rodent proof
- Can be installed inside or outside building
- Most installations can be made without auger.

Bergland praises cooperatives

EDITOR'S NOTE: The following information is taken from the National Farmers Union's WASHINGTON NEWSLETTER, dated April 29, 1977.

WASHINGTON, D.C. - "As a farmer who uses cooperatives, I know their value," U.S. Secretary of Agriculture Bob Bergland said in a pplicy statement on cooperatives. "I have both a public and a personal interest in stating that the Department's policy is to offer maximum encouragement and support to family farmers and their cooperatives."

Bergland directed administrators of all USDA agencies to demonstrate that USDA "is now and always will be an advocate of cooperatives."

He said that this support should be reflected through expanding cooperative development, strengthened research and technical assistance, promotion of the knowledge of cooperative principles and practices, making full use of cooperatives in farm programs, and providing loan funds to cooperatives.

"Few acts serve our farmers as well as the Capper-Volstead Act of 1922 and the Cooperative Marketing Act of 1926," Bergland said.

Bergland's reference to using cooperatives more fully in farm production and income programs is significant in that he recently proposed that the right of cooperatives to obtain CCC loans on behalf of their producers should be extended to wheat and feed grains. Pool loans are now

Robert Bergland

available on cotton, rice, honey, and soybeans.

This is the first major reaffirmation of the USDA commitment to farm cooperatives since August, 1963, when Agriculture Secretary Orville L. Freeman issued his famed directive to all agency heads to spur the growth of cooperatives. Freeman maintained that it was "more essential than ever that the farmers' bargaining power be strengthened due to the trend towards greater concentration of economic power in the non-agricultural sectors of the economy."

Taxes are big item of electric bill

HARRISBURG, Pa. - Out of every dollar Pennsylvania consumers pay for electric service 15 cents goes for taxes, the state's top electric utility executive said here this week.

"Taxes are second only to fuel in the consumer's cost of electricity, and they take a larger bite than most people imagine because they aren't visible on the consumer's bill," said Eugene J. Bradley, president of the Pennsylvania Electric Association.

Bradley addressed some 250 Pennsylvania consumer group leaders at the sixth annual Pennsylvania Power Conference co-sponsored by The Pennsylvania State University and the Pennsylvania Electric Association. He explained in detail the elements of the consumer's electric utility bill.

The smallest item, Bradley said, is one-and-a-half cents for retained earnings. "In other words," he said, "after all payments for fuel, taxes, wages, operating expenses, interest and dividends, much less than two per cent of the consumer's electric dollar remains for the electric utility to set aside for future financing."

Bradley said electric rates trended downward during the fifties and sixties. "Bigger broilers, bigger generators, greater efficiencies-all contributed to offsetting other expenses and to lowering the unit cost of power generation." he said.

"But by 1970 the technological gains ran out and inflation problems mounted for the industry and its customers," he continued. "This impact of inflation on electric utilities is too easily overlooked by some people who are paying today, compared with 10 years ago, 95 per cent more for a new car, 85 per cent more for a gallon of gas, 107 per cent more for a physician's office call, 52 per cent more for a loaf of bread, and on and on."

The utility executive said he expects electric bills to continue to rise as long as inflation persists, adding that some of the burden could be lessened if state government reduced or removed special taxes that electric customers pay.

Bean exports down

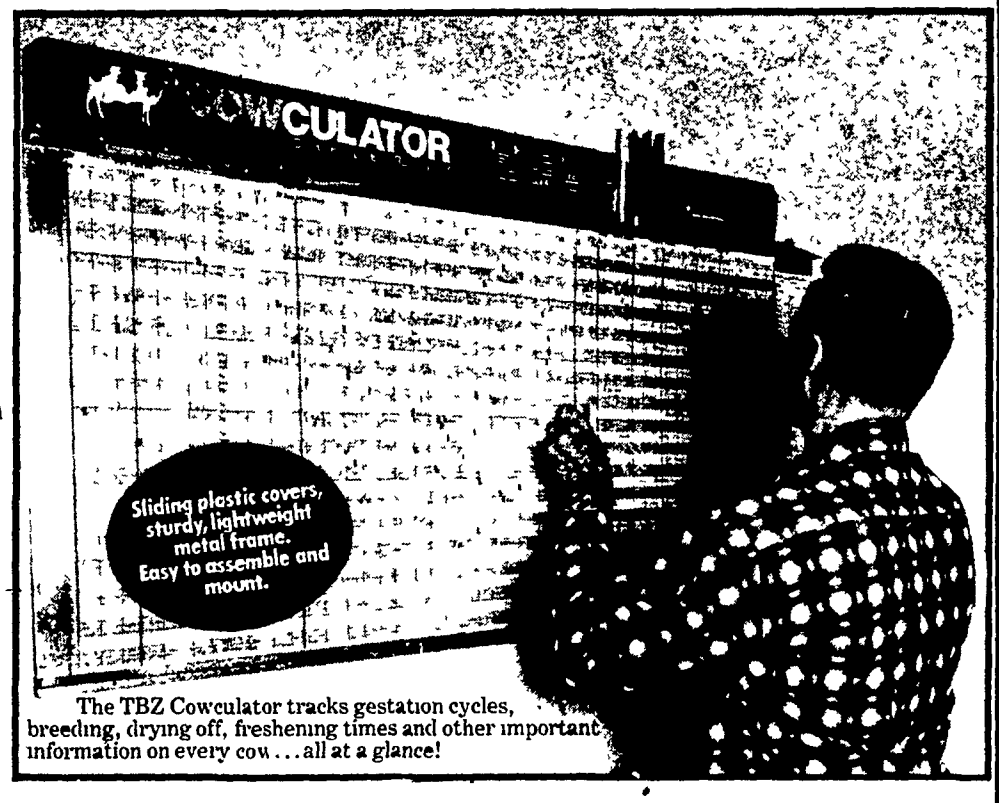
The marketing year ended last August wasn't a good one or U.S. exporters of dry edible beans and peas. Shipments of dry edible beans, at 123,000 metric tons, proved the lowest since 1967 and made up only 53 per cent of the 1974-75 record. Shippers of dry edible peas watched their exports drop 20 per cent below the preceding 10-year average of 91,000 metric tons. The little lentil fared a lot better, setting another record with nearly 42,500 metric tons. Roughly 70 per cent of the 1975 lentil crop left our shores for Algeria-the biggest buyer-and West Germany, Venezuela, Greece, Italy, Columbia, and Spain.

Remarkable COWCULATOR offer from TBZ®, the Dry-Period Wormer

The TBZ Cowculator is a continuous, cow-by-cow record-keeping system that gives you the information you need—at a glance—to manage your herd with maximum efficiency plus a permanent, month-by-month record.

TBZ also helps get the most from your herd. Wormed, healthy cows can give more milk. When wormed with TBZ before freshening, university trials have shown that they can give the *most* milk from worming!

TBZ and the TBZ Cowculator may be the two most valuable investments you can make this year for a better-producing herd!



The TBZ Cowculator tracks gestation cycles, breeding, drying off, freshening times and other important information on every cow . . . all at a glance!

A $95 value, yours for only $56 with any purchase of TBZ!

65- and 100-cow models available (see coupon). And look for the TBZ Cattle Wormer and Cowculator floor display at your dealer's!

HOW TO GET YOUR TBZ COWCULATOR

- Buy TBZ in any form, including feed. For each Cowculator ordered, enclose one label or portion thereof containing the words "TBZ," "THIBENZOLE," "feed containing TBZ" or "feed containing THIBENZOLE," or the word "thiabendazole."
- Fill out coupon below. Indicate which model you want, and how you want it numbered—*Model* 65 numbered 1-65, 66-130 or 101-165 *Model 100* numbered 1-100 or 101-200
- Make check or money order for total amount required payable to "TBZ Cowculator Offer."

● **Mail to:** TBZ® Cowculator Offer, Raytec Manufacturing, RD #3, Ephrata, Pa 17522

Please send me Cowculator(s) indicated below. I enclose labeling for each Cowculator, and check or money order payable to TBZ Cowculator Offer.

Small watershed projects under review

HARRISBURG, Pa.—At President Carter's request, the USDA, Soil Conservation Service (SCS), is conducting a review of all small watershed projects in Pennsylvania under construction or approved for construction, SCS state conservationist Graham T. Munkittrick said recently.

Projects under review include those administered by SCS under PL-566 which limits the size of watershed area to no more than 250,000 acres. The multipurpose projects called for land treatment to reduce soil erosion and siltation. They usually include such flood prevention structures as earthen dams and water impoundments. Many projects also provide the local inhabitants with domestic and industrial water supply, recreation, and fish and wildlife habitat.

Munkittrick said the review will be made in two phases. "The first screening," he said, "will be to identify those projects that are unquestionably sound environmentally, economically, and from the standpoint of safety of structures. This phase is to be completed by April 29, 1977."

The SCS official said projects that do not pass the initial screening will undergo more thorough study, with the process to be completed by June 15, 1977. Projects then selected for public hearings will be announced on June 17, 1977.

Munkittrick gave his assurance that any hearings will be held in the vicinity of the project before July 1, 1977. Final recommendations on projects will be provided to the President by July 15, 1977.

State conservationists said projects that pass the initial screening will have to meet the following three criteria: (1) no additional major adverse environmental impacts would result from project completion; (2) the ratio of remaining direct benefits to remaining direct costs exceeds unity when discounted at the rate of 6-⅜ per cent; and (3) no creditable question remains to be resolved concerning the safety of the project structure.

The Pennsylvania review is part of a government-wide study of all water resource projects ordered by President Carter. An interagency task force coordinated by the Council on Environmental Quality and the President's Office of Management and Budget developed the criteria. The total number of SCS projects being reviewed nationally is 1185.

The following are the small watershed projects being reviewed by SCS in Pennsylvania: Brandywine Creek, Briar Creek, Brodhead Creek, Cross Creek, Dunlap Creek, Greene-Dreher Creek, Harmon Creek, Jacobs Creek, Little Schuylkill Creek, Little Shenango, Middle Creek, Nescopeck Creek, Neshaminy Creek, Oil Creek, Wheeling Creek, and Pine Run Creek.

Bill passed to protect farmland along with Appalachian Trail

HARRISBURG - Rep. Noah W. Wenger, R-Lancaster, has announced that a measure to save the Appalacian Trail in Pennsylvania has been passed overwhelmingly in the House along with his amendment for the preservation of farmland along the trail.

Wenger said the legislation would protect the 200 miles of the trail that pass through Pennsylvania from commercial encroachment.

The measure contains Wenger's amendment to insure that land acquired by the State to preserve the pathway does not infringe on valuable farmland.

The conservation bill provides the State with $500,000 to acquire land through which the trail passes, but under the Wenger amendment, acquisition by eminent domain of tillable farmland would be limited to a footpath with a width of not more than 25 feet across the land.

The amendment further provides that limited acquisition applies until the owner of such land states an intention to convert the land to nonfarming use.

"The House passage of the Appalachian Trail bill is an important step forward in preserving an invaluable natural resource. I hope the State Senate concurs and that all states from Maine to Georgia through which the trail passes will take similar action," Wenger said.

"I am very pleased that my amendment was also passed because farmland is a valuable natural resource too and must also be protected."

The Lancaster County legislator, who is a member of the House Conservation Committee, said the Appalachian Trail measure would designate the trail as a footpath and prohibit the use of motorized vehicles by the general public, in addition to mandating the preservation and maintenance responsibilities of each municipality through which the trail passes.

Wenger said the federal government will match the amount of money the State decides to spend to save the trail from land developers and private landowners who are currently buying real estate adjacent to the historic and scenic path.

FFA holds election

ELVERSON, Pa. - The regular meeting of the Twin Valley Future Farmers of America was held April 5. President Ted Ford opened the meeting with the regular opening ceremonies.

The main topic for the meeting was the election of 1977-78 chapter officers. Nominations were taken and then the chapter proceded to vote.

The results are as follows: President, Clarence Jennelle; vice president, Howie Griest; secretary, Deb Ford; chaplin, Tom Kirk; treasurer, Danny Mosteller; reporter Doris Mast; sentinel Jim Mimm and historian Sandi Shade.

E-town 4-H club shown castration

ELIZABETHTOWN, Pa. - Members of the Elizabethtown 4-H Pig and Rabbit Club learned how to castrate pigs at their most recent meeting, held at the Warren Heisey farm, near here. The operation was demonstrated by Heisey.

The treasurer's report revealed that the club has $7. The county council report was given by Tom Baum.

The next meeting will be held on May 24.

Farm fuel tax exemption requested

EDITOR'S NOTE: The following information is reprinted from the April 29 issue of WASHINGTON NEWSLETTER, published in Washington, D.C. by the National Farmers Union.

WASHINGTON, D.C.- If a national energy conservation tax is imposed on gasoline, as proposed by the Carter Administration, it would make sense for fuel used in farm production to be exempted from the tax, an official of the Federal Energy Administration (FEA) told participants in the National Farmers Union's second "Farm Income Fly-In" recently. Ivan Maple said that it would be more practical for the farm fuel to be certified as tax-exempt at time of delivery rather than for farmers to have to file a claim for a rebate as they now do on federal and state taxes on on-highway gasoline.

A proposal that the farm fuel be exempted had been made last week by Tony T. Dechant, national president of the Farmers Union, in a letter to President Carter. Dechant declared that even if the tax were to be eventually fully rebated, there would be hardship because farmers would probably have to increase their borrowings to advance the tax. A 5 cent tax would require $400 million in payments by the nation's farmers; a 50 cent tax would cost farmers $4 billion a year, Dechant estimated.

Maple said that the authority for a farm exception "may have come from the Congress."

Deputy Secretary of Agriculture John C. White said recently that our food and agriculture system must participate in a concerted national energy conservation effort, but added that energy cost impacts must be kept at a minimum in our food system. White also told a news conference that farm production takes less than three per cent of the nation's energy supplies, but it is a "critical three per cent." White told reporters that "coupled with on-farm conservation, we need to continue to have priority for essential users."

Russians still lagging in agricultural productivity

WASHINGTON, D.C. - The Russians gained some ground since USDA last compared their agriculture and ours. However, in a recent report, USDA economists point out that the United States remains well out in front when it comes to farm efficiency, crop yields, and livestock productivity.

The latest comparison covers 1971-75-the years spanning the Soviet Union's ninth 5-year plan. A major change toward closing the gap is the Soviet use of mineral fertilizers, which now stands at 87 per cent of the U.S. level. But since the USSR has 45 per cent per cent more cultivated cropland, the comparison becomes far less favorable on a per-acre basis.

Difference in value between farm output of the two nations remains relatively unchanged. The Soviets use far more land and eight to nine times more labor and still come up with a total farm output worth about 20 per cent less than the U.S. figure.

Also, U.S. farmers grow over a fourth more grain, using 55 per cent as much land. Main reason: high-yielding corn accounts for 60 per cent of the grain grown in the United States, while relatively low-yielding wheat makes up nearly half the Soviet harvest.

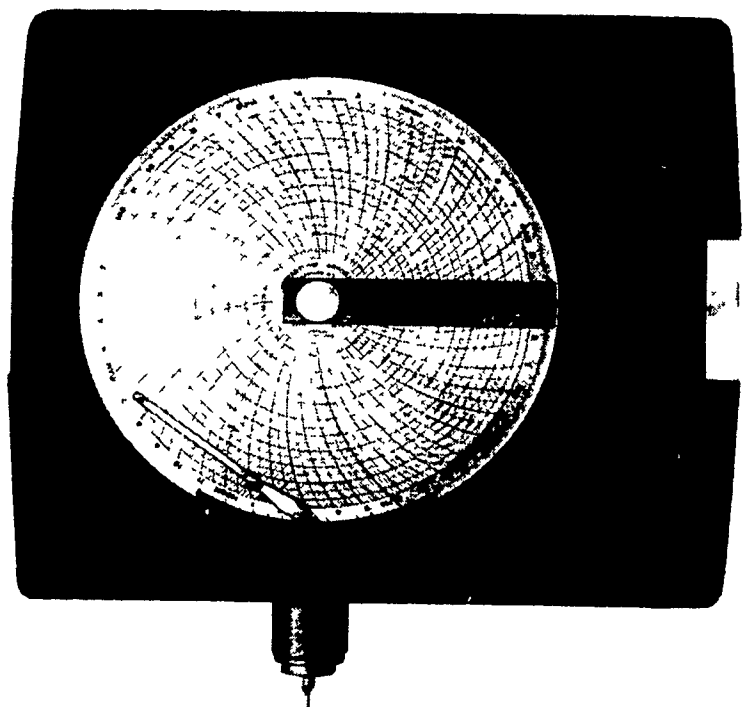
Dairy club plans for June

BAIR, Pa. - The Central Dairy 4-H Club met on April 11 at the 4-H Center, near Bair. Demonstrations were given.

Each member made a rope halter to use on his 4-H calf. Committees were formed for a "June is Dairy Month" exhibit, tour, and a presentation for the June meeting of the Thomasville 4-H Club.

The next meeting of the club will be held on May 9 at the 4-H Center. The program will be "Making a Cow Pay for Herself." Demonstrations will be given by Barry Lehman, Roy Thompson, and Debbie Lehman.

THE SENTINEL



Round-the-clock guardian of stored milk temperature

If you depend upon your milk check for a living, protect that income by insuring milk quality.

The least expensive, single-payment insurance obtainable is the Sentinel — the heavy-duty, 10-inch recorder which charts round-the-clock temperature of your milk-cooling or holding tank.

Assure yourself — and your processor — that proper milk temperature is always maintained.

Keep a permanent log of compressor operation and tank cooling or pre-cooling efficiency, from first filling to pickup.

Cleaning temperatures — increasingly questioned by sanitarians — are recorded on the same chart.

At little added cost, the Sentinel is available with provision for actuating an alarm or warning light if milk holding temperature rises above pre-set level.

Remember — if it prevents the loss of only one tank of milk, the Sentinel has paid its own way.

Driving tips offered by the nation's truckers

WASHINGTON, D.C. - Many motorists express concern about driving near a truck because of its size. But sharing the road with a truck can be safe, easy and enjoyable if a few helpful rules are observed.

During National Transportation Week May 15-21, the American Trucking Associations offers these safe driving suggestions for motorists. They come from the safest drivers on the road, the nation's professional truck drivers.

- **Drive defensively.** Drive to prevent accidents in spite of hazardous driving by others or unsafe road conditions. Commit no driving errors yourself. Adjust your speed to road, traffic and weather conditions. Guard against other drivers' mistakes.

- **Stopping and tailgating.** In general, trucks take slightly longer to stop because of their size and weight. However, that's not always true. At high speeds or on wet roads, trucks may stop faster because of better traction and stability. Also, with a better view of the road ahead, truck drivers can often spot hazards and apply their brakes sooner than motorists.

Maintain a safe following distance. Do not tailgate regardless of what vehicle is ahead. A following distance of two seconds, or one car length for each ten miles per hour of speed, will allow time to apply brakes and slow to a safe stop. For example, a motorist should maintain a distance of six car lenghts behind a vechicle if both are traveling at 60mph.

Following time is determined by noting when the rear of the vehicle ahead passes an object along the highway and counting slowly until the front of your vechicle reaches the same point. When following a truck, in particular, a long following distance permits a better view of the road ahead an allows you to beware of potential dangers.

If you are ahead of another vehicle, keep an eye on it in your mirrors. If it gets too close, slow down and let it pass, or, if safety permits, speed up to increase the distance.

Many accidents occur when the vehicle ahead stops without warning the vehicle behind. Begin slowing well in advance to avoid panic stops by cars or trucks behind you. Make sure your brake lights are in good working order.

- **Passing.** Many motorists are somewhat timid about passing trucks because of their size. For the most part, the rules apply whether passing a car or a truck.

Check traffic front and rear. Don't pull out if you are being overtaken by faster traffic or if there is oncoming traffic in the passing lane. When you move into the passing lane, give a short horn blast. At night, flick your bright lights to let the driver ahead know you are passing. As you pass, keep as far left as possible to avoid sideswiping and to reduce wind turbulence between vehicles. After completing the pass, don't pull back into the traffic lane until you can see the front of the vehicle in your rear-view mirror. When overtaking a truck in three or more lanes of traffic, pass to the left. The truck driver has better visibility on that side.

When you are being passed, keep your speed constant, or slow down a little if the vehicle is passing slowly. After the vehicle has passed, establish and maintain a safe following distance.

If another vehicle is approaching in your lane, head for the right shoulder, blow your horn and flash your lights, to attract his attention and get him to return to his own lane. Never try to pass him on the left. If he returns to his lane and there is an accident, you will be at fault. Truck drivers are forbidden by law to help motorists pass. However, if you blink your lights to indicate you are going to pass, the truck driver will keep to his right and make it easier. If the driver flicks his lights after you have passed, he is simply telling you it's safe to pull back into the lane in front of him.

- **Turning.** Many motorists do not realize that as a truck driver approaches an intersection to make a right turn, he may move slightly to the left to avoid running the trailer up onto the curb. As the truck moves left, a temporary lane is created to his right. Seeing that lane, an impatient driver might move up on the right of the truck, leaving himself vulnerable when the truck swings into its right turn.

To avoid this type of accident, motorists should always pay close attention to truck turn signals. Never pass on the right at an intersection, and never assume that when a turck moves to the left it will turn left or continue straight.

Failure to yield right-of-way on turns or at intersections is another common cause of traffic accidents. A driver who is turning left must yield to oncoming vehicles. Motorists quite often turn in front of a truck in the mistaken belief that the truck is approaching more slowly than its actual speed. It's safer to wait until the truck passes.

- **Blind sports and backing accidents.** Because most large trucks do not have rear windows, the driver must depend on side mirrors to see what is behind him. As a result, there is a "blind spot" extending 12 to 15 feet directly behind a truck.

Often, whan a truck begins to back from the roadway into a loading area, he temporarily blocks the roadway. If a motorist tries to pass close behind the truck, he enters the driver's "blind spot" and an accident can occur. The easiest way to avoid an accident is never to cross behind a truck which is attempting to back up unless the driver waves you through.

If you stop behind a truck, keep your vehicle slightly to the left of your lane so you won't be in his blind zone. That way, if he's planning to back up, he'll see you in his side mirror.

When stopping behind a truck on an upgrade, always leave at least one car's length between you and the rear of the truck to avoid a "roll back" accident. A truck usually rolls backwards a few feet when its driver takes his foot off the brake and engages the clutch.

- **Emergency Use of Citizens Band Radios.** Nowadays, nearly all truck drivers and many motorists and highway patrolmen has CB radios in their vehicles. Use your radio wisely and sparingly. Don't fill the airwaves with chatter. If you need assistance or want to report an accident, turn to Channel 9, the recognized emergency channel.

When requesting assistance for yourself or someone else, speak slowly and clearly into the transmitter. Identify the location where help is needed and the type of assistance required. Road mile markers make excellent points of reference for someone else to find you or the accident you are reporting.

Be as brief as possible when transmitting word of an accident, but not so brief as to cause confusion. Take a "strictly business" attitude when using Channel 9. It's your best assurance of time-saving communications.

If you need help and don't have a CB radio, pull as far off the road as possible and display a white cloth from the radio antenna or from an uprolled window as a signal of distress. Remain in your car. Most truck drivers will radio ahead on their CBs for help. Usually they won't stop unless there has been an accident or fire, but you can be assured help will soon be on its way.

To get directions when you don't have a CB, stop at a truckstop. You're sure to find a driver who has come from the area in which you are headed. He'll be happy to advise you.

Keeping these points in mind should make sharing the road with a truck - or with any vehicle - easier, safer and more enjoyable.

Results posted for 4-H horse show

LANCASTER, Pa. — The Boots and Saddles 4-H club held its 10th annual open horse show on April 23 at the Lancaster County Riding and Tennis Club with 177 horses and ponies entered.

In racing championships, Mick Bonosky showed Bert's Dolly to the number one finish, and in the children's championships, Jim Glick took the top place showing Payday II. Nancy Bahn was the top rider in the adult championship atop Flasher Mac.

The complete results were as follows: Open Grooming and Showmanship - 1. Nancy Bahn showing Flasher Mac; 2. Robin Weatherby showing Wagon Bar Miss; Halter, two years and under - 1. Susan Keemer showing Candy Bar Creek, 2. Allan Bernstein showing Little Bit of Bo; Halter, three years and older - 1. Linda Vaughn showing Positively Pete, 2. Wayne Jackson showing Frosty Bar Sloot; Lead Line Horse or Pony - 1. Allison Farrington showing Penny, 2. Laura Bay showing Russ-T-McGee; Adult Western Pleasure - 1. Nancy Bahn showing Flasher Mac, 2. Kim Steffy showing Just a Buck.

Children's Western Pleasure Pony - 1. Kim Hindle showing Westward Wanda, 2. Robin Tshudy showing Pepper's Pride; Children's Western Pleasure Horse - 1. Brenda Blaxland showing Velvetation, 2. Jim Glick showing Payday II; Open Pole Bending - 1. George Schaeffer showing Passing Rome, 2. Mick Bonosky showing Bert's Dolly; Open Bosal Western Pleasure - 1. Nancy Bahn showing Flasher Mac, 2. Jim Glick showing Payday II; Open Clover Leaf Barrel Race - 1. Jay Hughes showing Personnal Problem, 2. Ray Carmean showing Ton of Trouble; Open Girls' Barrel Race - 1. Tammy Sheffer showing 7 Up, 2. Wendy Riehl showing But High.

Open Girl's 50 yard dash - 1. Pay Janney showing Bar None Champ, 2. Jannet Sheffer showing Mazzie; Open Western Equitation - 1. Tom Perkins showing Idean's Cassio's, 2. Kim Steffy showing Just a Buck; Walk Jog or Walk Trot - 1. Heather Hindle showing Westward Wanda, 2. Curtis Huber showing Flirty Clegg; Open English Pleasure - 1. Debbie Heldig showing Tri Miss Banderia, 2. Jim Glick showing Tri Miss Poco; Open Road Hack - 1. Jim Glick showing Tri Miss Poco, 2. Debbie Heidig showing Tri Miss Banderia.

Open Scurry Race - 1. Janet Sheffer showing Lady Bug, 2. Mike McCall showing Sam; Open Keyhole Race - 1. Mike McCall showing Sam, 2. Mick Bonosky showing Bert's Dolly; Open Pic Up Race - 1. Mick Bonosky showing Bert's Dolly, 2. Mike McCall showing Sam; Open Trail Class - 1. Jim Glick showing Payday II, 2. Robin Tshudy showing Pepper's Pride; Open English Equitation - 1. Debbie Heidig showing Tri Miss Banderia, 2. Elizabeth Bachman showing Morning Dawn; Open Flag Race Special - 1. Butch Trimmer showing Little Nip; Open Hunter Under Saddle - 1. Jim Glick showing Tri Miss Poco, 2. Debbie Heldig showing Tri Miss Banderia; Speed and Action - 1. Mick Bonosky showing Bert's Dolly, 2. George Schaeffer showing Passing Rome.

Open Ladies Western Pleasure - 1. Kim Steffy showing Just a Buck, 2. Nancy Bahn showing Flasher Mac; Open Men's Western Pleasure - 1. Jim Glick showing Payday II, 2. Glen Dietz showing Mr. Destination; Appaloosa Pleasure English or Western - 1. Nat Immel showing Penny, 2. Galen Ehrhart showing Metie Miss.

PFA ladies say:

The best man for the job may be a woman

By JOYCE BUPP
York Co. Reporter

YORK, Pa. - "The Best Man For The Job May Be A Women!"-that was the theme of the April 28 Ladies' Day Out sponsored at Avalong Farms Resturant by the York County Farmers' Association.

Members and guests attending the annual women's program were treated to a wide range of political and legislative information, liberally sprinkled with entertaining talent and craft displays throughout the day.

Representative A. Carville Foster, of the 93rd District, was the opening speaker with a "State Legislative Update" concerning critical farm-related issues.

"I wish I could say something else, but the fact is that there is more bad news than good coming out of Harrisburg for farmers," believes Foster. He hit environmentalists as one crucial area of concern to ag people.

"Zero pollution is not a realistic goal," continued Foster, a farmer himself. "Too many people in pollution-control leadership grew up learning textbook environmentalism; it seems they won't be happy until we are hungry and cold."

Pending legislation which will affect farmers include proposed transportation and gasoline taxes, because of the major fuel inputs required in the farming industry. Foster was critical of the administration's proposal to merge present gas tax and motor licensing funds into the general fund of the Commonwealth.

"If that happens," emphasized Foster, "Your automobile license fees, instead of being spent on badly-needed repairs to your rural roads, may instead be funding the Philadelphia school system, or a proposed multi-million dollar Pocono Arts Center."

The York County representative also gave the verbal axe to the Public Utilities proposed "Lifeline" rate restructuring system. Under the "Lifeline" rate changes, small users would be billed low per-kilowatt charges, with high users paying top price per unit. Foster noted that farmers are quantity consumers of

Patricia A. Crawford

electricity, and restructuring along these lines would put a burdensome drain on their pocketbooks. While the changes are to theoretically help the poor, Foster stressed that there is actually little correlation between income and energy use, citing the fact that lower-income housing is frequently the most poorly insulated.

Keynote speaker for the afternoon program was Patricia A. Crawford, of Devon. She served four terms as a House member and was the Republican candidate for state treasurer during the last election.

"I'm very happy that women are getting interested in legislative affairs," commented Ms. Crawford, who is currently serving on the Governor's Commission for Women. She termed her message to the women present "more a seminar on how to get involved in politics than it is a speech."

Setting down the steps that a bill takes from the time of introduction on the floor to the final document signing, Ms. Crawford emphasized that there are two key times when voters should be in touch with their representatives.

"Contact your legislator when the bill is moving in committee, or to get it moved out of committee, and then again when it comes up for a vote. Sometimes just, one letter, with pertinent facts, figures and suggested alternatives, might well make the difference in how your legislator votes," advised Ms. Crawford.

Another piece of advice given by the ex-lawmaker was for voters to make a genuine effort to get to know their elected representatives.

"Never contact a legislator out of the blue and demand action," she warned. "And, don't forget to say 'Thanks' to them when they've done a good job. They're human, too, and appreciate an occasional pat on the back."

Entertainment for the program included demonstrations by Maxine Shaffer, Druck Valley Road, York, a talented tole painted and teacher. Nedra Graybeal, Airville R1, spoke on "eggcrafting" and displayed an assortment of eggs cut and creatively decorated with fabrics, trims and tiny figurines.

Winner in the talent competition was Pat Gerber, daughter of Mr. and Mrs. William Gerber, Davidsburg Road, Dover, with a vocal solo. Miss Gerber will represent the county at regional competition in July. Mollie Dehoff, daughter of Mr. and Mrs. Albert Dehoff, Dallastown R1, was named runner-up.

A skit, "Super Chick Can Do It!", directed by Gail McPherson, wrapped up the Day Out Activities. A modernized version of the fable of the little red hen, beset by bureacratic red tape, the production's cast included a pig who refused to work because he might lose his welfare and food stamps, a ewe who feared pesticide damage to her lungs, and a cow who positively refused to work in the field without a porta-potty.

Rep. A. Carville Foster

Large - scale Cooking hazards to be discussed by Extension

LEBANON, Pa. - On May 12 an informative meeting will be held by the Penn State Extension Service of Lebanon County for anyone who makes food "for fun and profit."

To take place at the Municipal Building, Lebanon, at 7:30 p.m. the meeting will discuss food safety for large quantity cooking.

"This is for organizations such as Farm Women's groups, band parents, church groups, and others who prepare food on a large scale," stated Extension Home Economist Alletta Schadler. "We've been getting reports of spoilage, and this meeting is in response to that."

Dr. Morris Mast, poultry food specialist from Penn State, and Sid Barnard, food science Extension specialist, will be on hand to discuss the problems with the participating audience.

The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. A good pasture with a pH of 6.5 or higher, for example, will make 300 to 400 lbs. of beef per acre and produce up to $100 gross income per acre. This means with the help of lime, profits from pastures can compare favorably with feed or grain crops.

Proposed rule change set on interstate hog shipping

WASHINGTON, C.C. - The U.S. Department of Agricurture is proposing to change interstate shipping rules to allow swine fed raw garbage to be slaughtered without special processing.

Present regulations require that swine fed raw garbage and shipped interstate must be sent to slaughter and cooked (specially processed). Because of this requirement, many packing plants will not accept these animals. Officials of USDA's Animal and Plant Health Inspection Service (APHIS) said the requirement originally was instituted to help prevent the spread of hog cholera from animals fed raw garbage.

The proposed change would allow hogs fed raw garbage to move directly to slaughter without special processing when the following conditions are met:

-The swine to be moved must not have been few raw garbage for at least 45 days before the date of shipment;

-All hogs on the farm must be tested and examined to make sure they are free of hog cholera and other communicable diseases of swine;

-All swine on the farm must be inspected within 24 hours before moving the slaughter animals;

-The animals sent to slaughter must be individually identified with eartags or a red color mark or moved in USDA sealed vehicles, and must be accompanied by an inspection certificate issued by a state or federal animal health official or by an accredited veterinarian.

Written comments on the proposed amendment should be sent to the Deputy Administrator, Veterinary Services, APHIS, USDA, Room 714, Hyattsville, Md. 20782. The 60-day period for comments will expire on June 24, 1977.

Thirteen Lancaster County FFA members took part in the Farm Management Contest, a new county competition held last week at the Willow Street Vo-Tech School. Participants completed a test concerning taxes, interest, investment, depreciation, budgeting, etc. Top individuals for the contest was Bruce Kreider, Solanco, with 259 points; second, Mary Seward, Elizabethtown, with 211 points; third, Tim Good, Manheim Central, with 203 points; also tie for third, Curtis Martin, Ephrata, with 203; and Larry Hershey, Manheim Central with 200 points. The top team was Solanco; second, Manheim Central; and third, Elizabethtown.

Sitting around the table from left to right the individual winners are: Larry Hershey, Tim Good, Bruce Kreider, Curtis Martin, and Mary Seward.

The soil has been turned and another growing season is underway. So far it looks like its going to be a good year. By most any standard, it's been an excellent Spring in southeastern Pennsylvania and neighboring areas.

War on Johnsongrass begins

ANNAPOLIS, Md. - With spring here, the annual war against Johnsongrass begins.

It is estimated that in Maryland more than 100,000 acres, much of it prime agricultural land, are infested with the weed which spreads both by seed and underground rhizomes, robbing soil of moisture and nutrients and making it tough to deal with effectively.

A Maryland noxious week law passed in 1970 set up the state's Johnsongrass program. An amendment passed more recently allows for compliance with the law through a Johnsongrass control agreement.

The Maryland Department of Agriculture's Plant Industries Division, Weed Control Section, coordinates with 20 counties a program designed to bring the weed under control. MDA works through conty Johnsongrass committees, cooperating with farmers and landowners to attack the problem rather than emphasizing violations and prosecutions.

Key to the program is the "Johnsongrass Control Agreement" which is worked out each year between the famer, landowner, county authorities and MDA. This agreement states the property location, the amount of Johnsongrass infestation of the land and, most importantly, the methods of control that will be used to combat the weed.

The agreement, besides assisting the farmer or landowner to comply with the state law, is also sort of a "roadmap" toward effective control. Each farm or piece of land infested may require a special plan to control which varies by the type of crop, chemicals that can be used, special tillage practices etc.

First step toward a control agreement, says MDA's Johnsongrass control supervisor Jesse Crook, is to contact the county Johnsongrass supervisor or a member of the county Johnsongrass committteee. Renters are urged to check with Johnsongrass authorities to make sure the ground they till is under a control agreement, and not to assume that the owner of the land has already arranged this.

Convenience foods used by restaurants

UNIVERSITY PARK, Pa. – People who tire of eating easy-to-prepare convenience foods at home and treat themselves to a meal in a favorite restaurant may be surprised to know that that restaurant may also be using convenience foods.

According to Extension consumer specialists at The Pennsylvania State University, many restaurants and institutions have switched to cenvenience foods instead of cooking from scratch because of the high cost of labor, energy, equipment and individual food ingredients, and the scarcity of people skilled in preparing food from scratch.

In the restaurants and institutions surveyed by the United States Department of Agriculture, the entrees accounted for nearly two-fifths of the convenience items. Cakes and pastries ranked second, with side dishes third and dinners fourth.

According to the survey, the biggest users of convenience foods among institutions are schools and colleges, trailed by hospitals, feeding services in places of work, the military and correctional institutions.

Heifer Project International has goal of 125 head

MANHEIM, Pa.—Last year, the Lancaster, Chester, and Lebanon County district of Heifer Project International, a self-help program for needy people, had a goal of 100 heifers to be gathered and sent to Tanzania. This year, says Clarence Keener, Sr., Manheim Rl, chairman of the area committee for nine years, the goal has risen to 125 head.

"About three years ago, Tanzania asked for yearlings to build up herds where there had previously been none," he explained. "They had been importing powdered milk which drained the economy and upset the balance of trade. So, they are hoping to start new herds for themselves."

The Tanzanian request, which had been for about 1000 head,is nearly half complete, and is a typical example of how HPI operates.

Heifer Project International began in 1944 when Dan West started it in the Church of the Brethren. The organization has since become international and non-denominational, with civic groups and others taking part in completing the project. Since its inception, the organization has sent out over 40,000 animals and chicks to people in 90 foreign countries as well as states in the USA. During the past eight years, Lancaster County and neighboring areas have been responsible for over 200 head of cattle.

"In the past we have gotten great response," remarked Keener. "We find that people from all over the state are willing to give."

The idea behind HPI is to help the needy themselves. The heifers going to underdeveloped countries around the world will be taken care of by families who will receive some instruction and training in husbandry prior to the donation of the gifts. Little Rock has also had requests for veterinarians who are willing to donate their services to work abroad and for American families to host African boys for a six month training session on their farm.

The countries receiving the heifers have to pay a small amount. They pay for the transportation charges and are asked to make a small payment to reimburse their government for the freight and handling expenses.

The volunteer committee members will soon be contacting farmers for their ideas on participating in the project. Donations are always welcome, although some heifers don't come absolutely free of charge. Handling costs are incurred as well. As a result the actual cost of the 70-head heifer project in Keener's district in 1975 was $7000. These expenses were raised by Bible Schools, churches, and other donations from various communities.

The animals sent from the Lancaster-Lebanon-Chester area are primarily heifers.

"We stick to heifers from the area because we have cattle, here," stated Keener. "But they ship rabbits, chicks, bees, and goats from the Little Rock Ranch."

Little Rock, Ark., is the primary headquarters of the organization, and is the location from which the heifers collected in the Lancaster area over the next three months will be shipped.

The shipping dates from the Lancaster headquarters to the Arkansas base are June 10, July 8, and August 5. The roundup will be held at the Clarence Keener, Jr., farm.

Anyone interested in being of service to this charitable organization is encouraged to contact one of the eight following individuals: Clarence Keener, Sr., 665-2361; Arthur Wenger, Manheim, 665-3863; John Metzler, Christiana, 215-593-5202; Leon Kreider, Quarryville, 284-4515; Victor Ziegler, Lebanon Co., 866-4088; Earl Umble, Lancaster, 393-3208; Alvin Weaver, Jonestown, 865-4549; and Adin Frey, Chambersburg, 264-7492. Money donations are also accepted.

This was the scene last year at the Clarence Keener, Jr., farm when a trailer-load of heifers departed for Little Rock, Ark., for Tanzania, Africa.

Willow Street firehouse campaign exceeds goal

WILLOW STREET, Pa. - More than $300,000 for the bulding campaign fund towards the construction of a new firehouse have been received by the Willow Street Fire Company, it was announced here Tuesday evening during a "Victory Dinner" held at the Willow Valley Restaurant.

Hosted by the John and Marlin Thomas families, owners of Willow Valley, the occasion was one of celebration and recognition. Organizers and planners for the campaign fund had set a goal of $250,000. By 6:30 p.m., Tuesday, the official tally stood at $300,445 and money was still coming in. According to Stanley Haverstick, president of the Willow Street Fire Company, the figure represents an average donation of $75 to $80 for every man, woman and child in the Willow Street area.

While praise and gratitude was expressed towards all who joined in the effort, a few received special recognition.

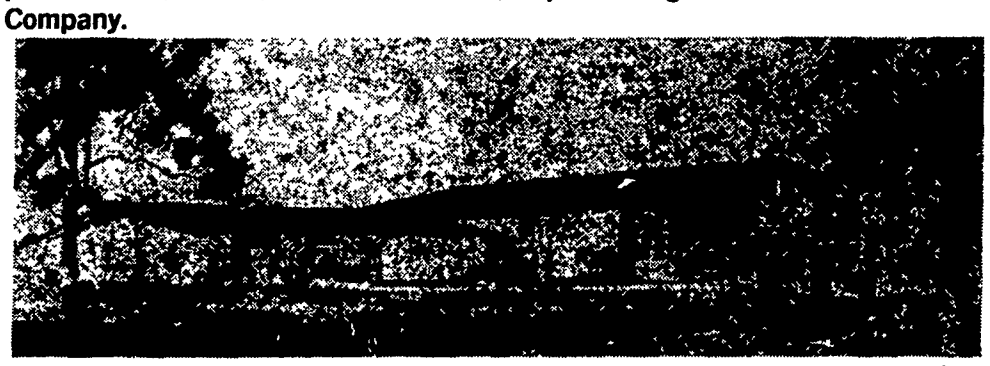
The Thomases were called forward several times in honor of their financial support and donations of foods and meeting facilities. Tuesday night's banquet for nearly 200 people was "on the house," - just one example of the numerous contributions made by the Thomases.

"Tiny" Neff, a volunteer fireman himself, was singled out for extraordinary sales efforts. Soliciting more than $82,000 in building campaign funds, Neff was given a plaque, large trophy, and respectful standing ovation.

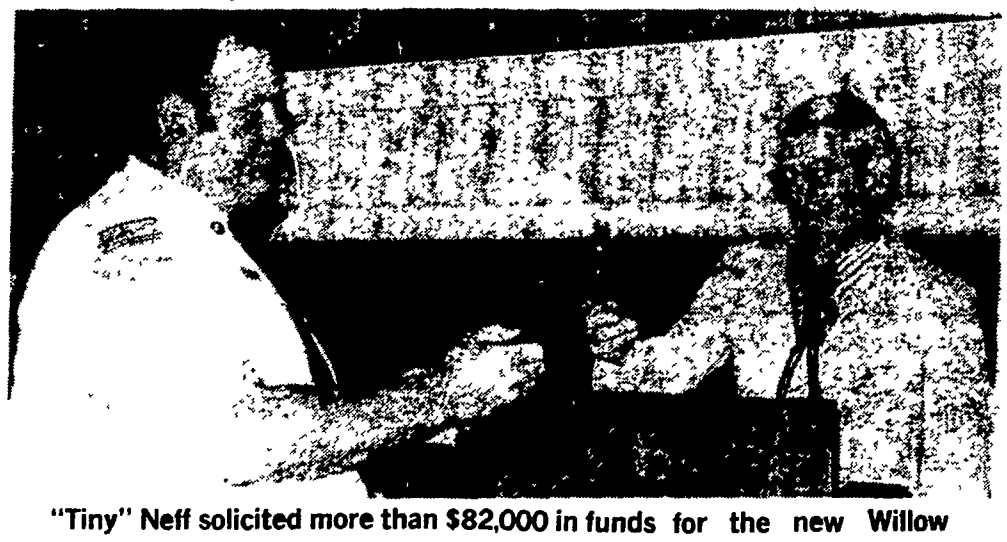
Robert Kemp, honorary chairman of the campaign, called the effort "a tremendously successful undertaking for a community of this size," adding that studies have shown that Americans donate more money to worthy causes per year than they annually pay in income taxes.

According to Dan Lake, who served as emcee for the program, construction has started. The new firehouse will be located adjacent to the Keystone appliance and electronics store, Route 272 North, in downtown Willow Street.

Mr. and Mrs. John Thomas receive a special plaque of recognition on behalf of the Thomas families. The Willow Street Fire Company, and its many supporters, had high praise for the Thomases on Tuesday evening, thanking them and acknowledging their most generous support and outstanding community service. The group of nearly 200 people, who participated in the "Victory Dinner" acknowledged their appreciation by way of a standing ovation. Making the presentation, above, is Glenn Mellott, representing the Willow Street Fire Company.



When completed, the new firehouse in Willow Street will look like this. More than $300,000 were given by residents in the area towards its construction. "Pacesetters Founders" were: Willow Valley Farms, Wenger Implement, E.M. Herr Equipment, Willow Street Ladies Auxiliary, Paul B. Mellinger Mfg., S.S. Fisher Welding, Mellott Brothers, Andrews Excavating, Shenk's Florist, Diller Plank, Graphic Arts, Inc., Burkholder's Used Cars, Dr. John Black, Joseph Chalala, and Benjamin Kendig, charter member.



"Tiny" Neff solicited more than $82,000 in funds for the new Willow Street firehouse. Robert Sullivan gives the award.

Nearly 200 people joined in the celebration of a successful building fund campaign. Dinner was "on the house," -- one of many contributions given by the Thomas families, owners of the Willow Valley Restaurant.

THE DAWN OF NEW UNI POWER:

Sun's Comin' up on a brand new day . . reflecting a gleaming new powerhouse of profit-building efficiency. **The brand new Uni-System!** More power—for more farmers than ever before.

A totally new design, aggressively engineered to deliver the operator comfort, convenience features and good-sense quality construction today's farmers demand.

Uni-System begins with two new Diesel Hydrostatic Power Units, with 138 or 175 brake horsepower. An ultramodern Quiet Comfort Cab available with factory air conditioning. And optional powered rear guide wheels for super control when the going gets really tough. Saddle up our big new Power Unit with the Uni-System **Combine, Forage Harvester, Picker** or **Sheller,** and you've got the low investment alternative to any other self-propelled you'd care to mention. And all with the unique advantages of Uni-System versatility.

Open your eyes to the dawn of new Uni Power. It's a better class of machine for a better kind of performance, from the better-performance people at Avco New Idea.

SEE DEALERS ON OPPOSITE PAGE.

Lancaster County DHIA supervisors who recently received the "Award of Merit" are, seated from the left: Floyd Zook, Wilbur Houser, Jay Risser and Harold Brenneman. Standing from the left are: Clarence Crider, Jay Mylin, David Harnish, Harold Probst, Joe Lindecamp and Lee Landis. Not present in picture, Moses Martin.

DHIA men honored

LANCASTER - Eleven Lancaster County DHIA supervisors received the 1976 "Award of Merit" several weeks ago during the annual spring conference of the Southeastern Pennsylvania DHIA Supervisors held at Bird-In-Hand.

Lancaster supervisors receiving the award were: J. Harold Brenneman, Strasburg; Clarence Crider, Manheim; David Harnish, Quarryville; Wilbur Houser, Lampeter; Lee Landis, Narvon; J. Harold Lindecamp, Peach Bottom; Moses Martin, Ephrata; Jay Mylin, Manheim; Harold Probst, Bart; Jay Risser, Lancaster; Floyd Zook, Strasburg.

To qualify for this state sponsored award which recognizes outstanding work in the DHIA testing program, a supervisor must meet these qualifications: Two years service as of January 1, 1977; have worked a minimum of 20 days per month for the year; attended two conferences held during the year; maintain an average mailing time not over 2.9 days for the year and test not over three per cent of their herds outside of the centering day.

In addition to meeting the above qualifications, a supervisor must be recommended by his county board of directors to receive the award. The final recommendation is based on completeness and accuracy of records, appearance of supervisor and cooperation with agents, directors, members and other supervisors.

Sheep dwindling

As in every year since 1960, the U.S. sheep and lamb population dwindled again in 1976. As of January 1, 1977, there were an estimated 12.7 million of these animals on American farms, 5 per cent fewer than a year earlier and 12 per cent below the 1975 count. The number of sheep and lambs on feed in the 26 major feeding States declined an even sharper 8 per cent to 1.7 million head. Only the value of the Nation's sheep inventory headed higher - to an estimated $539 million. Value per head climbed $5.20 during 1976 to an average of $42.40 this past January.

Colored breed dairy club holds meeting

LANCASTER, Pa. - The 4-H Jersery, Ayrshire, Brown Swiss dairy club of Lancaster County held its second meeting on April 11 at the Farm and Home Center, Lancaster. At this meeting two educational movies were shown, after which a suggestion was made that the Lancaster County dairy clubs, which are now arranged by breeds, become area dairy clubs incorporating all breeds. This would save members from extra traveling to meetings. Other dairy clubs in the county are thinking about the change.

The next meeting is scheduled for May 9 at the Roy Witmer farm. The demonstration will be "Dairy Cattle Judging".

For more information contact the Lancaster County Extension Service at 3943-6851.

Meat production up

HARRISBURG - Red meat production in Pennsylvania during March 1977 totaled 94.9 million pounds, up eight per cent from a year earlier according to the Crop Reporting Service.

Cattle slaughter at 85,800 head was up two per cent from March 1976; hogs at 264,500 head were up 21 per cent; sheep and lambs at 12,200 head were up 12 per cent; but calves at 33,600 head were down 14 per cent from a year ago.

Nationally, commercial red meat production in March 1977 totaled 3.5 billion pounds, up one per cent from a year earlier. The number of calves slaughtered was up five per cent, hog slaughter was up 14 per cent, sheep and lambs slaughter was up one per cent, but cattle slaughter was down five per cent from a year ago.

York Farm Women group sews for day care center

By JOYCE BUPP
York Co. Reporter

YORK, Pa. - Question: What do an inner-city day nursery center and a rural Farm Women's group have in common?

Answer: An interest in the welfare of 65 children in York County.

The York Day Nursery and Kindergarten, 628 East Market Street, was founded during World War II to provide responsible care and early childhood training of children of working mothers.

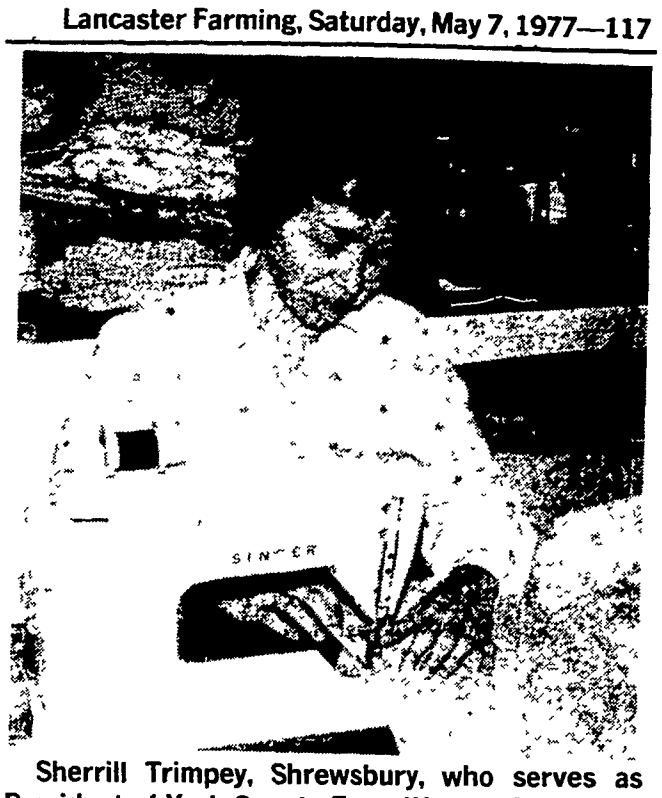
Today, the staff of five full-time teachers, a teacher aide, housekeeper, secretary and supervising director maintain the high-quality care founded many years ago, and center is still directed by some board members who helped with the initial establishment of the center.

While the center is funded partially by the United Way drives, and carries the approval of the Pennsylvania Department of Welfare, all parents pay to have their children attend, if only a minimal fee. Mothers using the facility must prove the need for them to work, because of the partial public funding of the center.

Farm Women Group 20, from the Shrewsbury area, had been a long-time member of the York County Needlework Guild, a volunteer organization which collected and distributed a wide variety of clothing and fabric items. When the Guild recently disbanded, the York Day Nursery was left without donations for their ever-needed supply of small cot-size blankets. Mrs. K. Ardella Gable, head teacher at the center, contacted members of Group 20 with an invitation to make the child-size quilts as a service project. The Farm Women enthusiastically adopted the idea and visited the center on April 26 with a delivery of 22 blankets.

Each of the 65 three, four, and five year olds has his own cot, complete with sheets and the colorful quilts, for use during the required afternoon rest period. Both warm Winter-weight quilts, and light Summer types of thinner cotton materials are made for the center's use. The 20 members of Group 2 work on the blankets in snatches of their spare time at home, using up scraps of material salvaged from other sewing projects.

The bridge of understanding and sharing continues to grow between these city and rural citizens, built not of concrete and steel, but of tiny scraps of colorful cottons.



Sherrill Trimpey, Shrewsbury, who serves as President of York County Farm Women Group No. 20, pieces together another quilt for the York Day Nursery and Kindergarten service project.

Horticulture library opened

KENNETT SQUARE, Pa. - Longwood Gardens, here has opened its horticultural library to the public for research and reference. Its hours will be from 8:00 to 11:30 a.m. and 12:30 to 4:00 p.m. on weekdays throughout the year, excluding holidays. The public will be admitted for one day upon the payment of the $2.00 admission fee to the gardens and an additional $2.00 admission fee to the library. Those who wish to use the library for more prolonged study or research may purchase a $10.00 Neighbor Pass to the gardens and a $10.00 Library Pass to the library, both entitling their owner to unlimited daily admittance for a period of one year. The Neighbor Pass is also honored in the gardens at evening fountain displays in the Summer, and at special holiday evening conservatory displays throughout the year. These are available daily at the sales desk of Longwood's Visitor Center.

Limited previously to the use of Longwood staff member and recognized professionals in the field of horticulture, the Longwood library contains one of the most complete collections of gardening literature in the country. There are currently about 10,500 volumes on the shelves, their subject matter ranging from the growing of fruits and vegetables to biographies of famous plant hunters. Longwood also subscribes to a large number of periodicals related to horticulture and gardening, and maintains extensive vertical files on subjects of interest to gardeners.

Longwood Gardens is located at the junction of U.S. Route 1 and Pa. Route 52, northeast of Kennett Square. It is open daily, the gardens from 9:00 a.m. to 5:00 p.m. (6:00 p.m. in Summer) and the conservatories from 10:00 a.m. to 5:00 p.m. Admission is $2.00 for adults and $1.00 for children six through 14. Children under six are admitted free.

Poultry up

HARRISBURG - Pennsylvania poultry production was up during the week ending April 23, according to the Pennsylvania Crop Reporting Service, maintaining levels above 1976 production.

Placement of broiler chicks were 1,839,000, six per cent higher than the previous week and 20 per cent above the corresponding week a year earlier. Average placements during the past ten weeks wer 18 per cent above a year ago.

In the 21 key poultry producing states, placements of broilers were 72,024,000. This figure is about the same as the previous week, but five per cent above the same week in 1976.

Average placements in the 21 key poultry producing states during the past ten weeks were five per cent above a year ago.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

HOW TO MOTIVATE CHILD TO BE BETTER STUDENT

What makes one child a better student than another? In a home with two or more children that's often a question that concerns parents. Some experts say that school work is between teacher and student, but generally parents feel very much involved in classroom performance when a child brings home a report card.

High distractability may be the single trait that most influences a child's performance in school. One expert points out some additional characteristics that may spell success in school work or the lack of it:

Attitudes a youngster holds towards new experiences,

Intensity of his reaction to new things and to people,

Responsiveness to signals given by others.

Parents must recognize that each child has a certain learning style and it is influenced by the individual's own personality characteristics. They can try to help mold personalities that learn efficiently by showing a child they have a respect for learning themselves; by providing a place to study undisturbed; and by helping the child learn to deal with his frustrations.

Parents do have a responsibility and an opportunity to create a good environment both physically and mentally for the students in the family.

CELSIUS TEMPERATURE

New ovens can be found in department stores with Celsius and Fahrenheit temperatures on them and the weather report, already given in both scales, will soon be reported completely in Celsius temperatures.

The Celsius temperature scale, formerly referred to as Centigrade, is another aspect of the metric system which America is now in the process of switching to.

The symbol for Celsius is degrees C. It is capitalized because it is derived from a proper name.

With our present Fahrenheit temperature scale, water freezes at 32 degrees and boils at 212 degrees. On the Celsius scale water freezes at zero degrees and boils at 100. Body temperature is 98.6 degrees F. and 37 degrees C.

Don't feel you must take a crash course in metrics to become an instant expert. Learn the basics and little by little, as you deal with tehm, you will find yourself "thinking metric."

To help you adapt to the International System of Units, the National Bureau of Standards offers a packet of materials free of charge. Write: Metric Information Office c-o Jeff Odom National Bureau of Standards Washington, D.C. 20234

Among other helpful guides is a book, entitled "Neater by the Meter," written by Penn State professor Anton Glaser. For information write: Anton Glaser 1237 Whitney Road Southampton, Pa. 18966

Egg board posts ad schedule

PARK RIDGE, Ill. - Details of American Egg Board's national multi-million dollar adverising schedule from June through October were released, recently.

Spot and network television, magazines and network radio will continue to be utilized to reach the target market of women ages 18-49 living in major metropolitan areas.

The award-winning "Incredible Edible Egg" television commercials will be shown on all three network news programs for three-week periods in June and September.

The commercials will also continue to appear on spot television in the top 20 markets. One hundred-thirty spots in ten weeks will appear in June, July and September. The top 20 markets are: New York, Los Angeles, Chicago, Phidadelphia, San Francisco, Boston, Detroit, Washington, D. C., Cleveland, Dallas-Ft. Worth, Pittsburgh, Houston, Minneapolis-St. Paul, Miami, St. Louis, Atlanta, Tampa-St. Petersburg, Seattle-Tacoma, Indianapolis and Baltimore.

Full-page, full-color magazine advertisements stressing the versatility, ease of preparation, economy and snack-food possibilities of egg will run in four major ladies' magazines a total of nine times the magazines are: **Redbook (June), Better Homes and Gardens and Family Circle (July), Good Housekeeping and Redbook (August), Better Homes and Gardens and Family Circle (September) and Good Housekeeping and Redbook (October).**

Radio advertising is scheduled on two network stations for a total of sixteen weeks. Five sixty-second -spots per week will run on CBS Network in June, July and August. Six sixty-second spots per week will also run on the Mutual Network in August, September and October for a total of eight weeks.

Trade gap likely to widen

WASHINGTON, D.C. - Industrial countries should keep the doors open to both labor-intensive manufactured goods and agricultural products from the developing nations to help cover the growing cost of grain imports, Dr. Fred H. Sanderson told a conference on food policy here April 29. Dr. Sanderson is a guest scholar at the Brookings Institution, here.

Sanderson noted that population growth and food demand in the third world will widen their food gap, even with faster gains in food production through 1985. The grain deficit of the developing countries is likely to increase from 40 to 60 million tons by then, and import costs will rise from $4.5 billion to $7 billion (at 1976-77 prices).

Under present trade policies, expanding exports, excluding oil from the third world could rise from $120 billion presently to $200 billion by 1985, a gain greatly exceeding the cost of projected grain imports. But, he noted, this could be curtailed by greater resistance to imports by the industrial nations. In any event, grain imports will continue to be a significant balance-of-payments on the poorest countries, which account for about 40 per cent of the grain deficit.

Sanderson also suggested that the added gains by the third world from trade liberalization, special preferences granted to the exports of the poorest nations, and even the income-boosting potential of cartels loom small beside the trade expansion that can be expected from continued economic growth.

READ LANCASTER FARMING FOR FULL MARKET REPORTS

By DIETER KRIEG

Life on the farm has come to a standstill as far as input from men and machines is concerned.

It's bedtime.

After a busy Spring day of planting corn, milking cows and performing a variety of routine barn chores, the hours of rest are welcome.

Motors, tractors, lights -- they're all shut off.

What remains in gear is my mind. Sometimes I wish God had provided me with a switch to turn it off too.

Spinning through the brain are thoughts of having to fix a leaking hydraulic hose, buying more fertilizer to finish planting corn, Stripy's trampled teat, and a clogged drain in the floor of the milkhouse.

Those are just a few of the problems which might develop during the course of a day on the farm. Each will take some time away from tomorrow's schedule, and the hours spent perusing over these issues at night shorten rest periods considerably.

It's not just problems which are reviewed, the day's accomplishments and plans for coming days and weeks also come to mind. Occasionally there's some mental arithmatic going on to calculate production trends, costs, income, and feed delivery dates. My arms and legs might be tired enough to want to sleep, but that little rascal between the ears wasn't allowing me to do so. I suppose the brain gets so wrapped up in a profession that being occupied by it during the day just isn't enough. It has to keep humming into the night until at long last the concerts of crickets and frogs become a too powerful lullaby.

Thank God for crickets and frogs and Nature's other soothing effects such as gentle breezes whispering outside the bedroom window or rain tap-dancing on the roof. Without them, life on the farm wouldn't be the same.

Deadline nears for tobacco insurance

LANCASTER - The deadline for securing crop insurance for tobacco is drawing closer. Growers have the remainder of May to sign up for the USDA program.

Available from USDA's Federal Crop Insurance Corporation, the insurance is considered to be a worthwhile management tool, even if crop damage does not occur.

All-risk policies for tobacco are still available for many Pennsylvania counties, as well as a number of counties in neighboring states.

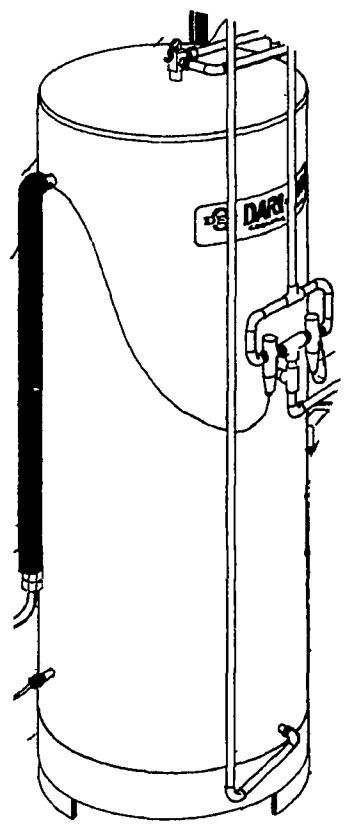
For further information, interested tobacco growers should contact the Federal Crop Insurance Corporation, 1721 Whiteford Road, York, Pa. Phone (717) 755-3416.

INTRODUCING

THERMA-STOR

Dairy Equipment Company Madison, Wisconsin has added a new energy saving Therma-Stor condensing unit to its Dari-Kool Bulk Milk Cooler Line.

The Therma-Stor is a major improvement in water cooled condensing units. This unit has an all stainless steel heat exchanger combined with a 150 gallon stainless steel storage tank. This unit provides enough 110 degrees water for preping cows and general use while milking. It also stores 110 degrees water for use between milking. In addition the Therma-Stor produces 50 gallons of 165 degrees for pipeline wash-up after milking. This unit is available with a single or dual condenser.



A NEW WATER COOLED CONDENSER - THERMA-STOR

For years water cooled condensing units have been used not only for bulk milk coolers, but refrigeration units of all types. The main reason water was used, was to lower the condensing temperature of the refrigerant. This increased the efficiency of the condensing unit.

Large quantities of 70 degrees - 80 degrees water was the useless by-product of these units. Because of the high original investment and maintenance cost, this style unit is not commonly sold on milk coolers today.

Then things changed. Energy costs have doubled on most farms in the last few years, 165 degrees F water now costs a dairyman ½ cent, to 2 cents per gallon. The average dairy uses two gallons of hot water per cow, per day for udder washing, sanitizing, washing equipment, feeding calves and general clean up. This means an average cost of $2-day or $700-year for a 100 cow dairy. This revived the water cooled condenser concept for dairy farmers. A modern dairy used 110 degrees water for equipment sanitizing, udder washing, rinse cycles on the pipeline and the bulk cooler, calf feeding and hand washing. Only the wash cycle of pipeline and the milk cooler require an elevated water temperature of 165 degrees F. The profile of usage on an average 100 cow dairy is 400 gallons of 110 degrees water and 70 gallons of 165 degrees water.

A water cooled condenser can deliver 165 degrees water, but the condensing temperature would be very high. The results would be poor efficiency and short compressor life. The lower the condensing temperatures, the higher the efficiency and the longer the compressor life.

One of the innovations on the market today generates a gallon of 100 degrees water for every gallon of milk cooled. It also generated 50 gallons of 165 degrees at each milking. This unit combines an insulated 150 gallon stainless steel storage tank and a stainless steel heat exchanger into one. The condensing temperature in this unit is determined by the 110 degrees water. The 165 degrees water is generated by desuperheating the refrigerant. Storage of the 110 degrees and 165 degrees water is necessary for usage at times other than milking.

A small backup 165 degrees water heater is recommended. There is no need for a backup on the 110 degrees water because excess is usually generated. The refrigeration system is very conventional regarding controls, valves and compressors. The condenser storage tank is the only special piece of equipment required. This condenser storage tank can be added to most refrigeration systems.

The investment of this equipment is returned by the savings in electrical energy in a year or two on the average dairy.

With the addition of Therma-Stor to an existing air cooled condenser refrigeration system your milk house can be partially heated and there is no water wasted.

Farm Bureau tells Bergland of drought, grade standards, imports

PARK RIDGE, Ill. - Allan Grant, president of the American Farm Bureau Federation (ABFF), has recommended to Secretary Agriculture Bob Bergland that any drought related cuts in grazing permits on federal land be temporary, emergency actions only.

Grant further requested the secretary to take steps to avoid any federal grazing reductions that could lead to excessive liquidation of cattle herds because of drought.

Earlier, in a letter to President Carter with copies going to Bergland and Interoir Secretary Cecil Andrus, Grant urged that wilderness and parkland areas be made available to domestic livestock if grazing reductions on other public lands became necessary.

"We also believe any reductions in domestic livestock grazing should be preceded by a corresponding reduction in big game and wild horse grazing," Grant said in the letter to President Carter.

The actions taken by Grant were the result of recommendations made by the AFBF beef cattle advisory committee and approved by the AFBF board of directors.

Other beef committee suggestions relayed to Bergland by Grant included one that proposed U.S. feeder cattle grade standard changes be tabled until further study and resulting workable revisions can be made; one that asked for improvement in the uniformity and efficiency of U.S. beef quality grading standards; and another requesting imports of beef and beef products for 1977 be held at or below the quotas established by the Meat Import Act of 1964.

Other beef committee actions that Grant referred to Bergland included: numerous recommendations to speed up the complete eradication of brucellosis in the U.S.; opposition to government involvement in production and marketing of livestock by setting price ceilings, controlling production or manipulating markets; support for unrestricted movement of boxed beef into all markets; establishment of a foreign embarkation quarantine facility for assemblying and inspecting livestock before shipment to the maximum security quarantine station now under construction at Fleming Key, Florida; and a recommendation that more uniform trucking regulations be formulated.

While some of the hard-hit drought areas have received some moisture recently, the advisory committee expressed considerable concern over much of the range country where the grazing season is about to get underway.

In another drought related committee recommendation passed on to Bergland by Grant, the U.S. Department of Agriculture was urged to price any disaster assistance feed supplies from government sources at a rate which covers government costs.

Wayne introduces new feed

Chicago, I.. - A new diary feed line-Dari-Forage Balancers-will be marketed this Spring and Summer by the Wayne Feed Division of Allied Mills according to an announcement by Art Henderlong, Dairy Feeds Marketing Manager.

The new products are designed to proviode a balanced milking ration for cows on pasture or green chop. Further, the new line is formulated to complement the changing quality of grass for the progression of the Summer season, according to Henderlong.

The new line includes three Dair-Forage Balancers according to protein level-12 per cent, 14 per cent and 16 per cent. The 12 per cent product is intended for use in spring and early summer when forage quality permits a lower protein requirements for the milking ration. The 14 per cent formulation is recommended from mid to late summer. From late Summer through early fall when pasture quality dictates a higher protein need, the 16 per cent product is recommended.

"Relative energy and fiber levels are critical with most summer roughage programs," Henderlong said. "These critical needs and their importance to maximum milk production are pointed up by the Wayne Maximizer program. Wayne Dari-Forage Balancers compensate for the critical needs and assure milk production stability throughout the summer months," Henderlong concluded.

Farmers produce more, earn less

ANNAPOLIS, Md. - "Shortage is not something Maryland farmers believe in," says Secretary of Agriculture Young D. Hance, who commented on a series of production reports showing that the mainstays of Maryland agriculture are setting new records.

"The Eastern Shore's broiler producers in 1976 raised a record high 199 million birds which pumped $183 million into the State's economy. Our dairy farmers produced 130 million pounds of milk in March demonstrating their quick recovery from the ravages of the Winter. Actually, the dairymen have been shipping more milk for each of the first three months of this year than they did in 1976.

"But despite this good news of the production front in terms of more food for people to eat, there are some hard economics involved. The broiler growers produced 11 per cent more birds last year than they did in 1976, but the cash income from those birds declined by one per cent.

"And our dairy farmers, while producing and shipping more milk, are, so far, getting less. In March of this year they received $9.42 per hundredweight compared to $9.72 paid for the milk a year ago.

"Something has to be done to reward the farmer for his bountiful production and I hope that Congress will seriously consider the economics of preserving agriculture when it deals with major farm legislation this year.

"The soybean market is strong, so our farmers say they will plant 20,000 more acres of beans. This year, we are aiming at a repeat of 730,000 acres of corn, and if we get better weather, we should beat last year's record high production," Hance concluded.

Price Index up 3 points

WASHINGTON, D.C. - The Price Index Received by Farmers increased three points (1½ per cent) during the month ended April 15, according to figures released on May 2 by the United States Department of Agriculture.

At 193 per cent of its January-December 1967 average, the Index was up four points (two per cent) above a year earlier.

This marked the fourth straight monthly increase in the Index, which stood at 179 in December, then moved up to 183 in January, to 187 for February and to 190 in March. It's at its highest point since last July.

Higher prices for soybeans, cattle, oranges and potatoes were mainly responsible for the gain. Lower prices for vegetables, hogs, eggs, cotton, and corn $1.10 per Cwt. to $34.90, while hog prices declined $1.10 to $36.00.

Soybeans advanced $1.55 per bushel to $9.38; oranges advanced from $1.46 per box in March to $2.09. But, corn was down three cents per bushel to $2.32; eggs were off 3.5 cents per dozen to 55.3 cents; cotton was off from 69.8 cents to 67.3 cents per pound.

Meanwhile, the Index of Prices Paid by Farmers for Commodities and Services, Interest, Taxes and Wage Rates moved up three points (1½ pct.) to a record 204. It was 13 points above a year earlier. The Ratio of Prices Received to Prices Paid remained at 95. It was 99 a year ago. Under the old 1910-14 formulas, Prices Received advanced nine points to 483; Prices Paid advanced eight points to 693. The Parity Ratio advanced one point to 70.

Chester County sets deadline for dairy princess pageant

OXFORD, Pa. - Chester County dairymen will soon have a new dairy princess to represent them. Plans are being made for the fourth annual contest which will be held at the Nottingham School, South Fifth Street, Oxford, on June 18 with a catered banquet starting at 6:45 p.m. preceding the pageant. The banquet tickets are on sale and can be obtained from Mrs. Evelyn Evans, 458-5222; Mrs. Joyce Hostetter, 932-9599; or any member of the dairy princess committee - Mrs. Glen Freese, Mrs. Thomas Wilkinson, Lester High, Mrs. Edward Lawrie, or Agricultural Extension Agent, Glen Shirk.

Preceding the pageant the Good News quartet will present a mini concert. The dairy princess pageant, open to the public, will start at 8:00 p.m. The contestants applications are now being accepted and must be in by June 4th to Mrs. Evelyn Evans, Chester Springs, R2, Pa.. 19425. Entry blanks may be obtained from any member of the committee. All applicants must:

- Live in Chester County.
- Be a daughter of a dairy farm, a dairy farm manager, herdsman or dairy farm owner during the current year, or the contestant be the owner of more than one dairy animal prior to May 1, 1977.
- Have completed her junior year of high school and will not reach her 22nd birthday by December 31, 1977.
- She must be single and never married.
- Have her parents' or guardians' consent.
- Former local winners are not eligible.

The Dairy Princess will represent Chester County farmers as their candidate for the Pennsylvania State Dairy Princess in Harrisburg, on September 28 & 29. During her year of rein as Chester County Dairy Princess, she will appear at various banquests and social functions to promote the sale of milk and create good will between farmers and their consumers. Anyone wishing to schedule her appearance may do so by contacting the current president, Mrs. Evelyn Evans, 458-5222.

Committee appointed for consumer education

Committee appointed for CONSUMER EDUCATION

PARK RIDGE, Ill. - Recognizing the importance of consumer education in changing consumer attitudes and buying habits, American Egg Board has appointed a standing committee on Consumer Education.

Ted Darragh, Arkansas, has been named chairman of the committee, which will include: Ed Houston, Georgia; Bob Park, Pennsylvania; Ernest Brown, Illinois; Garth Rathjen, Iowa; Bill McAnally, California. Truman Wilcox, Washington, will serve as consultant to the committee.

The committee will guide the programs of the AEB consumer education department.

Among the vital AEB consumer education activities are the development of informational pamphlets on eggs and egg cooking, distribution to food editors of original recipes, releases and photos, and the creation of educational and publicity materials for the seasonal merchandising and publicity program.

Ventilation is one key to raising healthy pigs

By DIETER KRIEG

LANCASTER- Many hog diseases and health problems are directly related to the kind of environment the pigs are placed in, according to agricultural engineering specialists at Penn State University. Consequently, when a farmer puts his pigs in a house, he's responsible for their environment. That means proper ventilation and temperature controls.

Humid and excessively cold conditions are primary culprits in hog operations which aren't adequately protected from the weather. According to specialists at Penn State, if a producer had his pigs laying on their bellies with feet curled under, or their hair was standing up, or pigs piled on top of each other, this past Winter, conditions were much too cold for them.

There are two kinds of proper housing for pigs. "Cold" housing is recommended for growing and finishing pigs, as well as brood sows. It provides natural ventilation under "quite open" conditions, yet areas where the pigs sleep are free of draft and cold.

The "warm" barn is used for farrowing and nursing. A mini-environment all to itself, this type of structure controls everything from temperature and moisture to odors and ventilation.

With energy costs soaring, it's strongly recommended that insulation be figured into initial building plans. "Design your building for good insulation and air movement," Penn State specialists urge.

To give potential builders of hog barns an idea of what to aim for, Penn State ag engineers suggest "R" values of 12 for walls and 22 for ceilings. The "R" value is a measure of the resistance to heat transfer, or insulation. To illustrate this value, engineers point out that a one inch board has an "R" value of one. It's the same for an eight inch concrete block. Fiberglass insulation has an "R" value of better than three for each inch of thickness. Styrofoam has about the same value. For urethane the "R" value is better than six.

Obviously resting in comfort, these pigs are pretty well taken care of.

When installing insulation, it's important to remember to always place moisture barriers on the warm side of the insulation. Also, all joints should be sealed to keep moisture out.

Another important consideration is air movement. A rule of thumb is one complete change of air per minute during the Summer, and one complete change every 10 to 12 minutes for Winter ventilation.,

The most critical part of the ventilation system is the inlet design and location, say Extension specialists at Penn State. These two criteria determine the distribution of air within the building. Inlets should jet air across the ceiling, the engineers point out.

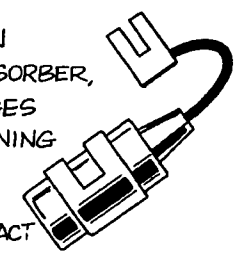
When ducts are incorporated into the ventilation system, one square foot of duct should be figured for every 1000 square feet of air.

Although the conventional pattern for fan placement in pig barns is along the sides, more and more fans are being located to draw air off of manure pits. Penn State recommends the latter.

Odors are sometimes overlooked, since a man's nose is about six feet above the floor, while most of the odors linger closer to the ground. Engineers urge hog producers to keep that in mind when deciding whether or not their production facilities are as odor free as they should be.

The name of the game is minimizing stress factors for hogs in the building. The producer can give himself a bit of additional assurance that he's doing things right by checking temperature, drafts, humidity and odors within his hog facilities. A simple test for air distribution is to run your hand along air inlets to see if the air is coming in uniformly. "Maintain your systems, such as the cleaning of fan blades and shutters," Penn State engineers advise.

Auto Service Tips



CONDENSER- LIKE AN ELECTRICAL SHOCK ABSORBER, IT SMOOTHS OUT SURGES CAUSED BY RAPID OPENING AND CLOSING OF THE CONTACT SET SHOULD BE REPLACED WHEN CONTACT SET IS CHANGED.

Computer now in farm management

HARRISBURG - Glen Engle, from Cochranville, Pa., recently used the computer as a management tool for the farm. Engle participated in a workshop called Pro-Ag.

This is a computerized farm management service offered exclusively by Internatial Harvester, according to company officials.

Engle took part in the workshop held at the Host Inn here. Used in the session was a computer terminal. It was connected via telephone lines to IH's computer operation in Ft. Wayne, Indiana.

At the workshop, IH instructors helped Engle develop farm-related data on his operation. Such information included his labor, machinery and equipment, cost per acre, and productivity. Also assisting in the workshop was C.B. Hoober & Son, Inc., an IH dealership in Intercourse, Pennsylvania.

This information, IH said, was then transmitted via a computer terminal to the IH computer. The computer then provided an individualized analysis of the farmer's operation. Highlighted was such data as cost per acre, primary profit sources, and opportunities to hike income.

With this information, the farmer then tests alternatives affecting land, labor and equipment.

"Pro-Ag showed how important planting time is and which crops produce the best returns," Engle stated. "The program also helped show what our equipment needs are," he continued.

According to IH, the aim of the program is to allow the participant to continue making changes until he finds the best way to boost profit productivity.

A computer terminal hooked to a telephone and a man to operate it is all that's needed to plug into a vast store of farm management knowledge.

Loan, purchase rates announced by USDA

WASHINGTON, D.C. - The 1977 county loan and purchase rates for oats will result in an increase of 27 per cent per bushel over the 1976 rates for all counties, the U.S. Department of Agriculture announced today. The new rates reflect the national average loan rate of $1 per bushel, announced April 4, 1977.

There are no adjustments in the county-to-county and are-to-area relationship from those in effect for 1976.

The 1977-crop county loan rates for 1977-crop oats is unchanged from 1976.

Copies of 1977-crop oats county loan rates as applicable are being sent to states and will also be available from the Grains, Oilseeds and Cotton Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20013.

Agricultural land exempt from sewage and water assessment

HARRISBURG - Governor Milton J. Shapp and Agriculture Secretary Kent D. Shelhamer last week presided over the first certifications for sewerage and water assessment relief for Pennsylvania farmers under Act 71, signed into law in 1976.

The law exempts land in agricultural production from such assessments but provides no exemption if the land is taken out of farming.

Shapp cited the obvious benefits of Act 71 in referring to the case of a Berks County farmer faced with bankruptcy because of a proposed $40,000 sewerage assessment in his township.

"Farmers who own large tracts of assessable land cannot pay the same amounts developers can. If any farmer chooses to sell that land for profit, then the assessments would become valid," Shapp said. He added that he felt it was state government's mandate to "assure Pennsylvania family farmers every possible fiscal edge to remain in business for the good of all Pennsylvanians."

Shapp also noted that the signing of certification marked the first time a prime sponsor of a piece of legislation would also sign approval certificates as a cabinet member.

Kent D. Shelhamer sponsored the bill when he was a legislator (Columbia County) and chairman of the House Agriculture Committee. He has been Agriculture Secretary since February 14, 1977.

Shelhamer said that he had "pledged to be the voice of Pennsylvania farmers" as Agriculture Secretary and considered Act 71 as a continuation of the "same pledge he had made when in the legislature."

Shapp noted "the rest of the nation looks to our state as a prime example of the success of family farming even as the corporate farm has become the rule in some other agricultural states."

He recounted such farm legislation as the Clean and Green Act and the Flood Relief Act for farmers following Hurrican Agnes as part of "more helpful legislation for farmers in the past five years than they had seen in the previous 35 years."

Shapp also congratulated the legislature for its cooperation in the passage of important farm bills and said he was "delighted that Kent Shelhamer was continuing the same farm effectiveness as Agriculture Secretary as he displayed as a 12-year legislator."

Newsreporting taught by mail

UNIVERSITY PARK, Pa. - If you are publicity chairman or correspondent for your club or organization, Penn State has a new learn-by-doing course on news writing.

Purpose of the course is to teach students to write stories for daily or weekly local newspapers, especially for those who report the activities of clubs, churches, or organizations.

Included are lessons on news and the newspaper, write it right, writing your story, newspaper style, and editing copy. This five-lesson course emphasizes writing assignments and returning them for suggestions from the author.

To order the "news writing" course, send your check for $3, made payable to Penn State, to "News Writing", Box 5000, University Park, Pa. 16802.

Belleville, Pa.

Sale nets $105,000; quilt brings $700

INTERCOURSE, Pa. - The annual Pennsylvania Relief Sale Workers meeting was held at Harvest Drive Restaurant, here with approximately 200 workers in attendence.

Paul S. Hoover, treasurer presented to Mennonite Central Committee a check of $105,000.00 which exceeded the previous year high of $100,000.00 in 1975. Through this agency the funds will be distributed to relief projects wherever needed in the world.

Approximately 15,000 persons attended the sale earlier this year at the Farm Show Building in Harrisburg.

Hand-made quilts, always the greatest attraction, brought buyers from approximately 10 states. More than 300 quilts were given by dedicated women, who gathered in homes and churches each week since the last sale. The highest priced quilt this year brought $700.00.

In addition to quilts, there was a variety of items and foodstuff for sale.

More than 2,000 strawberry pies sold as fast as they were made on the grounds in their own special department. The berries were flown in from California.

Some of the other items sold or auctioned included antiques, household goods, plants, crafts, Pennsylvania Dutch foods, chicken barbeque, pastries, cheese, homemade candy, etc., all continued sales through the day which began at 6 a.m. with pancake and sausage breakfast.

Hoover, also reported that during 1976 the net proceeds of fifteen relief sales held in United States and Canada totaled $1,117,440.00.

Plant lovers' corner

Spring is the right time to think about pruning, and it must be done with a purpose in mind. Pruning should be done for the following reasons: 1. To maintain or reduce the size of a tree or shrub; 2. To remove dead, diseased and-or broken branches. This type of pruning should be done at any time of the year unhealthy branches appear; 3. To rejuvenate old shrubs and restore them to new vigor. Certain shrubs, even though badly overgrown, can be restored to a young, natural growth habit by the proper use of rejuvenation pruning. Lilac, privet, forsythia, and many of the spireas are examples of shrubs that can be rejuvenated; 4. To prevent damage to life and property; 5. To shape plants in an unnatural form. Espaliers, hedges, and shrubs used in formal plantings are pruned or sheared in shapes other than their natural growth habit; 6. To stimulate future flower and fruit development; 7. and to retain maximum color on colored twig plants.

We are now listing Spring Sales.

PURINA BIO-4 POULTRY PROGRAM

HELPS YOU FIGHT TODAY'S HIGH COST OF FEED

WHAT IS BIO-4™

It took Purina Poultry Researchers 7 years to develop BIO-4™. During these 7 years they studied laying hens nutrient requirements and what nutrients are necessary to produce an egg based on the hens feed consumption. By knowing the hens nutritional needs, and by precision feed formulation, BIO-4™ insures that hens receive necessary nutrients without over-feeding costly feed ingredients.

SAVES FEED $$$

FEED INTAKE lbs./100 HENS/DAY	™ BIO-4 CHOW TO FEED	Price DIFFERENCE Between RATIONS AS OF 4-25-77
UNDER 20.0	BIO - 128	$4.40 PER TON
20.0 TO 21.6	BIO - 121	$5.80 PER TON
21.7 TO 23.3	BIO - 114	$5.60 PER TON
23.4 TO 25.0	BIO - 107	$1.40 PER TON
OVER 25.0	BIO - 100	

Starting With B-100, Each BIO CHOW Contains 7% More Fortification

MORE PROFIT $$$

Better Rations + Better Feeding Program = Better Performance

Feed comparison tests have shown that BIO-4™ can lower feed costs ½ cent per dozen eggs and maintain top production, egg size, and shell quality. That's $110.00 saved per 1000 hens/per year.

BETTER YOURSELF WITH BIO-4™ PERFORMANCE EDGE

MAIL TO: PURINA Box 266S, c-o Lancaster Farming Lititz, PA 17543
